***NOTES TO CONSOLIDATED FINANCIAL STATEMENTS***

***QUARTER AND SIX MONTHS ENDED MARCH 31, 2009 AND 2008***

**(UNAUDITED)**

**NOTE A Basis of Presentation**

The consolidated unaudited interim financial statements included in this report have been prepared by Washington Federal, Inc. ( Company ). The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America ( GAAP ) requires management to make estimates and assumptions that affect amounts reported in the financial statements. Actual results could differ from these estimates. In the opinion of management, all adjustments (consisting only of normal recurring accruals) necessary for a fair presentation are reflected in the interim financial statements. The September 30, 2008 Consolidated Statement of Financial Condition was derived from audited financial statements.

The information included in this Form 10-Q should be read in conjunction with Company s 2008 Annual Report on Form 10-K ( 2008 Form 10-K ) as filed with the SEC. Interim results are not necessarily indicative of results for a full year.

References to Net Income in this document refer to Net Income Available to Common Shareholders.

**NOTE B Preferred Stock Issuance**

On November 14, 2008, the Company entered into a Letter Agreement with the United States Department of the Treasury ( Treasury ) to participate in the Troubled Asset Relief Program Capital Purchase Program ( CPP ). Pursuant to the Agreement, the Company issued and sold to the Treasury (i) 200,000 shares of the Company s Fixed Rate Cumulative Perpetual Preferred Stock, and (ii) a warrant to purchase 1,707,456 shares of the Company s common stock, par value \$1.00 per share, for an aggregate purchase price for both the preferred stock and warrants of \$200 million in cash. The Preferred Stock qualifies as Tier 1 capital and will pay cumulative dividends at a rate of 5% per annum for the first five years, and 9% per annum thereafter.

**NOTE C Dividends**

On April 24, 2009 the Company paid its 105<sup>th</sup> consecutive quarterly cash dividend on common stock. Dividends per share were \$.05 for the quarter ended March 31, 2009 compared to \$.21 for the same period one year ago.

**NOTE D Comprehensive Income**

The Company s comprehensive income includes all items which comprise net income plus the unrealized gains (losses) on available-for-sale securities. Total comprehensive income for the quarters ended March 31, 2009 and 2008 totaled \$21,633,000 and \$46,493,000, respectively. Total comprehensive income for the six months ended March 31, 2009 and 2008 totaled \$74,606,000 and \$87,806,000, respectively. The difference between the Company s net income and total comprehensive income for the six months ended March 31, 2009 was \$46,027,000, which equals the change in the net unrealized gain on available-for-sale securities of \$72,770,000, less tax of \$26,743,000.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## QUARTER AND SIX MONTHS ENDED MARCH 31, 2009 AND 2008

(UNAUDITED)NOTE E Allowance for Losses on Loans

The following table summarizes the activity in the allowance for loan losses for the periods ended March 31, 2009 and 2008:

	Quarter Ended March 31,		Six Months Ended March 31,	
	2009	2008	2009	2008
	(In thousands)			
Balance at beginning of period	\$ 104,835	\$ 29,370	\$ 85,058	\$ 28,520
Provision for loan losses	54,000	9,500	89,000	10,500
Charge-offs	(15,996)	(3,046)	(31,384)	(3,196)
Recoveries	285		450	
Acquired reserves		11,181		11,181
Balance at end of period	\$ 143,124	\$ 47,005	\$ 143,124	\$ 47,005

The Company recorded a \$54,000,000 provision for loan losses during the quarter ended March 31, 2009, while a \$9,500,000 provision was recorded for the same quarter one year ago. Non-performing assets amounted to \$492,131,000 or 4.01% of total assets at March 31, 2009 compared to \$68,479,000 or .58% of total assets one year ago. The Company had net charge-offs of \$15,711,000 for the quarter ended March 31, 2009 compared with 3,046,000 of net charge-offs for the same quarter one year ago. This significant increase in the provision for loan losses is in response to three primary factors: first, the overall deterioration in the housing market in general in the Company's eight western state territory, second, the significant increase in the combined balance of non-performing assets in our land A&D and speculative construction portfolios, and finally, the material increase in net charge-offs for the quarter. Management expects the provision to remain at elevated levels until non-performing assets and charge-offs improve.

NOTE F New Accounting Pronouncements

In September 2006, the Financial Accounting Standards Board ( FASB ) issued Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* ( SFAS 157 ). This statement defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. This statement establishes a fair value hierarchy for the assumptions used to measure fair value and clarifies assumptions about risk and the effect of a restriction on the sale or use of an asset. No additional fair value measurements are required under this statement. The Company adopted this statement effective October 1, 2008. See Note G for disclosures related to the adoption of this statement.

In April 2009, the FASB issued FASB Staff Position ( FSP ) FAS 115-2 and FAS 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments*. This FSP amends the other-than-temporary impairment guidance in U.S. GAAP for debt securities to make it more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities. This FSP will be effective for interim and annual reporting periods ending after June 15, 2009 with early adoption permitted for periods ending after March 15, 2009. The Company plans to adopt this FSP for its interim reporting period ending June 30, 2009. The Company is evaluating the effect on its financial condition and results of operations of applying the guidance in this FSP.

In April 2009, the FASB issued FSP FAS 107-1 and APB 28-1, *Interim Disclosures about Fair Value of Financial Instruments*. This FSP requires disclosures about the fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements. This FSP also amends APB Opinion No. 28, *Interim Financial Reporting*, to require those disclosures in summarized financial information at interim reporting periods. This FSP will be effective for interim reporting periods ending after June 15, 2009 with early adoption permitted for periods ending after March 15, 2009. The Company plans to adopt this FSP for its interim reporting period ending June 30, 2009. Because FSP No 107-1 impacts the Company's disclosure and not its accounting treatment for financial instruments, adoption of this FSP will not impact the Company's financial condition or results of operations.

## Edgar Filing: WASHINGTON FEDERAL INC - Form 10-Q

In April 2009, the FASB issued FSP FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly*. This FSP provides additional guidance for estimating fair value in accordance with FASB Statement No. 157, *Fair Value Measurements*, when the transaction volume and level of market activity for the asset or liability have significantly decreased. This FSP also includes guidance on identifying circumstances that indicate a transaction is not orderly. This FSP will be effective for interim and annual reporting periods ending after June 15, 2009, and shall be applied prospectively. Early adoption is permitted for periods ending after March 15, 2009. The Company plans to adopt this FSP for its interim reporting period ending June 30, 2009. The Company is evaluating the effect on its financial condition and results of operations of applying the guidance in this FSP.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

QUARTER AND SIX MONTHS ENDED MARCH 31, 2009 AND 2008

(UNAUDITED)NOTE G Fair Value Measurements

As discussed in Note F, SFAS 157 defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. SFAS 157 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

**Level 1:** Quoted prices (unadjusted) for identical assets or liabilities in active exchange markets that the entity has the ability to access as of the measurement date.

**Level 2:** Significant other observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active and other inputs that are observable or can be corroborated by observable market data.

**Level 3:** Significant unobservable inputs that reflect a company's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The following is a description of the valuation methodologies used to measure and report fair value of financial assets and liabilities on a recurring or nonrecurring basis:

Measured on a Recurring Basis*Securities*

Securities available for sale are recorded at fair value on a recurring basis. Fair value is determined with quoted prices for similar assets or liabilities, quoted prices in markets that are not active and other inputs that are observable or can be corroborated by observable market data (Level 2).

The following table presents the balance of assets measured at fair value on a recurring basis at March 31, 2009:

## WASHINGTON FEDERAL, INC. AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## QUARTER AND SIX MONTHS ENDED MARCH 31, 2009 AND 2008

(UNAUDITED)Measured on a Nonrecurring Basis*Impaired Loans*

From time to time, and on a nonrecurring basis, fair value adjustments to collateral dependent loans are recorded to reflect write-downs of principal balances based on the current appraised or estimated value of the collateral. This new estimated fair value is net of anticipated selling costs.

*REO*

Real estate owned consists principally of properties acquired through foreclosure and are carried at the lower of cost or estimated fair value less anticipated selling costs.

The following table presents the aggregated balance of assets measured at estimated fair value on a nonrecurring basis through the six months ended March 31, 2009, and the total losses resulting from these fair value adjustments for the quarter and six months ended March 31, 2009:

	Through March 31, 2009				Quarter Ended March 31, 2009	Six Months Ended March 31, 2009

Balance at end of period	\$	\$	\$ 270,783	\$ 270,783	\$ 54,363	\$ 82,948

(1) The loss represents remeasurements of collateral dependent loans.

(2) The loss represents charge-offs on REO.

There were no material liabilities carried at fair value, measured on a recurring or nonrecurring basis, at March 31, 2009.

**FORWARD LOOKING STATEMENTS**

In addition to historical information, this Quarterly Report on Form 10-Q includes certain forward-looking statements, as defined in the Securities Act of 1933 and the Securities Exchange Act of 1934, based on current management expectations. Actual results could differ materially from those management expectations. Such forward-looking statements include statements regarding the Company's intentions, beliefs or current expectations as well as the assumptions on which such statements are based. Stockholders and potential stockholders are cautioned that any such forward-looking statements are not guarantees of future performance and involve risks and uncertainties, and that actual results may differ materially from those contemplated by such forward-looking statements. Factors that could cause future results to vary from current management expectations include, but are not limited to: general economic conditions; legislative and regulatory changes; monetary fiscal policies of the federal government; changes in tax policies; rates and regulations of federal, state and local tax authorities; changes in interest rates; deposit flows; cost of funds; demand for loan products; demand for financial services; competition; changes in the quality or composition of the Company's loan and investment portfolios; changes in accounting principles; policies or guidelines and other economic, competitive, governmental and technological factors affecting the Company's operations, markets, products, services and fees. The Company undertakes no obligation to update or revise any forward-looking statements to reflect changed assumptions, the occurrence of unanticipated events or changes to future operating results over time.

**GENERAL**

Washington Federal, Inc. ( Company ) is a savings and loan holding company. The Company's primary operating subsidiary is Washington Federal Savings.

**INTEREST RATE RISK**

The Company assumes a high level of interest rate risk as a result of its policy to originate and hold for investment fixed-rate single-family home loans, which are longer-term in nature than the short-term characteristics of its liabilities of customer accounts and borrowed money. At March 31, 2009, the Company had a negative one-year maturity gap of approximately 34% of total assets, flat from the 34% negative one-year gap as of September 30, 2008, but a decrease of 3% from December 31, 2008. The decrease from December 31, 2008 was due to the refinancing of \$300,000,000 of borrowings that were scheduled to mature within one year and now have been refinanced for a maturity of 2014 at a rate of 3.03%.

The interest rate spread increased to 3.11% at March 31, 2009 from 2.85% at September 30, 2008. The spread increased primarily because of a general decrease in rates on customer deposits. Since the Federal Reserve began decreasing short-term rates in September 2008, market rates for short-term deposits have fallen. As a result, deposits are repricing to lower rates, which contributes to an increasing spread. Somewhat offsetting the benefit of lower deposit costs is the decreasing yield on loans as a result of the repricing of variable rate loans and the impact of refinancing of fixed rate mortgages due to historically low long term interest rates.

**PART I Financial Information**

**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)**

As of March 31, 2009, the weighted average rates on earning assets decreased by 17 basis points since September 30, 2008, while the weighted average rates on customer accounts and borrowings decreased by 43 basis points over the same period. As of March 31, 2009, the Company had grown total assets by \$465,747,000, or 3.9%, from \$11,796,425,000 at September 30, 2008, by deploying funds obtained through lower cost short-term deposits and borrowings, as well as the \$200,000,000 of CPP funds (see Note B above). For the quarter ended March 31, 2009, compared to September 30, 2008, loans decreased \$70,021,000, or 0.7%, and investment securities increased \$480,912,000, or 30.0%. Cash and cash equivalents of \$86,579,000 and stockholders' equity of \$1,601,858,000 provides management with flexibility in managing interest rate risk going forward.

**LIQUIDITY AND CAPITAL RESOURCES**

The Company's net worth at March 31, 2009 was \$1,601,858,000, or 13.06% of total assets. This was an increase of \$269,184,000 from September 30, 2008 when net worth was \$1,332,674,000, or 11.30% of total assets. The increase in the Company's net worth included \$200,000,000 from the issuance of preferred stock and a related warrant to purchase common stock to the U.S. Treasury (see Note B for further discussion). The increase also included \$28,578,000 from net income and a \$46,027,000 increase in accumulated other comprehensive income as a result of a net increase in market value of the Company's available-for-sale investments. The vast majority of the Company's available for sale investments are fixed rate. As a result of market interest rates decreasing, the value of fixed rate investments generally increased. Net worth was reduced by \$7,477,000 of cash dividend payments. During the quarter ended December 31, 2008, the Company reduced its quarterly cash dividend on common stock from \$.21 to \$.05 to conserve capital.

Management believes this strong net worth position will help the Company manage its interest rate risk and enable it to compete more effectively for controlled growth through acquisitions, de novo expansion and increased customer deposits. To be categorized as well capitalized, Washington Federal Savings must maintain minimum total risk-based, Tier 1 risk-based and Tier 1 leverage ratios as set forth in the following table.

**CHANGES IN FINANCIAL CONDITION**

Available-for-sale and held-to-maturity securities: Available-for-sale securities increased \$488,133,000, or 33.1%, during the six months ended March 31, 2009, which included the purchase of \$554,325,000 of available-for-sale investment securities. During the same period there were no sales of available-for-sale securities, nor were there any purchases or sales of held-to-maturity securities. As of March 31, 2009, the Company had net unrealized gains on available-for-sale securities of \$48,499,000, net of tax, which were recorded as part of stockholders' equity. The Company increased its investment portfolio to protect against a potential refinancing surge resulting from historically low mortgage rates, which were influenced by US government participation in the mortgage-backed securities market.

Loans receivable: During the six months ended March 31, 2009, the balance of loans receivable decreased 0.7% to \$9,431,599,000 compared to \$9,501,620,000 at September 30, 2008. This decrease is consistent with management's strategy to reduce the Company's exposure to land and construction loans and not aggressively compete for 30 year fixed rate mortgages at current market rates. If the current low rates on 30 year fixed-rate mortgages persists, management will consider continuing to shrink its loan portfolio. The following table shows the loan portfolio by category for the last three quarters.

**Non-performing assets:** Non-performing assets increased significantly during the quarter ended March 31, 2009 to \$492,131,000 from \$164,191,000 at September 30, 2008, a 200% increase. A disproportionate share of our non-performing assets come from the land A&D and speculative construction portfolios. These assets have seen the largest declines in value in our loan portfolio. The overall increase in our non-performing assets is attributable to the weakening economy and housing market throughout our eight state branch network. Non-performing assets as a percentage of total assets was 4.01% at March 31, 2009 compared to 1.39% at September 30, 2008. This level of non-performing assets is unprecedented in the Company's 27 year history as a public company. While our non-performing assets have increased significantly over the last 6 months based on current conditions in the real estate marketplace, the Company anticipates non-performing assets will continue to increase in the future until the residential real estate market stabilizes and values recover.

(1) Performing in accordance with restructured terms.

(2) The Company recognized interest income on nonaccrual loans of approximately \$4,857,000 in the six months ended March 31, 2009. Had these loans performed according to their original contract terms, the Company would have recognized interest income of approximately \$16,696,000 for the six months ended March 31, 2009.

In addition to the nonaccrual loans reflected in the above table, at March 31, 2009, the Company had \$284,664,000 of loans that were less than 90 days delinquent but which it had classified as substandard for one or more reasons. If these loans were deemed non-performing, the Company's ratio of total non-performing assets and restructured loans as a percent of total assets would have increased to 6.53% at March 31, 2009.

Total short-term borrowings (due within 30 days) at March 31, 2009, were \$125,000,000 compared with \$377,000,000 at September 30, 2008. See Interest Rate Risk on page 10.

**RESULTS OF OPERATIONS**

Throughout this document we will refer to net income, which is defined as net income available to common shareholders after the payment of preferred dividends.

**Net Income:** The quarter ended March 31, 2009, produced net income of \$8,410,000 compared to \$35,452,000 for the same quarter one year ago. For the six months ended March 31, 2009, net income totaled \$28,579,000, which was a decrease of \$39,921,000 from the same period last year. The decrease for the quarter and six month periods resulted primarily from the significant increase in the provision for loan losses offset somewhat by growth in net interest income.

**Net Interest Income:** The largest component of the Company's earnings is net interest income, which is the difference between the interest and dividends earned on loans and other investments and the interest paid on customer deposits and borrowings. Net interest income is impacted primarily by two factors; first, the volume of earning assets and liabilities and second, the rate earned on those assets or the rate paid on those liabilities.

The following table sets forth certain information explaining changes in interest income and interest expense for the periods indicated compared to the same periods one year ago. For each category of interest-earning asset and interest-bearing liability, information is provided on changes attributable to (1) changes in volume (changes in volume multiplied by old rate) and (2) changes in rate (changes in rate multiplied by old volume). The change in interest income and interest expense attributable to changes in both volume and rate has been allocated proportionately to the change due to volume and the change due to rate.

**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)**

Provision for Loan Losses: The Company recorded a \$54,000,000 provision for loan losses during the quarter ended March 31, 2009, while a \$9,500,000 provision was recorded for the same quarter one year ago. Non-performing assets amounted to \$492,131,000, or 4.01% of total assets, at March 31, 2009, compared to \$68,479,000, or .58% of total assets, one year ago. The Company had net charge-offs of \$15,711,000 for the quarter ended March 31, 2009 compared with \$3,046,000 of net charge-offs for the same quarter one year ago. This significant increase in the provision for loan losses is in response to three primary factors: first, the overall deterioration in the housing market in general in the Company's eight western state territory, second, the significant increase in the combined balance of non-performing assets in our land A&D and speculative construction portfolios, and finally, the material increase in net charge-offs for the quarter. Management believes that higher non-performing assets and charge-offs may continue going forward until the housing market begins to recover. Similarly, management expects the provision to remain at elevated levels until non-performing assets and charge-offs improve.

**Other Expense:** The quarter ended March 31, 2009 produced total other expense of \$25,061,000 compared to \$21,848,000 for the same quarter one year ago, a 14.7% increase. The increase in total other expense over the same comparable period one year ago was primarily due to the additional investment in our information technology upgrade initiative known as Project Tritan. Total other expense for the quarters ended March 31, 2009 and 2008 equaled .81% and .67%, respectively, of average assets. The number of staff, including part-time employees on a full-time equivalent basis, was 1,113 at March 31, 2009 and 1,015 at March 31, 2008.

**Taxes:** Income taxes decreased \$13,409,000, or 68.8%, for the quarter ended March 31, 2009, when compared to the same period one year ago. This decrease was a result of lower pretax income. The effective tax rate for the quarter ended March 31, 2009, was 35.54%, compared to 35.47% for the same period one year ago.

**Item 3. Quantitative and Qualitative Disclosures About Market Risk**

Management believes that there have been no material changes in the Company's quantitative and qualitative information about market risk since September 30, 2008. **Item 4. Controls and Procedures**

As of the end of the period covered by this report, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's President and Chief Executive Officer along with the Company's Executive Vice President and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to the Securities Exchange Act of 1934 ( Exchange Act ) Rule 13a-15. Based upon that evaluation, the Company's President and Chief Executive Officer, along with the Company's Executive Vice President and Chief Financial Officer, concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company (including its consolidated subsidiaries) required to be included in the Company's periodic SEC filings. There have been no significant changes in the Company's internal controls or in other factors that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Disclosure controls and procedures are Company controls and other procedures that are designed to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by the Company in the reports that it files under the Exchange Act is accumulated and communicated to the Company's management, including its President and Chief Executive Officer and Executive Vice President and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.
