FDA publishes documents

FDA publishes ACAM2000 Advisory Committee briefing documents and questions

Cambridge, UK and Cambridge, Massachusetts - 15 May 2007 - Acambis plc (Acambis)
(LSE: ACM) announces that the ACAM2000-related briefing documents for the
Vaccines and Related Biological Products Advisory Committee scheduled for
Thursday, 17 May are now accessible via the US Food and Drug Administration's
(FDA) website.

Briefing documents have been provided by the FDA and Acambis. The documents
include details of the safety and efficacy data generated by Acambis through its
clinical development programme.

This information can be accessed at <http://www.fda.gov/ohrms/dockets/ac/07/>

Edgar Filing: ACAMBIS PLC - Form 6-K

briefing/2007-4292B2-00-index.htm.

Acambis developed ACAM2000 under contracts with the US Centers for Disease Control and Prevention in response to the US Government's need for a stockpile of smallpox vaccine to counter the threat of smallpox being used as a biological weapon. To date, Acambis has supplied 192.5 million doses of ACAM2000 to the US 's Strategic National Stockpile under an FDA Investigational New Drug application.

About Acambis

Acambis is a leading biotechnology company targeting infectious diseases with novel vaccines. Acambis' development-stage pipeline includes vaccines that could either offer improvements over existing products or target unmet medical needs. ChimeriVax-JE, Acambis' most advanced product in the non-biodefence pipeline, has to date shown an excellent safety and efficacy profile following pivotal Phase 3 trials. It is currently undergoing paediatric trials in India and is partnered with sanofi pasteur and Bharat Biotech. Acambis' proprietary ChimeriVax technology, developed in association with St Louis University, has also been used to develop ChimeriVax-West Nile, which is undergoing Phase 2 clinical testing, making it the most advanced investigational vaccine against the West Nile virus. Acambis also has the only vaccine in development against Clostridium difficile bacteria, a leading cause of hospital-acquired infections. Recognised internationally as the leading producer of smallpox vaccines, Acambis is developing an investigational smallpox vaccine, ACAM2000, and is manufacturing emergency-use stockpiles of this investigational vaccine for the US Government and other governments around the world.

Acambis is based in Cambridge, UK and Cambridge, Massachusetts, US, and is listed on the London Stock Exchange (ACM). More information is available at www.acambis.com.

"Safe Harbor" statement under the Private Securities Litigation Reform Act of 1995:

The statements in this news release that are not historical facts are forward-looking statements that involve risks and uncertainties, including the timing and results of clinical trials, product development, manufacturing and commercialisation risks, the risks of satisfying the regulatory approval process in a timely manner, the need for and the availability of additional capital. For a discussion of these and other risks and uncertainties see relevant risk sections in the Company's latest Annual Report and Form 20-F, in addition to those detailed on the Company's website and in the Company's filings made with the Securities and Exchange Commission from time to time. These forward-looking statements are based on estimates and assumptions made by the management of Acambis and are believed to be reasonable, though are inherently uncertain and
