Summary

We expect financial market volatility and economic uncertainty to continue in the short-term

However, China, India and other developing economies

are expected to continue to drive demand for commodities in the long-term

Our uniquely diversified portfolio of low cost and high quality assets places us at a competitive advantage in the current uncertain environment

Our strong cash flow and balance sheet allows us to re-invest throughout the cycle

Future production growth 6.9% is expected to be delivered from lower risk projects and high margin products

BHP Billiton is working towards completing the regulatory review process for the Rio Tinto offer by around the end of 2008

BHP Billiton believes this offer is compelling for Rio Tinto shareholders, and value enhancing for BHP Billiton shareholders
