I. Highlights of Consolidated Financial Results for the Three-Month Period Ended June 30, 2008

Consolidated financial statements for the three month period ended June 30, 2008 and the corresponding three month period of the previous year are not audited by auditors.

1. Summary of Financial Results for the Three-Month Period Ended June 30, 2008

(1) Operating Results

Mitsui & Co., Ltd. (Mitsui) and its subsidiaries (collectively the Group) posted consolidated net income of ¥103.1 billion, a decrease of ¥77.9 billion, or down 43.0 %, from ¥181.0 billion for the corresponding three month period of the previous year. Major developments during the periods were:

Substantial one-off gains on sale of securities and divestitures in the three month period of the previous year amounting to approximately ¥84 billion (after tax) including sales of the Group's stakes in mineral resources and energy businesses, such as Sesa Goa Limited in India, Sakhalin II in Russia and EBM(*1) in Brazil as well as gains on sale of aircraft held by Tombo Aviation (United States).

Increases in gross profit, equity in earnings of associated companies and dividend income of mineral resources and energy producing businesses all reflecting the continued run-up in prices of related commodities(*2) in the current year. On the other hand, the Consumer Service & IT Segment recorded a downturn chiefly from write downs on inventories in residential home business in Japan. In addition, the Chemical Segment also recognized impairment loss on domestic listed securities.

(*1) Empreendimentos Brasileiros de Mineração S.A.

(*2) Due to the difference in accounting periods as well as time-lag issues, the impact of various run-ups in prices of internationally traded commodities such as iron ore, coal and oil has not been fully reflected in the three month period ended June 30, 2008. Such impact will be reflected in the next three months period.

(2) Financial Condition

Total assets as of June 30, 2008 were ¥10.3 trillion, an increase of ¥0.7 trillion from ¥9.6 trillion as of March 31, 2008. Investments and plant, property and equipment (PPE) increased by ¥0.3 trillion mainly due to higher stock prices on Japanese stock exchanges as well as net improvement in foreign currency translation adjustments due to the weaker Japanese Yen against Australian Dollar, U.S. Dollar and Brazilian Real. In addition, various capital expenditures for the expansions made by the Mineral & Metal Resources and the Energy segments also contributed to the increase. Higher commodity prices resulted in an increase of ¥0.4 trillion in the current assets. Shareholders equity as of June 30, 2008 was ¥2.4 trillion, an increase of ¥0.2 trillion from ¥2.2 trillion as of March 31, 2008, as a result of increased retained earnings, higher stock prices and Japanese yen depreciation, and Net Debt-to-Equity Ratio (Net DER) as of June, 2008 was 1.21 times, 0.06 points lower than that of March 31, 2008.

(3) Cash Flow Statement

Reflecting net increase of ¥97.5 billion of operating assets and liabilities including increased inventories at Westport Petroleum, Inc. net cash provided by operating activities for the three month period ended June 30, 2008 was ¥30.7 billion despite the steady growth of operating income. Net cash used in investing activities for the three month period ended June 30, 2008 was ¥80.8 billion due mainly to expansion expenditures of natural resources in the Mineral & Metal Resources and the Energy Segments. As a result, free cash flow(*1) for the three-month period ended June 30, 2008 was a net outflow of ¥50.1 billion.

2. Results of Operations**(1) Analysis on consolidated income statements***Gross Profit*

Gross profit for the three month period ended June 30, 2008 was ¥275.0 billion, an increase of ¥38.6 billion, or 16.3%, from ¥236.4 billion for the corresponding three month period of the previous year as a result of the following:

The Energy Segment reported an increase of ¥25.2 billion in gross profit. This increase is attributable to solid performance by the oil & gas producing businesses and Mitsui Coal Holdings Pty. Ltd. (Australia), reflecting continued run-up in mineral resource prices and additional energy equity production.

The Mineral & Metal Resources Segment also reported an increase of ¥20.0 billion in gross profit. Reflecting higher iron ore prices Mitsui Iron Ore Development Pty. Ltd. (Australia) reported an increase of ¥16.5 billion.

Automotive and other machinery businesses; and basic materials such as steel products and chemical products continued to show good performance carrying over last year's positive trend into this fiscal year.

The Consumer Service & IT Segment reported a decrease in gross profit due to write downs on inventories in the domestic residential home business as well as a slowdown in other business areas.

Major factors of the increase are related to the increase in minority interest at Novus International, Inc. (United States) and Japan Collahuasi Resources B.V. (Netherlands), an investment vehicle of Compania Minera Dona Ines de Collahuasi SCM (Chile), a copper mining company.

Equity in Earnings of Associated Companies Net

Equity in earnings of associated companies net (after income tax effect) for the three month period ended June 30, 2008 was ¥44.6 billion, an increase of ¥8.1 billion from ¥36.5 billion for the corresponding three month period of the previous year as a result of followings:

Increase in earnings at Robe River Mining Company (Australia) reflecting an increase in iron ore prices.

Increase in earnings at Compania Minera Dona Ines de Collahuasi SCM (Chile), reflecting an increase in copper prices and additional production.

Reversal effect of IPM Eagle LLP (United Kingdom) which recorded a mark-to-market evaluation loss on long-term swap agreement at their overseas power generating operation for the corresponding three month period of the previous year.

Valepar S.A. (Brazil) posted a decrease, reflecting a reduction in earnings at Companhia Vale do Rio Doce (Vale) mainly due to a drop in nickel price as well as appreciation of Brazilian Real against U.S. Dollar. Impact of the settlement of iron ore contract price negotiation for the current fiscal year is not substantially reflected in the three month period ended June 30, 2008 due to a three-month time lag in consolidating its earnings into our operating results.

Income from Discontinued Operations Net

Income from discontinued operations net (after income tax effect) for the three month period ended June 30, 2008 was nil, a decrease from ¥59.9 billion for the corresponding three month period of the previous year. The operating segment information for the three month period ended June 30, 2007 has been restated to conform to the current year presentation.

From the Machinery & Infrastructure Projects segment :

Mitsui Automotoriz S.A. (Peru), Road Machinery LLC (United States), Ellison Technologies Inc.(United States)

From the Chemical Segment :

Novus International, Inc.(*1), Fertilizantes Mitsui S.A. Industria e Comercio (Brazil)

(*1) Novus International, Inc. was transferred in the 4th quarter of the fiscal year ended March 31, 2008.

Iron & Steel Products Segment

Gross profit for the three month period ended June 30, 2008 was ¥17.7 billion, an increase of ¥2.0 billion from ¥15.7 billion for the corresponding three month period of the previous year. Supported by continued favorable demand, foreign trading transactions, including those of Regency Steel Asia Pte Ltd. (Singapore) to Asian markets, of various products such as steel sheets and plates for automobiles and shipbuilding, steel tubular products and line pipes for oil and gas development recorded solid performance. Furthermore, domestic sales of steel products were robust under tight market condition and contributed to the increase in earnings as well.

Operating income for the three month period ended June 30, 2008 was ¥ 9.0 billion, an increase of ¥1.9 billion from ¥7.1 billion for the corresponding three month period of the previous year reflecting the increase in gross profit.

Equity in earnings of associated companies for the three month period ended June 30, 2008 was ¥0.9 billion, a decrease of ¥0.3 billion from ¥1.2 billion for the corresponding three month period of the previous year. Net income for the three month period ended June 30, 2008 was ¥5.8 billion, a ¥0.1 billion decrease from ¥5.9 billion for the corresponding three month period of the previous year.

Mineral & Metal Resources Segment

Gross profit for the three month period ended June 30, 2008 was ¥41.0 billion, an increase of ¥20.0 billion from ¥21.0 billion for the corresponding three month period of the previous year.

The main factor contributing to the increase was the price increase at iron ore mining operations. Reflecting tight supply and demand balance in Asia, especially in China and India, iron ore prices for the year ending March 31, 2009 increased substantially from the year ended March 31, 2008. Following the settlement of Brazilian iron ore fines with increases by 65~71% in February 2008, Australian iron ore lump and fines prices were settled with an increase by 96.5% and 79.9% respectively between June and July 2008. FOB prices of Brazilian iron ore and Australian iron ore had been the same level as a customary practice in this industry up to the year ended March 31, 2008. However, Australian iron ore producers insisted that different price be applied, reflecting ocean freight difference between Australia and Brazil to major steel making countries, China and Japan. Consequently increase in gross profit recorded by Mitsui Iron Ore Development (Australia) was ¥16.5 billion. Part of the price increase achieved is not reflected into the operating results for the three month period ended June 30, 2008, because the final settlement of the price negotiation was delayed until July.

Furthermore, increases in prices of other mineral and metal resources such as iron and steel scrap, ferrous alloy reflecting tight market conditions also contributed to increase in gross profit.

Operating income for the three month period ended June 30, 2008 was ¥ 37.7 billion, an increase of ¥21.0 billion from ¥16.7 billion for the corresponding three month period of the previous year, reflecting increase in gross profit.

Equity in earnings of associated companies for the three month period ended June 30, 2008 was ¥20.3 billion, an increase of ¥6.3 billion from ¥14.0 billion for the corresponding three month period of the previous year. Major factors were as follows:

Earnings at Robe River Mining Company (Australia) were ¥6.5 billion, an increase by ¥4.2 billion from ¥2.3 billion for the corresponding three month period of the previous year reflecting increase in the iron ore prices.

Compania Minera Dona Ines de Collahuasi SCM (Chile) recorded earnings of ¥6.6 billion, an increase by ¥3.9 billion from the corresponding three month period of the previous year supported by firm copper price and increased production.

Valepar S.A. (Brazil) posted a decrease of ¥2.0 billion, reflecting a reduction in earnings at Vale mainly due to a drop in nickel prices as well as the appreciation of Brazilian Real against U.S. Dollar. Most of the upwardly revised iron ore contract prices have not been reflected into the earnings for the three month period ended June 30, 2008 due to a lag in consolidating its earnings into our operating results.

Net income for the three month period ended June 30, 2008 was ¥36.4 billion, a large decrease of ¥48.4 billion from ¥84.8 billion for the corresponding three month period of the previous year. Increase in operating income and equity in earnings were offset by a significant rebound effect from gains from divestitures for the three month period ended June 30, 2007 of a ¥93.9 billion on the sale of its whole stake in Sesa Goa Limited(*1) and a ¥12.4 billion gain on the sale of shares in EBM, a Brazilian iron ore company.

(*1) In this Operating Results by Operating Segment, operating results of Sesa Goa have been included in and presented as continuing operation. In the consolidated statement of income, net income of Sesa Goa for the corresponding three month period of the previous year is presented as income from discontinued operations (after income tax effect).

Machinery & Infrastructure Projects Segment

Gross profit for the three month period ended June 30, 2008 was ¥28.2 billion, an increase of ¥0.8 billion from ¥27.4 billion for the corresponding three month period of the previous year.

Overseas automotive-related and construction machinery subsidiaries continued to show steady performance, particularly a motorcycle retail finance company P.T. Bussan Auto Finance (Indonesia) as well as subsidiaries in Russia and other regions all reporting higher gross profit.

Reflecting strong demand, ocean vessels and marine project businesses showed overall strong performance through marketing commercial vessels, trading in used vessels, operating and chartering vessels, and owning or leasing special energy-related vessels.

In infrastructure projects business fields, plant business recorded a downturn in gross profit. Operations of rolling stock leasing subsidiaries in Europe and Americas also reported declines in gross profit.

Operating income for the three month period ended June 30, 2008 was ¥ 6.0 billion, a decrease of ¥1.0 billion from ¥7.0 billion for the corresponding three month period of the previous year. The decrease is primarily attributable to the decrease in gross profit and an increase in selling, general and administrative expenses in infrastructure projects business field. Operating income of automotive and marine business related subsidiaries increased in general, partially offset by an increase in selling, general and administrative expenses.

Equity in earnings of associated companies for the three month period ended June 30, 2008 was ¥9.7 billion, an increase of ¥4.5 billion from ¥5.2 billion for the corresponding three month period of the previous year. Overseas power producing businesses such as IPM Eagle LLP and P.T. Paiton Energy (Indonesia) reported equity in earnings of ¥4.2 billion in total, an increase of ¥3.4 billion from ¥0.8 billion earnings for the corresponding three month period of the previous year. The major factor of this increase is reversal effect (rebound effect) of IPM Eagle LLP which recorded a mark-to-market evaluation loss on long-term swap agreement at their Australian power generating operations for the corresponding three month period of the previous year.

Net income for the three month period ended June 30, 2008 was ¥15.9 billion, an increase of ¥2.3 billion from ¥13.6 billion for the corresponding three month period of the previous year. In addition to the above-mentioned factors, this segment recorded a gain of ¥5.5 billion (*1) on the sale of leased aircraft for the corresponding three month period of the previous year.

(*1) In this Operating Results by Operating Segment, the gain on the sale of aircraft has been included in and presented as continuing operation. In the consolidated statement of income, the gain on the sale for the corresponding three month period of the previous year is presented as income from discontinued operations (after income tax effect).

Chemical Segment

Gross profit was ¥27.5 billion, an increase of ¥0.5 billion from ¥27.0 billion for the corresponding three month period of the previous year. The principal developments in this segment were as follows:

Basic petrochemicals fields ranging from basic materials to mid-stream intermediate products recorded a slight decline in total. While P.T. Kaltim Pasifik Amoniak (Indonesia), a joint venture manufacturing and marketing company of ammonia recorded an increase in gross profit due to higher price and an increase in sales volume, business of aromatics such as xylene recorded a decrease in gross profit due to a sharp decrease in margins following a rapid cost increase of raw material naphtha.

Supported by a globally strong demand for agriculture products, businesses of crop protection chemicals and fertilizer as well as sulphur and sulfuric acid, raw materials of fertilizer, remained robust.

Operating income for the three month period ended June 30, 2008 was ¥13.5 billion, an increase of ¥1.0 billion from ¥12.5 billion for the corresponding three month period of the previous year, reflecting increase in gross profit.

Equity in earnings of associated companies for the three month period ended June 30, 2008 was ¥2.3 billion, an increase of ¥0.4 billion from ¥1.9 billion for the corresponding three month period of the previous year, mainly due to the contribution of International Methanol Company (Saudi Arabia), a joint venture methanol manufacturing company.

Net income for the three month period ended June 30, 2008 was ¥1.5 billion, a decrease of ¥5.6 billion from ¥7.1 billion for the corresponding three month period of the previous year, despite a small improvement as above. This segment recorded a ¥8.1 billion impairment loss on shares of Mitsui Chemicals, Inc.

Energy Segment

Japan Crude Cocktail (JCC) continued to rise since April 2007, reflecting strong demand and an influx of speculative money into the future markets and reached US\$121.83 (preliminary figure) per barrel in June 2008.

The JCC price, which has been reflected in revenues of the Mitsui's oil and gas producing subsidiaries and associated companies, was US\$94 per barrel in average for the three month period ended June 30, 2008 compared to US\$60 per barrel for the corresponding three month period of the previous year.

Gross profit for the three month period ended June 30, 2008 was ¥75.0 billion, an increase of ¥25.2 billion from ¥49.8 billion for the corresponding three month period of the previous year primarily due to the following:

(*)Net Debt-to-Equity Ratio

We refer to Net Debt-to-Equity Ratio (Net DER) in this flash report. Net DER is comprised of net interest bearing debt divided by shareholders equity.

Net interest bearing debt is defined as interest bearing debt less cash and cash equivalents and time deposits. Our interest bearing debt primarily consists of long term debt, less current maturities, which are not readily repayable. In order to flexibly meet capital requirements and to prepare for future debt-service requirements in case of unforeseen deteriorations in financial markets, currently we hold a relatively high level of cash and cash equivalents reflecting the current financial market conditions and future capital requirements.

Under this policy, Net DER is a useful internal measure for our management to review the balance between:

our capacity to meet debt repayments; and

leverage to improve return on equity in our capital structure.

This measure does not recognize the fact that cash and cash equivalents and time deposits may not be available completely for debt repayments, but cash and cash equivalents and time deposits may be required for operational needs including certain contractual obligations or capital expenditure.
