Notes to Schedule of Investments:

- Portfolio securities and other financial instruments for which market quotations are readily available are stated at market value. Portfolio securities and other financial instruments for which market quotations are not readily available or if a development/event occurs that may significantly impact the value of a security, may be fair-valued, in good faith, pursuant to guidelines established by the Board of Trustees, including certain fixed income securities which may be valued with reference to securities whose prices are more readily available. The Fund s investments are valued daily by an independent pricing service, dealer quotations, or are valued at the last sale price on the exchange that is the primary market for such securities, or the last quoted bid price for those securities for which the over-the-counter market is the primary market or for listed securities in which there were no sales. Independent pricing service use information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics. The Fund s investments in senior floating rate loans (Senior Loans) for which a secondary market does not exist are valued at fair-value by Pacific Investment Management Company LLC (the Sub-Adviser). Such procedures by the Sub-Adviser include consideration and evaluation of: (1) the creditworthiness of the borrower and any intermediate participants; (2) the term of the Senior Loan; (3) recent prices in the market for similar loans, if any, (4) recent prices in the market for loans of similar quality, coupon rate, and period until next interest rate reset and maturity; and (5) general economic and market conditions affecting the fair value of the Senior Loan. Exchange traded options and futures are valued at the settlement price determined by the relevant exchange. Securities purchased on a when-issued or delayed delivery basis are marked to market daily until settlement at the forward settlement value. Short-term investments maturing in 60 days or less are valued at amortized cost, if their original maturity was 60 days or less, or by amortizing their value on the 61st day prior to maturity, if the original term to maturity exceeded 60 days. The prices used by the Fund to value securities may differ from the value that would be realized if the securities were sold. The Fund s net asset value is determined daily at the close of regular trading (normally 4:00 p.m. Eastern time) on the New York Stock Exchange.
- (a) 144A Security Security exempt from registration, under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, typically only to qualified institutional buyers.
- (b) When-Issued or delayed-delivery security. To be settled/delivered after July 31, 2005.
- (c) Fair-valued security.
- (d) Credit-linked trust certificate.
- (e) All or partial amount segregated as collateral for futures contracts, when-issued or delayed-delivery securities.
- (f) Security in default.
- (g) Private Placement. Restricted as to resale and may not have a readily available market.
- (h) Illiquid security.
- (i) These securities generally pay interest at rates which are periodically pre-determined by reference to a base lending rate plus a premium. These base lending rates are generally either the lending rate offered by one or more major European banks, such as the London Inter-Bank Offered Rate (LIBOR) or the prime rate offered by one or more major United States banks, or the certificate of deposit rate. These securities are generally considered to be restricted as the Fund is ordinarily contractually obligated to receive approval from the Agent bank and/or borrower prior to disposition. Remaining maturities of senior loans may be less than the stated maturities shown as a result of contractual or optional payments by the borrower. Such prepayments cannot be predicted with certainty.
- (j) Non-income producing.
- (k) Residual Interest/Tax Exempt Municipal Bonds The interest rate shown bears an inverse relationship to the interest rate on another security or the value of an index.

Glossary:

CAD - Canadian Dollar.

GBP - British Pound.

FRN - Floating Rate Note. The interest rate disclosed reflects the rate in effect on July 31, 2005.

NR - Not Rated

REIT - Real Estate Investment Trust.

UNIT - More than one class of securities traded together.

VRN - Variable Rate Note. Instruments whose interest rates change on specified date (such as a coupon date or interest payment date) and/or whose interest rates vary with changes in a designated base rate (such as the prime interest rate).
