## Management Comment

Rafi Amit Camtek's CEO commented, "We are proud to present a very strong start to 2018, ending the quarter with record backlog. Our financials have improved across the board, and we demonstrated strong operating and net margins. Our focus on the fastest growing segments of the semiconductors industry is paying off. We are seeing strong order momentum, especially for our newest and latest generation systems. This high level of demand for our products is broad, spanning all the regions in which we operate."

Continued Mr. Amit, "Earlier in the year we announced an order for multiple systems for front-end 2D Macro Inspection from a major Chinese manufacturer. This is in line with our strategy to penetrate new market segments such as macro inspection and special 2D applications, providing us with additional growth drivers. All this underlies our expectations of a strong year of growth and improved profitability. Our cash generation and strong balance sheet position us very well, enabling us to share the rewards of our growth with our shareholders, as well as providing us with an ability to capitalize on internal potential growth opportunities."

The financial results and the comparison to 2017 in this press release include only those of the continuing operations.
