NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

A. In the opinion of the Company, the accompanying unaudited condensed consolidated financial statements contain all adjustments, of a normal recurring nature, necessary to present fairly its financial position as at June 30, 2014 and the results of operations for the three months and six months ended June 30, 2014 and 2013 and cash flows for the six months ended June 30, 2014 and 2013. The condensed consolidated balance sheet at December 31, 2013 was derived from audited financial statements.

Recently Issued Accounting Pronouncements. In May 2014, the Financial Accounting Standards Board (FASB) issued a new standard for revenue recognition, Accounting Standards Codification 606 (ASC 606). The purpose of ASC 606 is to provide a single, comprehensive revenue recognition model for all contracts with customers to improve comparability across industries. ASC 606 is effective for the Company for annual periods beginning January 1, 2017. The Company is currently evaluating the impact the adoption of this new standard will have on its results of operations.

In April 2014, the FASB issued Accounting Standards Update 2014-8 (ASU 2014-8), Reporting of Discontinued Operations and Disclosure of Disposals of Components of an Entity, which changes the criteria for determining which disposals can be presented as discontinued operations and modifies the related disclosure requirements. ASU 2014-8 is effective for the Company beginning January 1, 2015, with early adoption allowed for new disposals not previously classified as discontinued operations.

Revision of Previously Issued Financial Statements. During the first quarter ended March 31, 2014, the Company identified an error in the accounting for certain of its investments in private equity limited partnership funds. The investments were inappropriately accounted for under the cost basis versus the equity method. The impact of the error was to under report the investment value (included in other assets on the consolidated balance sheets) and to over (under) state equity investment earnings (loss) (included in other income (expense), net in the consolidated statements of operations). We have revised our three-month and six-month periods ended June 30, 2013 consolidated statement of operations and prior year consolidated balance sheet in these financial statements to reflect the investment accounted for as an equity investment. Retained earnings and other comprehensive income were adjusted for the changes in net income. Other historic periods will be revised, as detailed below, in our future filings. This error is not considered material to any prior period financial statement.

This revision has no effect on our consolidated statement of cash flows.

Revision of Previously Issued Financial Statements. As previously disclosed, during the third quarter ended September 30, 2013, the Company identified an error related to the classification of cash and cash investments. Foreign short-term bank deposits with terms ranging from three months to twelve months were incorrectly classified as cash and cash investments rather than short-term bank deposits. The statement of cash flows for the six months ended June 30, 2013 has been revised. These classification errors were not considered material to the prior period financial statements.

This revision had no effect on our consolidated results of operations.

The following table presents the impact of the revisions on the Company's previously issued consolidated balance sheet and statement of cash flows (all cash flow figures are year-to-date, in millions).

B. In the first quarter of 2013, the Company determined that Tvilum, its Danish ready-to-assemble cabinet business, was no longer core to its long-term growth strategy and, accordingly, the Company embarked on a plan for disposition. The disposition of Tvilum was completed in the fourth quarter of 2013. The Company has accounted for this business as a discontinued operation.

Selected financial information for the discontinued operations, during the period owned by the Company, was as follows, in millions:

	Three Months Ended June 30, 2013	Six Months Ended June 30, 2013
Net Sales	\$ 60	\$ 119
Operating loss from discontinued operations	\$ (5)	\$ (8)
Impairment of assets		(10)
Loss on disposal of discontinued operations, net		
Loss before income tax	(5)	(18)
Income tax benefit		(4)
Loss from discontinued operations, net	\$ (5)	\$ (14)

During the first quarter of 2013, the Company estimated the fair value of the business held for sale, using unobservable inputs (Level 3). After considering the deferred gains reported in Accumulated Other Comprehensive Income, the Company recorded an impairment of \$10 million in the first quarter of 2013.

(A) Other principally includes the effect of foreign currency translation.

Other indefinite-lived intangible assets were \$133 million at both June 30, 2014 and December 31, 2013, and principally included registered trademarks. The carrying value of the Company's definite-lived intangible assets was \$16 million (net of accumulated amortization of \$64 million) at June 30, 2014 and \$16 million (net of accumulated amortization of \$62 million) at December 31, 2013, and principally included customer relationships and non-compete agreements.

Table of Contents**MASCO CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) (continued)**

D. Depreciation and amortization expense, including discontinued operations, was \$85 million and \$94 million, including accelerated depreciation (relating to business rationalization initiatives) of \$1 million and \$9 million for the six months ended June 30, 2014 and 2013, respectively.

E. The Company has maintained investments in available-for-sale securities and a number of private equity funds, principally as part of its tax planning strategies, as any gains enhance the utilization of any current and future tax capital losses. Financial investments included in other assets were as follows, in millions:

	June 30, 2014	December 31, 2013
Equity method investments	\$ 61	\$ 70
Total equity method investments	61	70
Auction rate securities	22	22
Total recurring investments	22	22
Private equity funds	15	18
Other investments	3	3
Total non-recurring investments	18	21
Total	\$ 101	\$ 113

The Company did not have any transfers between Level 1 and Level 2 financial assets in the three months or six months ended June 30, 2014 or 2013.

Equity Method Investments. Investments in private equity fund partnerships, joint ventures and less than majority-owned subsidiaries in which we have significant influence are accounted for under the equity method. Our consolidated statements of operations include the Company's proportionate share of the net income or (loss) of our equity method investees. When we record our proportionate share of net income (loss), it increases (decreases) our equity income in our consolidated statement of operations and our carrying value of that investment on our consolidated balance sheet.

Recurring Fair Value Measurements. The fair value of the auction rate securities held by the Company have been estimated, on a recurring basis, using a discounted cash flow model (Level 3 input). The significant inputs in the discounted cash flow model used to value the auction rate securities include: expected maturity of auction rate securities, discount rate used to determine the present value of expected cash flows and the assumptions for credit defaults, since the auction rate securities are backed by credit default swap agreements.

Edgar Filing: MASCO CORP /DE/ - Form 10-Q

The Company's investments in auction rate securities included cost basis of \$19 million and pre-tax unrealized gains of \$3 million and had a recorded basis of \$22 million at both June 30, 2014 and December 31, 2013.

Non-Recurring Fair Value Measurements. During the three months and six months ended June 30, 2014 and 2013, the Company did not measure any financial investments at fair value on a non-recurring basis, as there was no other-than-temporary decline in the estimated value of private equity funds.

Fair Value of Debt. The fair value of the Company's short-term and long-term fixed-rate debt instruments is based principally upon modeled market prices for the same or similar issues or the current rates available to the Company for debt with similar terms and remaining maturities. The aggregate estimated market value of short-term and long-term debt at June 30, 2014 was approximately \$3.8 billion, compared with the aggregate carrying value of \$3.4 billion. The aggregate estimated market value of short-term and long-term debt at December 31, 2013 was approximately \$3.7 billion, compared with the aggregate carrying value of \$3.4 billion.

F. The Company is exposed to global market risk as part of its normal daily business activities. To manage these risks, the Company enters into various derivative contracts. These contracts include interest rate swap agreements, foreign currency exchange contracts and metals contracts intended to hedge the Company's exposure to copper and zinc. The Company reviews its hedging program, derivative positions and overall risk management on a regular basis.

Foreign Currency Contracts. The Company's net cash inflows and outflows exposed to the risk of changes in foreign currency exchange rates arise from the sale of products in countries other than the manufacturing source, foreign currency denominated supplier payments, debt and other payables, and investments in subsidiaries. To mitigate this risk during the year, the Company, including certain European operations, enters into foreign currency forward contracts and foreign currency exchange contracts.

Gains (losses) related to foreign currency forward and exchange contracts are recorded in the Company's condensed consolidated statements of operations in other income (expense), net. In the event that the counterparties fail to meet the terms of the foreign currency forward contracts, the Company's exposure is limited to the aggregate foreign currency rate differential with such institutions.

Metals Contracts. The Company has entered into several contracts to manage its exposure to increases in the price of copper and zinc. (Losses) gains related to these contracts are recorded in the Company's condensed consolidated statements of operations in cost of sales.

H. On March 28, 2013, the Company entered into a credit agreement (the "Credit Agreement") with a bank group, with an aggregate commitment of \$1.25 billion and a maturity date of March 28, 2018.

Based on the limitations of the debt to total capitalization ratio covenant in the Credit Agreement, at June 30, 2014, the Company had additional borrowing capacity, subject to availability, of up to \$1.2 billion. Additionally, at June 30, 2014, the Company could absorb a reduction to shareholders' equity of approximately \$897 million and remain in compliance with the debt to total capitalization covenant.

In order for the Company to borrow under the Credit Agreement, there must not be any default in the Company's covenants in the Credit Agreement (i.e., in addition to the two financial covenants, principally limitations on subsidiary debt, negative pledge restrictions, legal compliance requirements and maintenance of properties and insurance) and the Company's representations and warranties in the Credit Agreement must be true in all material respects on the date of borrowing (i.e., principally no material adverse change or litigation likely to result in a material adverse change, since December 31, 2012, in each case, no material ERISA or environmental non-compliance and no material tax deficiency). The Company was in compliance with all covenants and no borrowings have been made at June 30, 2014.

I. The Company's 2014 Long Term Stock Incentive Plan (and the prior plan that it replaced) provides for the issuance of stock-based incentives in various forms to employees and non-employee Directors of the Company. At June 30, 2014, outstanding stock-based incentives were in the form of long-term stock awards, stock options, phantom stock awards and stock appreciation rights. Pre-tax compensation expense and the related income tax benefit for these stock-based incentives were as follows, in millions:

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) (continued)

Note I continued:

Long-Term Stock Awards. Long-term stock awards are granted to key employees and non-employee Directors of the Company and do not cause net share dilution inasmuch as the Company continues the practice of repurchasing and retiring an equal number of shares in the open market. The Company granted 1,656,220 shares of long-term stock awards in the six months ended June 30, 2014.

The Company's long-term stock award activity was as follows, shares in millions:

	Six Months Ended June 30,	
	2014	2013
Unvested stock award shares at January 1	8	8
Weighted average grant date fair value	\$ 17	\$ 16

Stock award shares forfeited		
Weighted average grant date fair value	\$ 16	\$ 18
Unvested stock award shares at June 30	7	8
Weighted average grant date fair value	\$ 18	\$ 17

At June 30, 2014 and 2013, there was \$81 million and \$83 million of total unrecognized compensation expense related to unvested stock awards; such awards had a weighted average remaining vesting period of four years in both 2014 and 2013.

The total market value (at the vesting date) of stock award shares which vested during the six months ended June 30, 2014 and 2013 was \$45 million and \$32 million, respectively.

Stock Options. Stock options are granted to key employees of the Company. The exercise price equals the market price of the Company's common stock at the grant date.

The Company granted 332,750 of stock option shares in the six months ended June 30, 2014 with a grant date exercise price approximating \$22 per share. In the first six months of 2014, 592,470 stock option shares were forfeited (including options that expired unexercised).

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) (concluded)

Note O concluded:

Additionally, 11 million common shares for both the three months and six months ended June 30, 2014 and 14 million common shares for both the three months and six months ended June 30, 2013 related to stock options were excluded from the computation of diluted earnings per common share due to their antidilutive effect.

In the first six months of 2014, the Company granted 1.7 million shares of long-term stock awards; to offset the dilutive impact of these awards, the Company also repurchased and retired 1.7 million shares of Company common stock, for cash aggregating approximately \$39 million. At June 30, 2014, the Company had 20.9 million shares of its common stock remaining under the July 2007 Board of Directors' repurchase authorization.

On the basis of amounts paid (declared), cash dividends per common share were \$.075 (\$.090) and \$.15 (\$.165) for the three months and six months ended June 30, 2014, respectively, and \$.075 (\$.075) and \$.15 (\$.15) for the three months and six months ended June 30, 2013, respectively.

P. We are subject to claims, charges, litigation and other proceedings in the ordinary course of our business, including those arising from or related to contractual matters, intellectual property, personal injury, environmental matters, product liability, product recalls, construction defect, insurance coverage, personnel and employment disputes and other matters, including class actions. We believe we have adequate defenses in these matters and that the likelihood that the outcome of these matters would have a material adverse effect on us is remote. However, there is no assurance that we will prevail in these matters, and we could in the future incur judgments, enter into settlements of claims or revise our expectations regarding the outcome of these matters, which could materially impact our results of operations.

Q. Our effective tax rate of 19 percent and 15 percent for the three months and six months ended June 30, 2014, respectively, primarily due to the decrease in the valuation allowance resulting from the partial utilization of our U.S. Federal net operating loss carryforward. The effective tax rate for the first half of 2014 includes a \$19 million tax benefit primarily from a state tax benefit on uncertain tax positions due to the expiration of applicable statutes of limitation.

Our effective tax rate of 30 percent and 24 percent for the three months and six months ended June 30, 2013, respectively, primarily due to the decrease in the valuation allowance resulting from the partial utilization of our U.S. Federal net operating loss carryforward. The effective tax rate for the first half of 2013 includes an \$11 million state tax benefit on uncertain tax positions due primarily to the expiration of applicable statutes of limitation.

NET SALES

Net sales increased five percent for both the three-month and six-month periods ended June 30, 2014, from the comparable periods of 2013. Excluding the positive effect of currency translation, net sales increased four percent for both the three-month and six-month periods ending June 30, 2014 from the comparable periods of 2013. The following table reconciles reported net sales to net sales, excluding acquisitions and the effect of currency translation, in millions:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2014	2013	2014	2013

Net sales, excluding acquisitions and the effect of currency translation	\$ 2,240	\$ 2,149	\$ 4,190	\$ 4,025

North American net sales were positively impacted by increased sales volume of plumbing products, installation and other services, paints and stains, windows and builders hardware, which, in the aggregate, increased North American sales by six percent and five percent for the three-month and six-month periods ended June 30, 2014, respectively, from the comparable periods of 2013. Net sales were also positively affected by net selling price increases, primarily related to cabinets, installation and other services and windows, which increased sales by two percent for both the three-month and six-month periods ended June 30, 2014, respectively, from the comparable periods of 2013. Such increases were offset by lower sales volume and a less favorable product mix of cabinets and lower selling prices of plumbing products and paints and stains, which, in the aggregate, reduced North American sales by three percent for both the three-month and six-month periods ended June 30, 2014 from the comparable period of 2013.

A weaker U.S. dollar increased International net sales by seven percent and five percent in the three-month and six-month periods ended June 30, 2014, respectively, compared to the same periods of 2013. In local currencies, net sales from International operations increased two percent and five percent for the three-month and six-month periods ended June 30, 2014 primarily due to increased sales volume of International cabinets and plumbing products and selling price increases for International plumbing products.

Table of Contents

Net sales of Cabinets and Related Products decreased for the three-month and six-months periods ended June 30, 2014 due to lower sales volume and a less favorable product mix of North American cabinets, which more than offset increased sales volume of International cabinets and increased selling prices of North American cabinets. A weaker U.S. dollar increased sales in this segment by one percent in the six-month period ended June 30, 2014 from the comparable period of 2013.

Net sales of Plumbing Products increased due to increased sales volume of both North American and International operations, which, on a combined basis, increased sales by four percent for both the three-month and six-month periods ended June 30, 2014, from the comparable periods of 2013. A weaker U.S. dollar increased sales by two percent and one percent in the three-month and six-month periods ended June 30, 2014, respectively, from the comparable period of 2013. This segment was also positively affected by a more favorable mix.

Net sales of Installation and Other Services increased for the three-month and six-month periods ended June 30, 2014, compared to the same periods of 2013, primarily due to increased sales volume related to a higher level of activity in new home construction, as well as increased volume of distribution and commercial sales. Net sales in this segment were also positively affected by increased selling prices. Such increases were partially offset by a less favorable product mix.

Net sales of Decorative Architectural Products increased for the three-month and six-month periods ended June 30, 2014, compared to the same periods of 2013, due to increased sales volume of paints and stains due to new product introductions and other growth initiatives and builders hardware, partially offset by lower selling prices of paints and stains and costs for promotions.

Net sales of Other Specialty Products increased for the three-month and six-month periods ended June 30, 2014 due to a more favorable product mix, increased sales volume and increased selling prices of North American windows in the Western U.S., which in the aggregate increased sales in this segment by eight percent in both periods from the comparable periods of 2013. A weaker U.S. dollar increased sales by two percent in both the three-month and six-month periods ended June 30, 2014, compared to 2013.

OPERATING MARGINS

Our gross profit margins were 29.2 percent and 28.6 percent for the three-month and six-month periods ended June 30, 2014, respectively, compared with 28.3 percent and 27.8 percent for the comparable periods of 2013. Selling, general and administrative expenses, as a percentage of sales, were 18.6 percent and 19.3 percent for the three-month and six-month periods ended June 30, 2014, respectively, compared to 19.6 percent and 19.8 percent, respectively, for the comparable periods of 2013.

Gross profit margins for the three-month and six-month periods ended June 30, 2014 were positively affected by increased sales volume and lower business rationalization costs, as well as a more favorable relationship between selling prices and commodity costs and the benefits associated with business rationalization activities and other cost savings initiatives.

Table of Contents

We have been focused on the strategic rationalization of our businesses, including business consolidations, plant closures, headcount reductions and other initiatives. Operating profit for the three-month and six-month periods ended June 30, 2014 includes \$9 million and \$14 million, respectively, of costs and charges related to our business rationalizations and other initiatives, including \$7 million in both periods of severance related to corporate office. We anticipate that full-year 2014 rationalization charges for the entire Company will aggregate approximately \$18 million compared to our previous estimate of \$10 million. The increase in our full-year estimate is due to actions taken at our corporate office in the second quarter of 2014. We continue to evaluate our business processes, which may result in additional rationalization charges.

For the three-month and six-month periods ended June 30, 2013, we incurred costs and charges of \$18 million and \$26 million, respectively, related to these initiatives.

Operating margins in the Cabinets and Related Products segment for the three-month and six-month periods ended June 30, 2014 were negatively affected by lower North American sales volume and the related under-absorption of fixed costs, as well as a less favorable product mix of North American cabinets. Such declines more than offset a more favorable relationship between selling prices and commodity costs and the benefits associated with business rationalization activities and other cost savings initiatives.

Operating margins in the Plumbing Products segment for the three-month and six-month periods ended June 30, 2014 were positively impacted by increased sales volume, lower commodity costs, a more favorable product mix and the benefits associated with business rationalization activities and other cost savings initiatives.

Operating margins in the Installation and Other Services segment for the three-month and six-month periods ended June 30, 2014 were positively impacted by increased sales volume and the related absorption of fixed costs, a more favorable relationship between selling prices and commodity costs and the benefits associated with business rationalization activities and other cost savings initiatives.

Operating margins in the Decorative Architectural Products segment for the three-month period ended June 30, 2014 were positively affected by increased sales volume, the timing of advertising costs and the benefits associated with business rationalization activities and other cost savings initiatives, which offset an unfavorable relationship between selling prices and commodity costs, a less favorable product mix and costs for new product introductions and promotions. Operating margins in this segment for the six-month period ended June 30, 2014 were negatively affected by an unfavorable relationship between selling prices and commodity costs and increased advertising costs, as well as a less favorable product mix, partially offset by increased sales volume.

Operating margins in the Other Specialty Products segment for the three-month and six-month periods ended June 30, 2014 reflect a more favorable product mix, a more favorable relationship between selling prices and commodity costs, lower business rationalization costs and increased sales volume. Such improvements to operating margins were partially offset by increased expenses related to ERP system implementation.

OTHER INCOME (EXPENSE), NET

Interest expense for the three-month and six-month periods ended June 30, 2014 decreased \$4 million and \$8 million, respectively, from the comparable periods of 2013 primarily due to the repurchase and retirement of \$200 million of 7.125% Notes on August 15, 2013, the scheduled retirement date.

Other, net, for the three-month and six-month periods ended June 30, 2014 included gains of \$3 million and \$4 million, respectively, related to distributions from private equity funds. Other, net, for the six-month period ended June 30, 2014 included a loss of \$2 million from equity investments.

Other, net, for the three-month and six-month periods ended June 30, 2013 included gains of \$4 million and \$7 million, respectively, related to distributions from private equity funds. Other, net, for the six-month period ended June 30, 2013 included income from equity investments of \$7 million.

INCOME PER COMMON SHARE FROM CONTINUING OPERATIONS **Attributable to Masco Corporation**

Income for the three-month and six-month periods ended June 30, 2014 was \$140 million and \$216 million compared with \$83 million and \$145 million for the comparable periods of 2013. Diluted earnings per common share for the three-month and six-month periods ended June 30, 2014 was \$.39 per common share and \$.60 per common share, respectively, compared with \$.23 per common share and \$.40 per common share, respectively, for the comparable period of 2013.

Our effective tax rate of 19 percent and 15 percent for the three months and six months ended June 30, 2014, respectively, is lower than our normalized tax rate of 36 percent, primarily due to the decrease in the valuation allowance resulting from the partial utilization of our U.S. Federal net operating loss carryforward and from a \$19 million tax benefit primarily from a state tax benefit on uncertain tax positions due to the expiration of applicable statutes of limitations in various states.

Our effective tax rate of 30 percent and 24 percent for the three months and six months ended June 30, 2013, respectively, is lower than our normalized tax rate of 36 percent, primarily due to the decrease in the valuation allowance resulting from the partial utilization of our U.S. Federal net operating loss carryforward and from a \$11 million state income tax benefit on uncertain tax positions primarily due to the expiration of applicable statutes of limitations in various states.

A return to sustainable profitability in the U.S. is required before we would change our judgment regarding the need for a valuation allowance against our deferred tax assets. It is reasonably possible that the continued improvements in our U.S. operations could result in the objective positive evidence necessary to warrant the reversal of all or a portion of the valuation allowance, up to approximately \$550 million, as early as the second half of 2014. Until such time, the profits from our U.S. operations will be offset by the net operating loss carryforward resulting in a lower U.S. effective tax rate.

OTHER FINANCIAL INFORMATION

Our current ratio was 1.5 to 1 and 1.9 to 1 at June 30, 2014 and December 31, 2013, respectively. The decrease in the current ratio is due to classification of \$500 million of 4.8% Notes due June 2015 to Short-term Notes Payable.

Table of Contents

For the six months ended June 30, 2014, cash of \$61 million was provided by operating activities. First half 2014 and 2013 cash from operations was affected by an expected and annually recurring seasonal first half increase in accounts receivable and inventories compared with December 31, 2013.

For the six months ended June 30, 2014, net cash used for financing activities was \$125 million and included \$54 million for the payment of cash dividends and \$39 million for the acquisition of Company common stock in open-market transactions to offset the dilutive impact of long-term stock awards granted in 2014. Net cash provided by investing activities was \$40 million, including net proceeds from the sale of fixed assets of \$8 million and net proceeds from the sale of short-term bank cash deposits of \$91 million, partially offset by \$54 million for capital expenditures.

Our cash, cash investments and short-term bank deposits were \$1.4 billion and \$1.5 billion at June 30, 2014 and December 31, 2013, respectively. Our cash and cash investments consist of overnight interest bearing money market demand and time deposit accounts, money market mutual funds and government securities. Our short-term bank deposits consist of time deposits with maturities of 12 months or less.

Of the \$1.4 billion and the \$1.5 billion of cash, cash investments and short-term bank deposits held at June 30, 2014 and December 31, 2013, \$620 million and \$622 million, respectively, is held in foreign subsidiaries. If these funds were needed for our operations in the U.S., their repatriation into the U.S. may result in additional U.S. income taxes or foreign withholding taxes. The amount of such taxes is dependent on the income tax laws and circumstances at the time of distribution.

On March 28, 2013, the Company entered into a credit agreement (the "Credit Agreement") with a bank group, with an aggregate commitment of \$1.25 billion and a maturity date of March 28, 2018. See Note H to the financial statements.

Based on the debt to total capitalization covenant in the Credit Agreement, at June 30, 2014, the Company had additional borrowing capacity, subject to availability, of up to \$1.2 billion. Additionally, at June 30, 2014, the Company could absorb a reduction to shareholders' equity of approximately \$897 million and remain in compliance with the debt to total capitalization covenant.

We were in compliance with all covenants and had no borrowings under our credit agreement at June 30, 2014.

We believe that our present cash balance, cash flows from operations and, to the extent necessary, bank borrowings and future financial market activities, are sufficient to fund our working capital and other investment needs.

OUTLOOK FOR THE COMPANY

Edgar Filing: MASCO CORP /DE/ - Form 10-Q

We are making progress on our 2014 strategic priorities, which include growing share of our market-leading brands, accelerating customer-focused innovation pipeline, further penetrating international markets and driving operational leverage through our focus on cost containment. We believe that new home construction will show continued growth in 2014 and that repair and remodel activity will grow modestly, and big ticket items will continue to show improvement. We also expect the positive trend of the European economic recovery to continue.

Table of Contents

We believe that new home construction and repair and remodel activity will show steady growth in 2014. We are well positioned to grow our key brands and to gain market share in this environment. We remain committed to realizing the full potential of our core businesses, leveraging opportunities across our portfolio and actively managing the portfolio to drive long-term shareholder value.

FORWARD-LOOKING STATEMENTS

Statements contained in this report that reflect our views about our future performance constitute forward-looking statements under the Private Securities Litigation Reform Act of 1995. Forward-looking statements can be identified by words such as believe, anticipate, appear, may, will, should, intend, plan, estimate, expect, assume, seek, forecast, and similar references to future periods. These views involve risks and uncertainties that are difficult to predict and, accordingly, our actual results may differ materially from the results discussed in our forward-looking statements. We caution you against relying on any of these forward-looking statements. Our future performance may be affected by our reliance on new home construction and home improvement, our reliance on key customers, the cost and availability of raw materials, uncertainty in the international economy, shifts in consumer preferences and purchasing practices, our ability to improve our underperforming businesses, and our ability to maintain our competitive position in our industries. These and other factors are discussed in detail in Item 1A, Risk Factors in our most recent Annual Report on Form 10-K, as well as in other filings we make with the Securities and Exchange Commission. Our forward-looking statements in this report speak only as of the date of this report. Factors or events that could cause our actual results to differ may emerge from time to time, and it is not possible for us to predict all of them.
