Notes to Schedule of Investments (unaudited)

1. Organization and Significant Accounting Policies

LMP Capital and Income Fund Inc. (the Fund) was incorporated in Maryland on November 12, 2003 and is registered as a non-diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (the 1940 Act). The Board of Directors authorized 100 million shares of \$0.001 par value common stock. The Fund s investment objective is total return with an emphasis on income. The Fund pursues its investment objective by investing at least 80% of its assets in a broad range of equity and fixed income securities of both U.S. and foreign issuers.

The following are significant accounting policies consistently followed by the Fund and are in conformity with U.S. generally accepted accounting principles (GAAP).

(a) Investment valuation. Equity securities for which market quotations are available are valued at the last reported sales price or official closing price on the primary market or exchange on which they trade. Debt securities are valued at the mean between the last quoted bid and asked prices provided by an independent pricing service, which are based on transactions in debt obligations, quotations from bond dealers, market transactions in comparable securities and various other relationships between securities. Futures contracts are valued daily at the settlement price established by the board of trade or exchange on which they are traded. When prices are not readily available, or are determined not to reflect fair value, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded, but before the Fund calculates its net asset value, the Fund values these securities at fair value as determined in accordance with procedures approved by the Fund s Board of Directors. Fair valuing of securities may also be determined with the assistance of a pricing service using calculations based on indices of domestic securities and other appropriate indicators such as prices of relevant American depository receipts (ADRs) and futures contracts. Short-term obligations with maturities of 60 days or less are valued at amortized cost, which approximates fair value.

The Fund has adopted Financial Accounting Standards Board Codification Topic 820 (ASC Topic 820). ASC Topic 820 establishes a single definition of fair value, creates a three-tier hierarchy as a framework for measuring fair value based on inputs used to value the Fund s investments, and requires additional disclosure about fair value. The hierarchy of inputs is summarized below.

- Level 1 quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund s own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The Fund uses valuation techniques to measure fair value that are consistent with the market approach and/or income approach, depending on the type of the security and the particular circumstance. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable securities. The income approach uses valuation techniques to convert future amounts to a single present amount.

The following is a summary of the inputs used in valuing the Fund s assets carried at fair value:

| | | QUOTED PRICES | | OTHER SIGNIFICANT OBSERVABLE INPUTS | SIGNIFICANT UNOBSERVABLE INPUTS | | |

Notes to Schedule of Investments (unaudited) (continued)

See Schedule of Investments for additional detailed categorizations.

Following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining fair value:

| INVESTMENTS IN SECURITIES | | ASSET- BACKED SECURITIES | | WARRANTS | | | TOTAL |
|--|----|--------------------------------|----|----------|---|----|--------|
| Balance as of December 31, 2009 | \$ | 35 | \$ | | 0 | \$ | 35 |
| Accrued premiums/discounts | _ | | - | | | - | |
| Realized gain/(loss) | | | | | | | |
| Change in unrealized appreciation (depreciation)(1) | | | | | 2 | | 2 |
| Net purchases (sales) | | | | | | | |
| Transfers into Level 3 | | 22,938 | | | | | 22,938 |
| Transfers out of Level 3 | | | | | | | |
| Balance as of March 31, 2010 | \$ | 22,973 | \$ | | 2 | \$ | 22,975 |
| Net change in unrealized appreciation | | | | | | | |
| (depreciation) for investments in securities still held at March 31, | | | | | | | |
| 2010(1) | \$ | | | | 2 | \$ | 2 |

- (1) Change in unrealized appreciation (depreciation) includes net unrealized appreciation (depreciation) resulting from changes in investment values during the reporting period and the reversal of previously recorded unrealized appreciation (depreciation) when gains or losses are realized.
- (b) Repurchase agreements. The Fund may enter into repurchase agreements with institutions that its investment adviser has determined are creditworthy. Each repurchase agreement is recorded at cost. Under the terms of a typical repurchase agreement, a fund takes possession of an underlying debt obligation subject to an obligation of the seller to repurchase, and of the fund to resell, the obligation at an agreed-upon price and time, thereby determining the yield during a fund sholding period. When entering into repurchase agreements, it is the Fund spolicy that its custodian or a third party custodian, acting on the Fund shealf, take possession of the underlying collateral securities, the market value of which, at all times, at least equals the principal amount of the repurchase transaction, including accrued interest. To the extent that any repurchase transaction maturity exceeds one business day, the value of the collateral is marked to market and measured against the value of the agreement to ensure the adequacy of the collateral. If the counterparty defaults, the Fund generally has the right to use the collateral to satisfy the terms of the repurchase transaction. However, if the market value of the collateral declines during the period in which the Fund seeks to assert

Notes to Schedule of Investments (unaudited) (continued)

its rights or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by the Fund may be delayed or limited.

(c) Written Options. When the Fund writes an option, an amount equal to the premium received by the Fund is recorded as a liability, the value of which is marked to market daily to reflect the current market value of the option written. If the option expires, the premium received is recorded as a realized gain. When a written call option is exercised, the difference between the premium received plus the option exercise price and the Fund s basis in the underlying security (in the case of a covered written call option), or the cost to purchase the underlying security (in the case of an uncovered written call option), including brokerage commission, is recognized as a realized gain or loss. When a written put option is exercised, the amount of the premium received is subtracted from the cost of the security purchased by the Fund from the exercise of the written put option to form the Fund s basis in the underlying security purchased. The writer or buyer of an option traded on an exchange can liquidate the position before the exercise of the option by entering into a closing transaction. The cost of a closing transaction is deducted from the original premium received resulting in a realized gain or loss to the Fund.

The risk in writing a covered call option is that the Fund may forego the opportunity of profit if the market price of the underlying security increases and the option is exercised. The risk in writing a put option is that the Fund may incur a loss if the market price of the underlying security decreases and the option is exercised. The risk in writing a call option is that the Fund is exposed to the risk of loss if the market price of the underlying security increases. In addition, there is the risk that the Fund may not be able to enter into a closing transaction because of an illiquid secondary market.

(d) Futures Contracts. The Fund may use futures contracts to gain exposure to, or hedge against, changes in the value of equities, interest rates or foreign currencies. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date.

Upon entering into a futures contract, the Fund is required to deposit cash or cash equivalents with a broker in an amount equal to a certain percentage of the contract amount. This is known as the initial margin and subsequent payments (variation margin) are made or received by the Fund each day, depending on the daily fluctuation in the value of the contract. For certain futures, including foreign denominated futures, variation margin is not settled daily, but is recorded as a net variation margin payable or receivable. Futures contracts are valued daily at the settlement price established by the board of trade or exchange on which they are traded.

Futures contracts involve, to varying degrees, risk of loss. In addition, there is the risk that the Fund may not be able to enter into a closing transaction because of an illiquid secondary market.

(e) Inflation-Indexed Bonds. Inflation-indexed bonds are fixed-income securities whose principal value or interest rate is periodically adjusted according to the rate of inflation. As the index measuring inflation changes, the principal value or interest rate of inflation-indexed bonds will be adjusted accordingly. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation-indexed bonds. For bonds that do not provide a similar guarantee, the adjusted principal value of the bond repaid at maturity may be less than the original principal.

(f) Forward Foreign Currency Contracts. The Fund may enter into a forward foreign currency contract to hedge against foreign currency exchange rate risk on its non-U.S. dollar denominated securities or to facilitate settlement of a foreign currency denominated portfolio transaction. A forward foreign currency contract is an agreement between two parties to buy and sell a currency at a set price with delivery and settlement at a future date. The contract is marked to market daily and the change in value is recorded by the Fund as an unrealized gain or loss. When a forward foreign currency contract is closed, through either delivery or offset by entering into another forward foreign currency contract, the Fund recognizes a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value of the contract at the time it is closed.

When entering into a Forward foreign currency contract, the Fund bears the risk of an unfavorable change in the foreign exchange rate underlying the forward foreign currency contract. Risks may also arise upon entering into these contracts from the potential inability of the counterparties to meet the terms of their contracts.

(g) Securities Traded on a To-Be-Announced Basis. The Fund may trade securities on a to-be-announced (TBA) basis. In a TBA transaction, the Fund commits to purchasing or selling securities which have not yet been issued by the issuer and for which specific information, such as the face amount, maturity date and underlying pool of investments in U.S. government agency mortgage pass-through securities, is not announced. Securities purchased on a TBA basis are not settled until they are delivered to the Fund. Beginning on the date the Fund enters into a TBA transaction, cash, U.S. government securities or other liquid high-grade debt obligations are segregated in an amount equal in value to the

11

| Notes to Schedule of Investments (unaudited) (continued) | nts (unaudited) (d | (continued) |
|--|--------------------|-------------|
|--|--------------------|-------------|

purchase price of the TBA security. These securities are subject to market fluctuations and their current value is determined in the same manner as for other securities.

(h) Mortgage Dollar Rolls. The Fund may enter into mortgage dollar rolls in which the Fund sells mortgage-backed securities for delivery in the current month, realizing a gain or loss, and simultaneously contracts to repurchase substantially similar (same type, coupon and maturity) securities to settle on a specified future date.

The Fund executes its mortgage dollar rolls entirely in the TBA market, whereby the Fund makes a forward commitment to purchase a security and, instead of accepting delivery, the position is offset by a sale of the security with a simultaneous agreement to repurchase at a future date. The Fund accounts for mortgage dollar rolls as purchases and sales.

The risk of entering into mortgage dollar rolls is that the market value of the securities the Fund is obligated to repurchase under the agreement may decline below the repurchase price. In the event the buyer of securities under a mortgage dollar roll files for bankruptcy or becomes insolvent, the Fund s use of the proceeds of the mortgage dollar roll may be restricted pending a determination by the counterparty, or its trustee or receiver, whether to enforce the Fund s obligation to repurchase the securities.

(i) Foreign Currency Translation. Investment securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollar amounts based upon prevailing exchange rates on the date of valuation. Purchases and sales of investment securities and income and expense items denominated in foreign currencies are translated into U.S. dollar amounts based upon prevailing exchange rates on the respective dates of such transactions.

Foreign security and currency transactions may involve certain considerations and risks not typically associated with those of U.S. dollar denominated transactions as a result of, among other factors, the possibility of lower levels of governmental supervision and regulation of foreign securities markets and the possibility of political or economic instability.

- (j) Credit and market risk. The Fund invests in high-yield and emerging market instruments that are subject to certain credit and market risks. The yields of high-yield and emerging market debt obligations reflect, among other things, perceived credit and market risks. The Fund s investment in securities rated below investment grade typically involve risks not associated with higher rated securities including, among others, greater risk related to timely and ultimate payment of interest and principal, greater market price volatility and less liquid secondary market trading. The consequences of political, social, economic or diplomatic changes may have disruptive effects on the market prices of investments held by the Fund. The Fund s investment in non-U.S. dollar denominated securities may also result in foreign currency losses caused by devaluations and exchange rate fluctuations.
- (k) Security Transactions. Security transactions are accounted for on a trade date basis.

2. Investments

At March 31, 2010, the aggregate gross unrealized appreciation and depreciation of investments for federal income tax purposes were substantially as follows:

| Gross unrealized appreciation | \$ 35,856,049 |
|-------------------------------|------------------|
| Gross unrealized depreciation | (10,056,450) |
| Net unrealized appreciation | \$ 25,799,599 |

At March 31, 2010, the Fund had the following open futures contracts:

| | Number of Contracts | Expiration Date | Basis Value | Market Value | Unrealized Gain |
|--|------------------------|--------------------|------------------|------------------|--------------------|
| Contracts to Buy: | | | | | |
| U.S. Treasury Bonds | 18 | 6/10 | \$ 2,151,637 | \$ 2,159,438 | \$ 7,801 |
| U.S. Treasury 10-Year Notes | 26 | 6/10 | 3,021,288 | 3,022,500 | 1,212 |
| U.S. Treasury 30-Year Bonds | 2 | 6/10 | 229,811 | 232,250 | 2,439 |
| | | | | | 11,452 |
| Contracts to Sell: | | | | | |
| U.S. Treasury 5-Year Notes | 90 | 6/10 | \$ 10,356,395 | \$ 10,335,937 | 20,458 |
| Net Unrealized Gain on Open Futures Contracts | | | | | \$ 31,910 |
| | | | | | |
| | | | | | |
| | | 12 | | | |

Notes to Schedule of Investments (unaudited) (continued)

During the period ended March 31, 2010, written option transactions for the Fund were as follows:

| | Number of Contracts | Premiums |
|--|------------------------|-------------|
| Written options, outstanding December 31, 2009 | 14 | \$ 7,917 |
| Options written | 5 | 2,484 |
| Options closed | | |
| Options exercised | (5) | (2,484) |
| Options expired | | |
| Written options, outstanding March 31, 2010 | 14 | \$ 7,917 |

At March 31, 2010, the Fund held TBA securities with a total cost of \$9,114,039.

3. Derivative Instruments and Hedging Activities

 $Financial\ Accounting\ Standards\ Board\ Codification\ Topic\ 815\ (\ ASC\ Topic\ 815\)\ requires\ enhanced\ disclosure\ about\ an\ entity\ s\ derivative\ and\ hedging\ activities.$

The following is a summary of the Fund s derivative instruments categorized by risk exposure at March 31, 2010.

| | | Futures Co | ntracts | | | | |
|------------------------------------|----|-------------------------|----------------------------|----|--------------------------------|-----------------------------------|--------------|
| Primary Underlying Risk Disclosure | _ | nrealized preciation | Unrealized Depreciation | Op | Vritten otions, at value | Purchased Options, at value | Total |
| Interest Rate Contracts | \$ | 31,910 | - | \$ | 5,294 | \$ 2,406 | \$ 39,610 |
| Other Contracts Total | \$ | 31,910 | | \$ | 5,294 | \$ 2,406 | \$ 39,610 |

During the period ended March 31, 2010, the volume of derivative activity for the Fund was as follows:

| | Ave | rage market value |
|--|-----|----------------------|
| Purchased options | \$ | 602 |
| Written options | | 7,847 |
| Forward foreign currency contracts (to sell) | | 440,811 |
| Futures contracts (to buy) | | 9,823,046 |
| Futures contracts (to sell) | | 10,907,643 |

At March 31, 2010, there were no open positions held in this derivative.

The Fund has several credit related contingent features that if triggered would allow its derivatives counterparties to close out and demand payment or additional collateral to cover their exposure from the Fund. Credit related contingent features are established between the Fund and its derivatives counterparties to reduce the risk that the Fund will not fulfill its payment obligations to its counterparties. These triggering features include, but are not limited to, a percentage decrease in the Fund s net assets and or percentage decrease in the Fund s Net Asset Value or NAV. The contingent features are established within the Fund s International Swap and Derivatives Association, Inc. master agreements which govern positions in swaps, over-the-counter options, and forward currency exchange contracts for each individual counterparty.
