NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the Three Month Periods Ended January 30, 2009 and February 1, 2008

1. The consolidated balance sheet as of January 30, 2009, the consolidated statement of operations for the three month periods ended January 30, 2009, and February 1, 2008, and the consolidated statement of cash flows for the three month periods ended January 30, 2009, and February 1, 2008, are unaudited but, in the opinion of management, all of the necessary adjustments, consisting of normal recurring accruals, have been made to present fairly the financial statements referred to above in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, the above statements do not include all of the footnotes required for complete financial statements. The results of operations and cash flows for the interim periods presented are not necessarily indicative of results that can be expected for the full year.
2. The notes to the consolidated financial statements in the Company's Annual Report on Form 10-K for the fiscal year ended October 31, 2008, provide a summary of significant accounting policies and additional financial information that should be read in conjunction with this Form 10-Q.
3. The timing of the Company's revenues is impacted by the purchasing patterns of customers and, as a result, revenues are not generated evenly throughout the year. Moreover, the Company's first fiscal quarter, November through January, includes significant holiday periods in both Europe and North America. The first fiscal quarter of 2009 contained 13 weeks, while the first fiscal quarter of 2008 contained 14 weeks.
4. Basic earnings per share is computed on the basis of the weighted average number of shares outstanding during the year. Diluted earnings per share includes the dilutive effect of stock options. Common shares issuable from stock options that are excluded from the calculation of diluted earnings per share because they were anti-dilutive were 1,250,960 and 283,392 in the first fiscal quarter of 2009 and 2008, respectively. Shares used for calculating earnings per share are disclosed in the following table.

(In thousands)

	Three Months Ended	
	January 30, 2009	February 1, 2008
Shares Used for Basic Earnings Per Share	29,664	29,386
Shares Used for Diluted Earnings Per Share	29,865	29,811

5. Recent Accounting Pronouncements

On December 4, 2007, the Financial Accounting Standards Board issued Financial Accounting Standard No. 141(R), Business Combinations, (Statement No. 141(R)) and

Statement No. 160, Accounting and Reporting of Non-controlling Interest in Consolidated Financial Statements, an amendment of ARB No. 51, (Statement No. 160). These new standards will significantly change the accounting for and reporting of business combination transactions and non-controlling (minority) interests in consolidated financial statements. Statement No. 141(R) and Statement No. 160 are required to be adopted simultaneously and are effective for fiscal 2010.

The significant changes in the accounting for business combination transactions under Statement No. 141(R) include the following:

Recognize, with certain exceptions, 100% of the fair values of assets acquired, liabilities assumed, and non-controlling interests of acquired businesses.

Measure all acquirer shares issued in consideration for a business combination at fair value on the acquisition date. With the effectiveness of Statement No. 141(R), the agreement and announcement date measurement principles in EITF Issue 99-12 will be nullified.

Recognize contingent consideration arrangements at their acquisition-date fair values, with subsequent changes in fair value generally reflected in earnings.

With the one exception described in the last sentence of this section, recognize pre-acquisition gain and loss contingencies at their acquisition-date fair values. Subsequent accounting for pre-acquisition loss contingencies is based on the greater of acquisition-date fair value or the amount calculated pursuant to FASB Statement No. 5, Accounting for Contingencies, (Statement No. 5). Subsequent accounting for pre-acquisition gain contingencies is based on the lesser of acquisition-date fair value or the best estimate of the future settlement amount. Adjustments after the acquisition date are made only upon the receipt of new information on the possible outcome of the contingency, and changes to the measurement of pre-acquisition contingencies are recognized in ongoing results of operations. Absent new information, no adjustments to the acquisition-date fair value are made until the contingency is resolved. Pre-acquisition contingencies that are both (1) non-contractual and (2) as of the acquisition date are not more likely than not of materializing are not recognized in acquisition accounting and, instead, are accounted for based on the guidance in Statement No. 5, Accounting for Contingencies.

Capitalize in-process research and development (IPR&D) assets acquired at acquisition date fair value. After acquisition, apply the indefinite-lived impairment model (lower of basis or fair value) through the development period to capitalized IPR&D without amortization. Charge development costs incurred after acquisition to results of operations. Upon completion of a successful development project, assign an estimated useful life to the amount then capitalized, amortize over that life, and consider the asset a definite-lived asset for impairment accounting purposes.

Recognize acquisition-related transaction costs as an expense when incurred.

Recognize acquisition-related restructuring cost accruals in acquisition accounting only if the criteria in Statement No. 146 are met as of the acquisition date. With the effectiveness of Statement No. 141(R), the EITF Issue 95-3 concepts of assessing, formulating, finalizing and committing/communicating that currently pertain to recognition in purchase accounting of an acquisition-related restructuring plan will be nullified.

Recognize changes in the acquirer's income tax valuation allowance resulting from the business combination separately from the business combination as adjustments to income tax expense. Also, changes after the acquisition date in an acquired entity's valuation allowance or tax uncertainty established at the acquisition date are accounted for as adjustments to income tax expense.

The Company is currently evaluating the impact of Statement No. 141(R) and Statement No. 160 on the Company's financial statements.

6. The Company's comprehensive income is as follows:

(In thousands)	Three Months Ended	
	January 30, 2009	February 1, 2008
Net Earnings	\$ 26,943	\$ 30,984
Change in Fair Value of Derivative Financial Instruments, Net of Tax (Expense) Benefit of \$(331) and \$981	525	(1,796)
Adjustment for Minimum Pension Liability, Net of Tax (Expense) Benefit of \$(182) and \$34	424	(70)
Foreign Currency Translation Adjustment	(27,055)	(23,458)
Comprehensive Income	\$ 837	\$ 5,660

7. On December 15, 2008, the Company acquired all of the outstanding capital stock of NMC Group, Inc. (NMC) for approximately \$89.8 million in cash, including acquisition costs. NMC designs and manufactures specialized light-weight fasteners principally for commercial aviation applications. The acquisition expands the scale of the Company's existing advanced materials business. NMC is included in the Advanced Materials segment. The following summarizes the estimated fair value of the assets acquired and liabilities assumed at the date of acquisition. The allocation of the purchase price was based upon a preliminary valuation analysis. The Company has not finalized the allocation of the purchase price to tangible and intangible assets and tax basis of acquired assets and liabilities. The Company recorded goodwill of \$38.4 million. The amount allocated to goodwill is expected to be deductible for income tax purposes.

(In thousands)

As of December 15, 2008

Current assets	\$ 7,945
Property, plant and equipment	3,246
Intangible assets subject to amortization	
Programs (15 year weighted average useful life)	41,590
Goodwill	38,416
Other assets	19
 Total assets acquired	 91,216
 Current liabilities assumed	 1,371
 Net assets acquired	 \$ 89,845

On January 26, 2009, the Company acquired all of the outstanding capital stock of Racal Acoustics Global Ltd. (Racal) for approximately £117.7 million or \$164.5 million in cash, including acquisition costs. Racal develops and manufactures high technology ruggedized personal communication equipment for the defense and avionics segment. The acquisition expands the scale of the Company's existing avionics and controls business. Racal is included in the Avionics & Controls segment.

The following summarizes the estimated fair value of the assets acquired and liabilities assumed at the date of acquisition. The allocation of the purchase price was based upon a preliminary valuation analysis. The Company has not finalized the allocation of the purchase price to tangible and intangible assets and tax basis of acquired assets and liabilities. The Company recorded goodwill of \$109.2 million. The amount allocated to goodwill is not expected to be deductible for income tax purposes.

(In thousands)

As of January 26, 2009

Current assets	\$ 22,836
Property, plant and equipment	1,949
Intangible assets subject to amortization	
Programs (15 year weighted average useful life)	65,798
Goodwill	109,210
Deferred income tax benefit	1,784
 Total assets acquired	 201,577
 Current liabilities assumed	 18,241
Deferred tax liabilities	18,841
 Net assets acquired	 \$ 164,495

8. On November 3, 2008, the Company sold U.K.-based Muirhead Aerospace Limited and Traxsys Input Products Limited, which were included in the Sensors & Systems segment, for approximately U.K. £40.0 million or \$63.4 million, resulting in an after-tax gain of

\$15.5 million. As a result, the consolidated financial statements present Muirhead Aerospace Limited and Traxsys Input Products Limited as a discontinued operation.

The operating results of the discontinued operations for the first quarter of fiscal 2008 and 2009 consisted of the following:

(In thousands)	January 30, 2009	February 1, 2008
Sales	\$	\$ 15,104
Income from discontinued operations before income taxes	26,379	1,655
Income tax expense	10,923	396
Income from discontinued operations	\$ 15,456	\$ 1,259

9. The effective income tax rate for the first fiscal quarter of 2009 was 18.9% (before a \$0.4 million tax benefit) compared with 22.1% (before a \$6.9 million tax benefit) for the prior-year period. The \$0.4 million tax benefit in the first fiscal quarter of 2009 was the result of two events. The first event was a \$2.0 million reduction of previously recorded withholding tax liabilities as a result of the enactment of a U.S.-Canadian tax treaty. The second event was the recording of a \$1.6 million penalty due to a development with regard to certain foreign tax laws. The \$6.9 million tax benefit in the first fiscal quarter of 2008 was the result of two events. The first event was the settlement of an examination of the U.S. federal income tax returns for fiscal years 2003 through 2005, which resulted in a \$2.8 million reduction of previously estimated income tax liabilities. The second event was the enactment of tax laws reducing the Canadian statutory corporate income tax rate, which resulted in a \$4.1 million net reduction of deferred income tax liabilities. The effective tax rate differed from the statutory rate in the first fiscal quarters of 2009 and 2008, as both years benefited from various tax credits and certain foreign interest expense deductions.

In June 2005, the FASB issued FIN 48, which clarifies the accounting for uncertainty in income taxes by establishing a minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. FIN 48 prescribes a comprehensive model for how a company should recognize, derecognize, measure, present, and disclose in its financial statements uncertain tax positions that a company has taken or expects to take on a tax return. In addition, FIN 48 provides guidance on interest and penalties, accounting in interim periods, and transition.

The Company adopted the provisions of FIN 48 effective October 27, 2007. During the first fiscal quarter of 2009, a gross increase of \$17.0 million of unrecognized tax benefits was recorded due to developments with regard to certain foreign tax laws. As this liability represents an acquired tax liability, the recording of the liability resulted in an increase to goodwill. Further, the liability is specifically indemnified pursuant to a stock purchase agreement. As this liability is specifically indemnified pursuant to a stock purchase agreement, a receivable

has been established to reflect the recoverability of the contingent tax. The total amount of unrecognized tax benefits that may decrease based on the reasonably possible resolution of certain tax matters within the next 12 months is \$17.0 million. As this decrease represents an acquired tax liability, the reduction would be offset by a decrease to goodwill.

The Company recognizes interest related to unrecognized tax benefits in income tax expense. During the first fiscal quarter of 2009, a gross increase of \$6.2 million of interest related to unrecognized tax benefits was recorded due to developments with regard to certain foreign tax laws. As this liability is specifically indemnified pursuant to a stock purchase agreement, a receivable has been established to reflect the recoverability of the contingent interest. The total amount of interest related to unrecognized tax benefits that may decrease based on the reasonably possible resolution of certain tax matters within the next 12 months is \$6.2 million. This decrease would be offset by a reduction in a corresponding receivable.

The Company recognizes penalties related to unrecognized tax benefits in income tax expense. During the first fiscal quarter of 2009, a gross increase of \$6.7 million of penalties related to unrecognized tax benefits was recorded due to developments with regard to certain foreign tax laws. As \$5.1 million of this liability is specifically indemnified pursuant to a stock purchase agreement, a receivable has been established to reflect the recoverability of the contingent penalty. The total amount of penalties related to unrecognized tax benefits that may decrease based on the reasonably possible resolution of certain tax matters within the next 12 months is \$6.7 million. The \$5.1 million decrease would be offset by a reduction in a corresponding receivable. The remaining \$1.6 million decrease would reduce the period's tax expense.

The Company and/or one of its subsidiaries files income tax returns in the U. S. federal jurisdiction and various states and foreign jurisdictions. The Company and/or one of its subsidiaries which are no longer subject to income tax examinations by tax authorities in its major tax jurisdictions are as follows:

Tax Jurisdiction	Years No Longer Subject to Audit
U.S. Federal	2005 and prior
Canada	2002 and prior
France	2004 and prior
Germany	2003 and prior
United Kingdom	2003 and prior

- As of January 30, 2009, the Company had two share-based compensation plans – an employee stock purchase plan and an equity incentive plan. The compensation cost that has been charged against income for those plans for the first fiscal quarters of 2009 and 2008 was \$2.0 million and \$1.9 million, respectively. During the first fiscal quarters of 2009 and 2008, the Company issued 52,972 and 41,607 shares, respectively, under its employee stock plans. The Company converted the ESPP to a “safe harbor” design on December 16, 2008. Under

the safe harbor design, shares are purchased by participants at 95% of the market value on the purchase date.

The fair value of the awards under the employee stock purchase plan was estimated using a Black-Scholes pricing model which uses the assumptions noted in the following table.

	Three Months Ended			
	January 30, 2009	February 1, 2008		
Risk-free interest rate (U.S. Treasury zero coupon issues)	3.32%	3.32	5.15%	
Expected dividend yield				
Expected volatility	33.8%	21.4	34.8%	
Expected life (months)	6	6		

Under the equity incentive plan, option exercise prices are equal to the fair market value of the Company's common stock on the date of grant. The Company granted 378,800 options and 329,300 options in the three-month periods ended January 30, 2009 and February 1, 2008, respectively. The weighted-average grant date fair value of options granted during the three-month periods ended January 30, 2009, and February 1, 2008, was \$15.92 per share and \$26.32 per share, respectively.

The fair value of each option granted by the Company was estimated using a Black-Scholes pricing model which uses the assumptions noted in the following table.

	Three Months Ended			
	January 30, 2009		February 1, 2008	
Risk-free interest rate (U.S. Treasury zero coupon issues)	1.43	3.12%	3.65	4.53%
Expected dividend yield				
Expected volatility	36.8	43.1%	36.2	42.9%
Expected life (years)	4.5	9.5	4.5	9.5

11. The Company's pension plans principally include a U.S. pension plan maintained by Esterline and a non-U.S. plan maintained by CMC. Components of periodic pension cost consisted of the following:

(In thousands)	Three Months Ended	
	January 30, 2009	February 1, 2008
Components of Net Periodic Pension Cost		
Service cost	\$ 1,475	\$ 1,801
Interest cost	4,575	4,389
Expected return on plan assets	(3,509)	(5,671)
Amortization of prior service cost		5
Amortization of actuarial loss	998	50
Net Periodic Cost	\$ 3,539	\$ 574

The Company's principal post-retirement plans include non-U.S. plans, which are non-contributory healthcare and life insurance plans. The components of expense of these other retirement benefits consisted of the following:

(In thousands)	Three Months Ended	
	January 30, 2009	February 1, 2008
Components of Net Periodic Pension Cost		
Service cost	\$ 82	\$ 99
Interest cost	161	166
Amortization of actuarial loss	(19)	4
Net Periodic Cost	\$ 224	\$ 269

12. The Company adopted the required portions of Statement of Financial Accounting Standards No. 157, Fair Value Measurements, (Statement No. 157) on November 1, 2008. Statement No. 157 applies to all assets and liabilities that are being measured and reported at fair value. Statement No. 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Statement No. 157 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. An asset or liability's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The hierarchy of fair value measurements is described below:

Level 1 Valuations are based on quoted prices that the Company has the ability to obtain in actively traded markets for identical assets and liabilities. Since valuations are based on quoted prices that are readily and regularly available in an active market or exchange traded market, a valuation of these instruments does not require a significant degree of judgment.

Level 2 Valuations are based on quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3 Valuations are based on model-based techniques for which some or all of the assumptions are obtained from indirect market information that is significant to the overall fair value measurement and which require a significant degree of management judgment.

The following table sets forth the Company's financial assets and liabilities that were measured at fair value on a recurring basis by level within the fair value hierarchy at January 30, 2009.

(In thousands)

	Level 2	Total
Assets:		
Embedded Derivatives	\$ 3,224	\$ 3,224
Liabilities:		
Derivative Contracts	\$ 30,033	\$ 30,033

The Company's embedded derivatives are the result of entering into sales or purchase contracts that are denominated in a currency other than the Company's functional currency or the supplier's or customer's functional currency. The fair value is determined by calculating the difference between quoted exchange rates at the time the contract was entered into and the period end exchange rate. These contracts are categorized as Level 2 in the fair value hierarchy.

The Company's derivative contracts consist of foreign currency exchange contracts. These derivative contracts are over the counter and their fair value is determined using modeling techniques that include market inputs such as interest rates, yield curves, and currency exchange rates. These contracts are categorized as Level 2 in the fair value hierarchy.

The Company adopted Statement of Financial Accounting Standards No. 159, The Fair Value Option for Financial Assets and Financial Liabilities, (Statement No. 159) effective November 1, 2008. Statement No. 159 permits entities to elect to measure eligible financial instruments at fair value on an instrument-by-instrument basis. The adoption of Statement No. 159 had no impact on the consolidated financial position, results of operations or cash flows, as no eligible financial instruments were elected to be measured at fair value under this guidance.

13. Segment information:

Business segment information for continuing operations includes the segments of Avionics & Controls, Sensors & Systems and Advanced Materials.

14. The acquisition of Racal was funded from cash proceeds from the sale of U.K.-based Muirhead and Traxsys and the Company's line of credit. Due to holding of pounds sterling to fund the acquisition during a period of foreign exchange volatility, the Company incurred a \$7.9 million foreign currency transaction loss in January 2009, which was recorded in other expense. To facilitate the acquisition of Racal, the Company executed a \$159.7 million U.S. dollar-denominated intercompany loan with a wholly owned subsidiary, of which its functional currency is the pound sterling. The Company was subject to foreign currency exchange risk on this intercompany loan until bank lender approval was secured to convert the intercompany loan to an investment in subsidiary. On February 24, 2009, lender approval was obtained. From January 30, 2009, to February 24, 2009, the effect of foreign currency changes resulted in a foreign currency loss of \$0.1 million on the intercompany loan. No further foreign currency transaction losses or gains will be recorded because the intercompany loan will be converted to an investment in subsidiary.
15. The Company paid down £31.0 million of the £57.0 GBP million term loan during the first fiscal quarter of 2008 and terminated the interest rate swap on the U.K. pound-denominated note for a gain of \$1.9 million.

16. The following schedules set forth condensed consolidating financial information as required by Rule 3-10 of Securities and Exchange Commission Regulation S-X as of January 30, 2009, and October 31, 2008, and for the applicable periods ended January 30, 2009, and February 1, 2008, for (a) Esterline Technologies Corporation (the Parent); (b) on a combined basis, the subsidiary guarantors (Guarantor Subsidiaries) of the Senior Subordinated Notes due 2013 (Senior Subordinated Notes) and Senior Notes due 2017 (Senior Notes) which include Advanced Input Devices, Inc., Amtech Automated Manufacturing Technology, Angus Electronics Co., Armtec Countermeasures Co., Armtec Countermeasures TNO Co., Armtec Defense Products Co., AVISTA, Incorporated, BVR Technologies Co., CMC DataComm Inc., CMC Electronics Acton Inc., CMC Electronics Aurora Inc., EA Technologies Corporation, Equipment Sales Co., Esterline Canadian Holding Co., Esterline International Company (China), Esterline Sensors Services Americas, Inc., Esterline Technologies Holdings Limited, Esterline Technologies Ltd. Limited (U.K.), UKCI Ltd., Wallop Defence Systems Limited, Wallop Industries Limited (U.K.), Weston Aero Ltd. (England), and Weston Aerospace Ltd. (England). Muirhead Aerospace Limited (Muirhead), Norcroft Dynamics Ltd. (Norcroft), and Traxsys Input Products Ltd. (Traxsys), were Non-Guarantor Subsidiaries as of October 31, 2008. As explained in Note 8, Muirhead, Norcroft, and Traxsys were sold on November 3, 2008, and, accordingly, Muirhead, Norcroft, and Traxsys were excluded from the Condensed Consolidating Balance Sheet at January 30, 2009, and accounted for as a discontinued operation in the Condensed Consolidating Statement of Operations and Cash Flows for the three-month periods ended January 30, 2009, and February 1, 2008. The Guarantor Subsidiaries are direct and indirect wholly-owned subsidiaries of Esterline Technologies Corporation and have fully and unconditionally, jointly and severally, guaranteed the Senior Notes and Senior Subordinated Notes.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

We operate our businesses in three segments: Avionics & Controls, Sensors & Systems and Advanced Materials. The Avionics & Controls segment designs and manufactures integrated cockpit systems, technology interface systems for military and commercial aircraft and land- and sea-based military vehicles, secure communications systems, specialized medical equipment, and other industrial applications. The Sensors & Systems segment produces high-precision temperature and pressure sensors, and electrical power switching, and other related systems, principally for aerospace and defense customers. The Advanced Materials segment develops and manufactures thermally engineered components and high-performance elastomer products used in a wide range of commercial aerospace and military applications, combustible ordnance components and electronic warfare countermeasure devices for military customers. Sales in all segments include domestic, international, defense and commercial customers.

Our current business and strategic plan focuses on the continued development of our products principally for aerospace and defense markets. We are concentrating our efforts to expand our capabilities in these markets and anticipate the global needs of our customers and respond to such needs with comprehensive solutions. These efforts focus on continuous research and new product development, acquisitions and establishing strategic realignments of operations to expand our capabilities as a more comprehensive supplier to our customers across our entire product offering.

On November 3, 2008, we sold Muirhead Aerospace (Muirhead) and Traxsys Input Products Limited (Traxsys) for \$63.4 million, which resulted in an after tax gain of \$15.5 million. Muirhead and Traxsys were included in the Sensors & Systems segment. The results of Muirhead and Traxsys were accounted for as a discontinued operation in the consolidated financial statements.

On December 15, 2008, we acquired NMC Group, Inc. (NMC), which designs and manufactures specialized light-weight fasteners principally for commercial aviation applications. NMC is included in our Advanced Materials segment.

On January 26, 2009, we acquired Racal Acoustics Global Ltd. (Racal), which develops and manufactures high technology ruggedized personal communication equipment for the defense and avionics segment. Racal is included in our Avionics & Controls segment.

Income from continuing operations was \$11.5 million, or \$0.38 per diluted share, compared with \$29.7 million, or \$1.00 per diluted share, in the prior-year period. During the first fiscal quarter of 2009, our operating results were affected by large fluctuations in foreign currency exchange rates, the aftermath of the strike at Boeing, reductions in our after-market spares sales due to reduced air traffic and our flare countermeasure operations, operating results of which can vary

significantly from quarter to quarter as the requirements from our customers change. Additionally, on a comparative basis, the first fiscal quarter of 2009 contained 13 weeks, while the first fiscal quarter of 2008 contained 14 weeks.

During the first fiscal quarter of 2009, the pound sterling weakened significantly against the U.S. dollar. With over 50% of our business operations based in non-U.S. locations and with a significant portion of our sales denominated in U.S. dollars, operating results were favorably impacted by the weakening of these currencies; however, we use forward contracts to hedge our U.S. dollar-denominated sales to reduce the volatility of foreign currency exchange movements and, accordingly, our 2009 first fiscal quarter results were impacted from hedging effected before the Canadian dollar, euro, and pound sterling weakened against the U.S. dollar. Income from continuing operations reflected a net foreign currency loss of \$5.3 million or \$3.7 million after tax, or \$0.12 per diluted share, compared to a net gain in the prior-year period of \$3.5 million or \$2.4 million after tax, or \$0.08 per diluted share, from forward currency exchange contracts, U.S. dollar-denominated accounts receivable and backlog. Income from continuing operations was also impacted by a foreign currency loss of \$7.9 million or \$1.7 million after tax, or \$0.06 per diluted share, relating to the pound sterling-denominated funding of our acquisition of Racal in January 2009.

Income from continuing operations for the first fiscal quarter of 2009 includes a \$2.0 million, or \$0.07 per diluted share, reduction of previously recorded withholding tax liabilities as a result of the enactment of a U.S.-Canadian tax treaty and a \$1.6 million, or \$0.05 per diluted share, penalty due to a development with regard to certain foreign tax laws. Prior-year results include a \$6.9 million, or \$0.23 per diluted share, reduction of previously estimated income tax liabilities and a \$4.1 million, or \$0.14 per diluted share, net reduction in deferred income tax liabilities resulting from the enactment of tax laws reducing the Canadian statutory corporate income tax rate. Income from discontinued operations was \$0.52 per diluted share, compared with \$0.04 per diluted share in the prior-year period, reflecting the gain on sale of our U.K.-based Muirhead and Traxsys subsidiaries in November 2008. Net income was \$26.9 million, or \$0.90 per diluted share, compared with net income of \$31.0 million, or \$1.04 per diluted share, in the prior-year period.

Results of Operations

Three Month Period Ended January 30, 2009 Compared with Three Month Period Ended February 1, 2008

Sales for the first fiscal quarter decreased 13.3% when compared with the prior-year period. Sales by segment were as follows:

(In thousands)

	Incr./(Decr.) from prior year period	Three Months Ended	
		January 30, 2009	February 1, 2008
Avionics & Controls	(10.1)%	\$ 128,468	\$ 142,908
Sensors & Systems	(9.6)%	84,555	93,541
Advanced Materials	(20.0)%	96,694	120,876
Total Net Sales		\$ 309,717	\$ 357,325

The 10.1% decrease in sales of Avionics & Controls was principally due to the effect of foreign exchange rates at our Canadian operations and the decrease in the number of weeks contained in the first fiscal quarter of 2009 compared to the prior-year period, as explained above. Sales in the first fiscal quarter of 2009 reflected a weaker Canadian dollar relative to the U.S. dollar, as the average exchange rate from the Canadian dollar to the U.S. dollar decreased from 1.01 in the first fiscal quarter of 2008 to 0.82 in the first fiscal quarter of 2009. Additionally, the decrease in sales reflected lower OEM sales due to the Boeing strike and decreased after-market spares sales.

The 9.6% decrease in sales of Sensors & Systems mainly reflected the effect of exchange rates at our non-U.S. operations and the decrease in the number of weeks contained in the first fiscal quarter of 2009 compared to the prior-year period. Sales in the first fiscal quarter of 2009 reflected a weaker pound sterling and euro relative to the U.S. dollar. The average exchange rate from the pound sterling to the U.S. dollar decreased from 2.02 in the first fiscal quarter of 2008 to 1.51 in the first fiscal quarter of 2009. The average exchange rate from the euro to the U.S. dollar decreased from 1.46 in the first fiscal quarter of 2008 to 1.32 in the first fiscal quarter of 2009. The decrease in sales also reflects lower OEM sales of temperature and pressure sensors and after-market sales.

The 20.0% decrease in sales of Advanced Materials principally reflected lower sales of flare countermeasure devices at our U.K. operation, decreased sales of thermally engineered components and elastomer components, and the decrease in the number of weeks contained in the first fiscal quarter of 2009 compared to the prior-year period. The decrease in flare countermeasures sales principally related to timing of receiving orders and scheduling shipments of our international customers. The decrease in sales of thermally engineered components reflected the weakening of the pound sterling as described above. The decrease in sales at our elastomer operations was principally due to an expected reduction in rocket engine liner material for the NASA shuttle program and the effect of the Boeing strike. These decreases in sales were partially offset by increased sales of combustible ordnance, mainly reflecting pricing strength and incremental sales from the acquisition of NMC in December 2008.

Avionics & Controls segment gross margin was 35.7% and 34.7% for the first fiscal quarter of 2009 and 2008, respectively. The increase in Avionics & Controls segment gross margin mainly reflected higher sales volumes of production units for defense such as the UH60M helicopter program with Sikorsky, as well as improved operational efficiency and continued pricing strength on certain cockpit control devices. This increase was partially offset by lower after-market spares and the effect of exchange rates at our avionics systems unit.

Sensors & Systems segment gross margin was 35.2% and 37.6% for the first fiscal quarter of 2009 and 2008, respectively. The decrease in gross margin was due to lower after-market sales and certain higher margin power distribution devices for commercial aircraft applications, partially offset by a retroactive price adjustment on certain temperature and pressure sensors and the impact of exchange rates, as well as improved gross margin on certain power distribution devices for defense applications.

Advanced Materials segment gross margin was 27.4% compared to 25.2% for the same period one year ago. The increase in Advanced Materials gross margin reflected strong gross margins at our combustible ordnance and thermally engineered components operations, partially offset by lower gross margins at our U.K. flare countermeasure and elastomer operations, reflecting lower sales volumes and a decreased recovery of fixed overhead expenses.

Selling, general and administrative expenses (which include corporate expenses) totaled \$59.7 million, or 19.3% of sales, and \$59.4 million, or 16.6% of sales, for the first fiscal quarter of 2009 and 2008, respectively. The slight increase in selling, general and administrative expense principally reflects a \$3.0 million increase in pension cost and foreign currency transaction losses on forward contracts not accounted for as cash flow hedges, principally offset by the effect of translating our non-U.S. units from their functional currency to the U.S. dollar as the Canadian dollar, euro and pound sterling weakened against the U.S. dollar.

Research, development and engineering spending was \$17.4 million, or 5.6% of sales, for the first fiscal quarter of 2009 compared with \$21.6 million, or 6.1% of sales, for the first fiscal quarter of 2008. The decrease in research, development and engineering principally reflected increased customer funding and governmental assistance on certain development programs, lower spending on the A400M and 787 programs, and the effect of translating our non-U.S. units from their functional currency to the U.S. dollar as the Canadian dollar, euro and pound sterling weakened against the U.S. dollar. These decreases were partially offset by increased spending on the T-6B military trainer. Fiscal 2009 research, development and engineering spending is expected to be in the range of 5.0% to 5.5% of sales.

Segment earnings (operating earnings excluding corporate expenses and other income or expense) for the first fiscal quarter of 2009 totaled \$34.7 million, or 11.2% of sales, compared with \$43.5 million, or 12.2% of sales, for the first fiscal quarter in 2008.

Avionics & Controls segment earnings were \$14.5 million, or 11.3% of sales, in the first fiscal quarter of 2009 and \$15.5 million, or 10.8% of sales, in the first fiscal quarter of 2008,

principally reflecting lower earnings of our control systems unit. Earnings of our medical device units were almost even with the prior-year period. The results of our avionics systems unit were essentially break even in both the first fiscal quarter of 2009 and 2008, mainly reflecting lower than expected gross margins on certain long-term contracts and higher research, development and engineering costs principally related to the development of the cockpit integration system for the T-6B military trainer. In addition, earnings of our avionics systems unit were impacted by changes in foreign currency exchange rates. The impact of exchange rates on U.S. dollar-denominated accounts receivable, backlog and forward exchange contracts in the first fiscal quarter of 2009 was a loss of approximately \$2.1 million compared to a \$2.1 million gain in the prior-year period.

Sensors & Systems segment earnings were \$10.3 million, or 12.1% of sales, for the first fiscal quarter of 2009 compared with \$12.4 million, or 13.2% of sales, for the first fiscal quarter of 2008. The decrease in segment earnings as a percent of sales principally reflects lower gross margins at our temperature and pressure sensor operations and start-up costs incurred to set up a manufacturing operation in Mexico. Lower gross margins at our power distribution operations were substantially offset by decreased research, engineering and development due to increased governmental assistance and customer development funding and decreased A400M program development expenses. The impact of exchange rates on U.S. dollar-denominated accounts receivable, backlog and forward contracts impacted gross margin in the first fiscal quarter of 2009 by a loss of approximately \$2.0 million compared to a \$1.2 million gain in the prior-year period.

Advanced Materials segment earnings were \$10.0 million, or 10.3% of sales, for the first fiscal quarter of 2009 compared with \$15.6 million, or 12.9% of sales, for the first fiscal quarter of 2008, principally reflecting lower earnings from our elastomer, U.K. countermeasure flare, and metal finishing operations. As explained above, our U.K. flare countermeasure unit had significant international sales and gross profit in the prior-year period, which did not occur in the first fiscal quarter of 2009. We expect our international flare countermeasure sales orders to ship later this year. In addition, we expect operating results of our flare countermeasure operations to improve by the fourth fiscal quarter of 2009 as long-term contracts expire and are expected to be replaced with contracts which include more favorable pricing. The decrease in earnings at our elastomer operations principally reflected lower sales volumes and gross margin due to sales mix. The decrease in earnings at our thermally engineered component operations was due to a \$1.2 million loss in the first fiscal quarter of 2009 compared to a \$0.3 million gain resulting from the effect of foreign currency exchange rates on U.S. dollar-denominated accounts receivable and forward contracts, which are not accounted for as a cash flow hedge. The decrease in earnings at our metal finishing unit resulted from decreased sales and gross profit principally due to the effects of the strike at Boeing.

On January 26, 2009, we acquired Racal for £117.7 million or \$164.5 million. Racal develops and manufactures high technology ruggedized personal communication equipment for the defense and avionics market segment. The acquisition was funded with cash proceeds from the sale of U.K.-based Muirhead and Traxsys and our line of credit. To facilitate the acquisition of Racal, we executed a \$159.7 million U.S. dollar-denominated intercompany loan with a wholly

owned subsidiary, for which its functional currency is the pound sterling. Due to our holding of pounds sterling to fund the acquisition during a period of foreign exchange volatility, we incurred a \$7.9 million foreign currency transaction loss in January 2009, which was recorded in other expense. We were subject to foreign currency exchange risk on this intercompany loan until bank lender approval was secured to convert the intercompany loan to an investment in subsidiary. On February 24, 2009, lender approval was obtained. From January 30, 2009, to February 24, 2009, the effect of foreign currency changes resulted in a foreign currency loss of \$0.1 million on the intercompany loan. No further foreign currency transaction losses or gains will be recorded because the intercompany loan will be converted to an investment in subsidiary.

Interest expense for the first fiscal quarter of 2009 was \$6.7 million compared with \$7.9 million for the first fiscal quarter of 2008, reflecting lower borrowings during most of the first fiscal quarter of 2009.

During the first fiscal quarter of 2008, we repaid £31.0 million under our pound sterling term loan and terminated our interest rate swap, which resulted in a \$1.9 million gain.

The effective income tax rate for the first fiscal quarter of 2009 was 18.9% (before a \$0.4 million tax benefit) compared with 22.1% (before a \$6.9 million tax benefit) for the prior-year period. The \$0.4 million tax benefit in the first fiscal quarter of 2009 was the result of two events. The first event was a \$2.0 million reduction of previously recorded withholding tax liabilities as a result of the enactment of a U.S.-Canadian tax treaty. The second event was the recording of a \$1.6 million penalty due to a development with regard to certain foreign tax laws. The \$6.9 million tax benefit in the first fiscal quarter of 2008 was the result of two events. The first event was the settlement of an examination of the U.S. federal income tax returns for fiscal years 2003 through 2005, which resulted in a \$2.8 million reduction of previously estimated income tax liabilities. The second event was the enactment of tax laws reducing the Canadian statutory corporate income tax rate, which resulted in a \$4.1 million net reduction of deferred income tax liabilities. The effective tax rate differed from the statutory rate in the first fiscal quarters of 2009 and 2008, as both years benefited from various tax credits and certain foreign interest expense deductions.

New orders for the first fiscal quarter of 2009 were \$370.2 million compared with \$348.4 million for the same period in 2008. Orders in the first fiscal quarter of 2009 include \$65.2 million in backlog acquired from the Racal and NMC acquisitions. New orders declined by \$39.4 million if Racal and NMC acquired backlog is excluded. The decline in new orders principally reflects the effect of foreign exchange rates, the Boeing strike and the cancellation of certain industrial commercial orders. Backlog was \$1.2 billion compared with \$949.1 million at the end of the prior-year period and \$1.1 billion at the end of fiscal 2008.

Liquidity and Capital Resources

Cash and cash equivalents at January 30, 2009, totaled \$81.2 million, a decrease of \$79.4 million from October 31, 2008. Net working capital decreased to \$263.1 million at January 30, 2009, from \$456.2 million at October 31, 2008. Sources and uses of cash flows from operating activities principally consist of cash received from the sale of products and cash payments for material, labor and operating expenses. Cash flows provided by operating activities were \$4.2 million and \$35.5 million in the first fiscal quarter of 2009 and 2008, respectively. The decrease principally reflected lower income from continuing operations, increased payments to suppliers due to higher operating activity in our fourth quarter of fiscal 2008, and incentive compensation payments which are paid annually.

Cash flows used by investing activities were \$195.3 million and \$9.2 million in the first fiscal quarter of 2009 and 2008, respectively. Cash flows used by investing activities in the first fiscal quarter of 2009 primarily reflected approximately \$254.3 million for the acquisitions of NMC and Racal, and \$7.5 million in purchases of capital assets, partially offset by proceeds from the sale of Muirhead and Traxsys of \$63.4 million. Cash flows used by investing activities in the prior-year period included \$9.6 million in purchases of capital assets.

Cash flows provided by financing activities were \$114.0 million in the first fiscal quarter of 2009. Cash flows used by financing activities were \$65.2 million in the first fiscal quarter of 2008. The increase principally reflected a \$113.7 million increase in our credit facility to finance the Racal acquisition. The prior-year period mainly included \$64.3 million in repayments on our GBP term loan.

On December 15, 2008, the Company acquired all of the outstanding capital stock of NMC Group, Inc. (NMC) for approximately \$89.8 million in cash, including acquisition costs. The acquisition was funded from existing cash.

On January 26, 2008, the Company acquired all of the outstanding capital stock of Racal Acoustics Global Ltd. (Racal) for approximately \$164.5 million in cash, including acquisition costs. Racal develops and manufactures high technology ruggedized personal communication equipment for the defense and avionics segment. The acquisition was funded from proceeds from the sale of Muirhead and Traxsys and our credit facility.

Capital expenditures, consisting of machinery, equipment and computers, are anticipated to be approximately \$100.0 million during fiscal 2009, compared with \$40.7 million expended in fiscal 2008. The increase in capital expenditures reflects the construction of a new facility for our Korry Electronics unit and a replacement facility at our Wallop unit. Capital expenditures for the first fiscal quarter of 2009 totaled \$7.5 million, primarily for machinery and equipment, construction in process, and enhancements to information systems.

Total debt at January 30, 2009, was \$509.6 million and consisted of \$175.0 million of Senior Notes due in 2017, \$175.0 million of Senior Subordinated Notes due in 2013, \$115.0 million under our U.S. credit facility,

\$30.5 million under our GBP term loan, and \$14.1 million of various foreign currency debt agreements and other debt agreements, including capital lease obligations.

We believe cash on hand and funds generated from operations are adequate to service operating cash requirements and capital expenditures through fiscal 2009.

Forward-Looking Statements

This quarterly report on Form 10-Q contains forward-looking statements. These statements relate to future events or our future financial performance. In some cases you can identify forward-looking statements by terminology such as anticipate, believe, continue, could, estimate, expect, intend, may, might, plan, potential, pre- negative of such terms or other comparable terminology. These statements are only predictions and involve known and unknown risks, uncertainties and other factors, including the risk factors set forth in Forward-Looking Statements and Risk Factors in our Annual Report on Form 10-K for the fiscal year ended October 31, 2008, that may cause our or the industry's actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. You should not place undue reliance on these forward-looking statements. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, performance or achievements. Given these risks and uncertainties, you are cautioned not to place undue reliance on such forward-looking statements. The forward-looking statements included or incorporated by reference into this report are made only as of the date hereof. We do not undertake and specifically decline any obligation to update any such statements or to publicly announce the results of any revisions to any such statements to reflect future events or developments.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

As explained in our Management, Discussion and Analysis, to facilitate the acquisition of Racal, we executed a \$159.7 million U.S. dollar-denominated intercompany loan with a wholly owned subsidiary, for which its functional currency is the pound sterling. We are subject to foreign currency exchange risk on this intercompany loan until lender approval is secured to convert the intercompany loan to an investment in subsidiary. On February 24, 2009, lender approval was obtained. From January 30, 2009, to February 24, 2009, the effect of foreign currency changes resulted in a foreign currency loss of \$0.1 million on the intercompany loan. No further foreign currency transaction losses or gains will be recorded because the intercompany loan will be converted to an investment in subsidiary.

Item 4. Controls and Procedures

Our principal executive and financial officers evaluated our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of January 30, 2009. Based upon that evaluation, they concluded as of January 30, 2009, that our disclosure controls and procedures were effective to ensure that information we are required to disclose in the reports that we file under the Exchange Act is recorded, processed, summarized and reported within time periods specified in Securities and Exchange Commission rules and forms. In addition, our principal executive and financial officers concluded as of January 30, 2009, that our disclosure controls and procedures are also effective to ensure that information required to be disclosed in reports that we file or submit under the Exchange Act is accumulated and

communicated to our management, including to our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

During the time period covered by this report, there were no significant changes in our internal control over financial reporting that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

From time to time we are involved in legal proceedings arising in the ordinary course of business. We believe that adequate reserves for these liabilities have been made and that there is no litigation pending that could have a material adverse effect on our results of operations and financial condition.

Item 6. **Exhibits**

- 10.1 Esterline Technologies Corporation Fiscal Year 2009 Annual Incentive Plan.
- 10.2 Esterline Technologies Corporation Long-Term Incentive Plan.
- 10.3 Termination Protection Agreement.
- 10.4 Summary of Non-Employee Director Compensation for Services on the Board of Directors of Esterline Technologies Corporation.
- 10.5 Share Sale and Purchase Agreement relating to Racal Acoustics Global Limited.
- 11 Schedule setting forth computation of basic and diluted earnings per common share for the three month periods ended January 30, 2009, and February 1, 2008.
- 31.1 Certification of Chief Executive Officer.
- 31.2 Certification of Chief Financial Officer.
- 32.1 Certification (of Robert W. Cremin) pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
- 32.2 Certification (of Robert D. George) pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
