UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended: March 31, 2019

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 001-08896

CAPSTEAD MORTGAGE CORPORATION

(Exact name of Registrant as specified in its Charter)

Maryland

(State or other jurisdiction of

incorporation or organization)

8401 North Central Expressway, Suite 800, Dallas, TX

(Address of principal executive offices)

(214) 874-2323

75-2027937

(I.R.S.

Employer

Identification

No.)

75225-4404

(Zip Code)

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

YES NO

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). YES NO

Edgar Filing: CAPSTEAD MORTGAGE CORP - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of “large accelerated filer,” “accelerated filer,” “smaller reporting company,” and “emerging growth company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). YES NO

APPLICABLE ONLY TO CORPORATE ISSUERS:

Indicate the number of shares outstanding of each of the issuer’s classes of common stock, as of the latest practicable date.

CAPSTEAD MORTGAGE CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

MARCH 31, 2019

(unaudited)

NOTE 1 — BUSINESS

Capstead Mortgage Corporation operates as a self-managed real estate investment trust for federal income tax purposes (a “REIT”) and is based in Dallas, Texas. Unless the context otherwise indicates, Capstead Mortgage Corporation, together with its subsidiaries, is referred to as “Capstead” or the “Company.” Capstead earns income from investing in a leveraged portfolio of residential mortgage pass-through securities consisting almost exclusively of adjustable-rate mortgage (“ARM”) securities issued and guaranteed by government-sponsored enterprises, either Fannie Mae, Freddie Mac, or by an agency of the federal government, Ginnie Mae. Residential mortgage pass-through securities guaranteed by Fannie Mae, Freddie Mac or Ginnie Mae are referred to as “Agency Securities” and are considered to have limited, if any, credit risk.

NOTE 2 — BASIS OF PRESENTATION

Interim Financial Reporting

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States (“GAAP”) for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the quarter ended March 31, 2019 are not necessarily indicative of the results that may be expected for the calendar year ending December 31, 2019. For further information refer to the audited consolidated financial statements and footnotes thereto included in the Company’s annual report on Form 10-K for the year ended December 31, 2018.

Change in Use of Hedge Accounting

On March 1, 2019 the Company discontinued its use of hedge accounting on its interest rate swaps related to Secured borrowings, while retaining hedge accounting for swaps related to Unsecured borrowings. See NOTE 6 for additional information regarding these changes in the Company’s use of derivative instruments (“Derivatives”) and its related risk management policies.

Recent Accounting Pronouncements

In February 2016, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update No. 2016-02, Leases (“ASU 2016-02”) which requires entities who are lessees to recognize a right-of-use asset and a lease liability arising from those leases on the balance sheet. ASU 2016-02 is effective for fiscal years beginning after December 15, 2018 and interim periods within those fiscal years. The Company adopted ASU 2016-02 on January 1, 2019, which had no material effect on the Company’s results of operations, financial condition and cash flows.

NOTE 3 — NET INCOME (LOSS) PER COMMON SHARE

Basic net income (loss) per common share is computed by dividing net income, after deducting dividends paid or accrued on preferred stock and allocating earnings to equity awards deemed to be participating securities pursuant to the two-class method, by the average number of shares of common stock outstanding, calculated excluding unvested stock awards. Participating securities include unvested equity awards that contain non-forfeitable rights to dividends prior to vesting.

Diluted net income (loss) per common share is computed by dividing the numerator used to compute basic net income (loss) per common share by the denominator used to compute basic net income (loss) per common share, further adjusted for the dilutive effect, if any, of equity awards and shares of preferred stock when and if convertible into shares of common stock. Shares of the Company's 7.50% Series E Cumulative Redeemable Preferred Stock are contingently convertible into shares of common stock only upon the occurrence of a change in control and therefore are not considered dilutive securities absent such an occurrence. Any unvested equity awards that are deemed participating securities are included in the calculation of diluted net income (loss) per common share, if dilutive, under either the two-class method or the treasury stock method, depending upon which method produces the more dilutive result. Components of the computation of basic and diluted net income (loss) per common share were as follows for the indicated periods (dollars in thousands, except per share amounts):

	Quarter Ended March 31	
	2019	2018
Basic net income (loss) per common share		
Numerator for basic net income (loss) per common share:		
Net (loss) income	\$(7,746)	\$19,420
Preferred stock dividends	(4,842)	(4,842)
Earnings participation of unvested equity awards	(19)	(32)
	\$(12,607)	\$14,546
Denominator for basic net income (loss) per common share:		
Average number of shares of common stock outstanding	85,549	93,867
Average unvested stock awards outstanding	(655)	(442)
	84,894	93,425
	\$(0.15)	\$0.16
Diluted net income (loss) per common share		
Numerator for diluted net income (loss) per common share	\$(12,607)	\$14,546
Denominator for diluted net income (loss) per common share:		
Denominator for basic net income (loss) per common share	84,894	93,425
Net effect of dilutive equity awards	—	81
	84,894	93,506
	\$(0.15)	\$0.16

Securities that could be potentially dilutive in the future that were not included in the computation of diluted net income (loss) per common share include 1.2 million anti-dilutive equity awards excludable under the treasury stock method for the quarter ended March 31, 2019. There were no potentially dilutive securities excluded from the

computation of diluted net income (loss) per common share for the quarter ended March 31, 2018.

-9-

NOTE 4 — RESIDENTIAL mortgage investments

Residential mortgage investments classified by collateral type and interest rate characteristics as of the indicated dates were as follows (dollars in thousands):

	\$ 11,658,862	\$ 333,765	\$ 11,992,627	\$ 11,965,381	3.39	2.34	

(a) Includes unrealized gains and losses for residential mortgage investments classified as available-for-sale.

(b) Net WAC, or weighted average coupon, is the weighted average interest rate of the mortgage loans underlying the indicated investments net of servicing and other fees as of the indicated balance sheet date. Net WAC is expressed as a percentage calculated on an annualized basis on the unpaid principal balances of the mortgage loans underlying these investments.

(c) Average yield is presented for the quarter then ended and is based on the cash component of interest income expressed as a percentage calculated on an annualized basis on average amortized cost basis (the “cash yield”) less the effects of amortizing investment premiums. Investment premium amortization is determined using the interest method and incorporates actual and anticipated future mortgage prepayments.

Agency Securities are considered to have limited, if any, credit risk because the timely payment of principal and interest is guaranteed by Fannie Mae and Freddie Mac, which are federally chartered corporations, or Ginnie Mae, which is an agency of the federal government. Residential mortgage loans held by Capstead were originated prior to 1995 when the Company operated a mortgage conduit and the related credit risk is borne by the Company. Collateral for structured financings consists of private residential mortgage securities that are backed by loans obtained through this mortgage conduit and are pledged to secure repayment of related structured financings. Credit risk for these securities is borne by

the related bondholders. The maturity of Residential mortgage investments is directly affected by prepayments of principal on the underlying mortgage loans. Consequently, actual maturities will be significantly shorter than the portfolio's weighted average contractual maturity of 287 months.

Fixed-rate investments consist of residential mortgage loans and Agency Securities backed by residential mortgage loans with fixed rates of interest. ARMs are adjustable-rate Agency Securities backed by residential mortgage loans that have coupon interest rates that adjust at least annually to more current interest rates or begin doing so after an initial fixed-rate period. After the initial fixed-rate period, if applicable, mortgage loans underlying ARM securities typically either (i) adjust annually based on specified margins over the one-year London interbank offered rate ("LIBOR") or the one-year Constant Maturity U.S. Treasury Note Rate ("CMT"), (ii) adjust semiannually based on specified margins over six-month LIBOR, or (iii) adjust monthly based on specified margins over indices such as one-month LIBOR, the Eleventh District Federal Reserve Bank Cost of Funds Index, or over a rolling twelve month average of the one-year CMT index, usually subject to periodic and lifetime limits, or caps, on the amount of such adjustments during any single interest rate adjustment period and over the contractual term of the underlying loans.

Capstead classifies its ARM investments based on average number of months until coupon reset ("months to roll"). Months to roll is an indicator of asset duration which is a measure of market price sensitivity to interest rate movements. A shorter duration generally indicates less interest rate risk. Current-reset ARM investments have months to roll of less than 18 months while longer-to-reset ARM investments have months to roll of 18 months or greater. As of March 31, 2019, the average months to roll for the Company's \$6.10 billion (amortized cost basis) in current-reset ARM investments was approximately six months while the average months to roll for the Company's \$6.11 billion (amortized cost basis) in longer-to-reset ARM investments was approximately 43 months.

NOTE 5 — SECURED borrowings

Capstead pledges its Residential mortgage investments as collateral for secured borrowings primarily in the form of repurchase arrangements with commercial banks and other financial institutions (collectively referred to as "counterparties" or "lending counterparties"). Repurchase arrangements entered into by the Company involve the sale and a simultaneous agreement to repurchase the transferred assets at a future date and are accounted for as financings. The Company maintains the beneficial interest in the specific securities pledged during the term of each repurchase arrangement and receives the related principal and interest payments.

The terms and conditions of secured borrowings are negotiated on a transaction-by-transaction basis when each such borrowing is initiated or renewed. The amount borrowed is generally equal to the fair value of the securities pledged, as determined by the lending counterparty, less an agreed-upon discount, referred to as a "haircut." Interest rates are generally fixed based on prevailing rates corresponding to the terms of the borrowings. Interest may be paid monthly or at the termination of a borrowing at which time the

Company may enter into a new borrowing at prevailing haircuts and rates with the same lending counterparty or repay that counterparty and negotiate financing with a different lending counterparty. None of the Company's lending counterparties are obligated to renew or otherwise enter into new borrowings at the conclusion of existing borrowings. In response to declines in fair value of pledged securities due to changes in market conditions or the publishing of monthly security pay-down factors, lending counterparties typically require the Company to post additional securities as collateral, pay down borrowings or fund cash margin accounts with the counterparties in order to re-establish the agreed-upon collateral requirements. These actions are referred to as margin calls. Conversely, in response to increases in fair value of pledged securities, the Company routinely margin calls its lending counterparties in order to have previously pledged collateral returned.

Secured borrowings (and related pledged collateral, including accrued interest receivable), classified by collateral type and remaining maturities, and related weighted average borrowing rates as of the indicated dates were as follows (dollars in thousands):

	Collateral Carrying Amount	Accrued Interest Receivable	Borrowings Outstanding	Average Borrowing Rates	
Collateral Type					
March 31, 2019					
Borrowings under repurchase arrangements with					
maturities of 30 days or less:

NOTE 6 — USE OF DERIVATIVES, OFFSETTING DISCLOSURES AND CHANGES IN OTHER COMPREHENSIVE INCOME BY COMPONENT

Capstead attempts to mitigate exposure to higher interest rates by entering into one- and three-month LIBOR-indexed, pay-fixed, receive-variable, interest rate swap agreements for terms of two and three years. These Derivatives hedge the variability of the underlying benchmark interest rate of current and forecasted 30- to 90-day secured borrowings. From an economic perspective, this hedge relationship establishes a relatively stable fixed rate on related borrowings because the variable-rate payments received on the swap agreements offset a significant portion of the interest accruing on the borrowings, leaving the fixed-rate swap payments as the Company's effective borrowing rate, subject to certain adjustments. Additionally, changes in fair value of these Derivatives tend to partially offset opposing changes in fair value of the Company's residential mortgage investments that can occur in response to changes in market interest rates.

Historically, the Company designated its interest rate swaps related to secured borrowings as hedges for accounting purposes, whereby changes in the swaps' fair values were recorded in Accumulated other comprehensive income (loss). The Company discontinued hedge accounting on March 1, 2019 for these swaps and, for GAAP purposes, related changes in the fair value are recorded in the Company's consolidated statement of operations beginning on that date. Also, for GAAP purposes, related net unrealized gains recorded in Accumulated other comprehensive income (loss) through February 28, 2019 are being recognized as a component of interest expense in the Company's consolidated statement of operations over the remaining lives of these swaps.

During the quarter ended March 31, 2019, Capstead entered into swap agreements with notional amounts of \$2.6 billion requiring fixed-rate interest payments averaging 2.55%. During the quarter ended March 31, 2019, \$950 million notional amount of swaps requiring fixed-rate interest payments averaging 1.58% matured. At March 31, 2019 the Company's swap positions related to secured borrowings had the following characteristics (dollars in thousands):

Period of	Notional	Average Fixed-Rate
Contract Expiration	Amount	Payment Requirement
Second quarter 2019	\$1,650,000	1.33 %
Third quarter 2019	550,000	1.40
Fourth quarter 2019	700,000	1.72
First quarter 2020	600,000	2.07
Second quarter 2020	600,000	2.68
Third quarter 2020	200,000	1.64
Fourth quarter 2020	200,000	2.04
First quarter 2021	100,000	2.67
Second quarter 2021	200,000	2.87
Fourth quarter 2021	800,000	2.85
First quarter 2022	2,600,000	2.55
	\$8,200,000	

The Company has three-month LIBOR-indexed, pay-fixed, receive-variable, interest rate swap agreements with notional amounts totaling \$100 million and average fixed rates of 4.09% with 20-year payment terms coinciding with the floating-rate terms of the Company's Unsecured borrowings. These Derivatives remain designated as cash flow hedges for accounting purposes of the variability of the underlying contractual rate associated with the floating-rate terms of these long-term borrowings which began on various dates between October 2015 and September 2016.

Interest rate swap agreements are measured at fair value on a recurring basis primarily using Level Two Inputs in accordance with ASU 2010-06, Fair Value Measurements and Disclosures (Topic 820). Fair value estimates for these Derivatives are calculated using the net discounted future fixed cash payments and the discounted future variable cash receipts which are based on expected future interest rates derived from observable market interest rate curves. The Company also incorporates both its own nonperformance risk and its counterparties' nonperformance risk in determining fair value. In considering the effect of nonperformance risk, the Company considered the impact of netting and credit enhancements, such as collateral postings and guarantees, and has concluded that counterparty risk is not significant to the overall valuation.

The fair value of exchange-traded swap agreements hedging Secured borrowings is calculated including accrued interest and net of variation margin amounts received or paid through the exchange, resulting in separately presenting on the balance sheet a significantly reduced fair value amount representing the unsettled fair value of these Derivatives. Non-exchange traded swap agreements held as cash flow hedges of Unsecured borrowings are reported at fair value calculated excluding accrued interest. At March 31, 2019, Cash collateral receivable from interest rate swap counterparties includes initial margin for all swap agreements and variation margin for non-exchange traded swap agreements. Accrued interest for non-exchange traded swap agreements is included in Accounts payable and accrued expenses.

The following tables include fair value and other related disclosures regarding all Derivatives held as of and for the indicated periods (in thousands):

	Balance Sheet Location	March 31 2019	December 31 2018
Balance sheet-related			
Swap agreements in a gain position (an asset) related to			
secured borrowings	(a)	\$ 7,037	\$ –
Swap agreements in a loss position (a liability) related to			
unsecured borrowings	(a)	(21,903)	(17,834)
Related net interest payable	(b)	(871)	(372)
		\$ (15,737)	\$ (18,206)

(a) The fair value of Derivatives with unrealized gains are aggregated and recorded as an asset on the face of the Balance Sheets separately from the fair value of Derivatives with unrealized losses that are recorded as a

liability. The amount of unrealized gains, net of unrealized losses, included in Accumulated other comprehensive income (loss) and scheduled to be recognized in the Statements of Operations over the next twelve months primarily in the form of amortization of net unrealized gains on de-designated interest rate swaps and fixed-rate swap payments in excess of current market rates on swaps related to unsecured borrowings totaled \$13.3 million at March 31, 2019.

(b) Included in “Accounts payable and accrued expenses” on the face of the Balance Sheets.

	\$98,317	7.74		\$98,292	7.74	

NOTE 8 — FAIR VALUE

The fair value of Capstead's financial assets and liabilities are influenced by changes in, and market expectations for changes in, interest rates and market liquidity conditions, as well as other factors beyond the control of management. With the exception of the fair value of lending counterparty investments, all fair values were determined using Level 2 Inputs in accordance with ASU 2010-06, Fair Value Measurements and Disclosures (Topic 820). Lending counterparty investments are nonmarketable securities classified as assets for which Level 3 Inputs are used to determine fair value. These assets are considered strategic investments that are carried at cost and periodically valued and evaluated for impairment. No impairment charges have been recorded relative to these investments and the Company's cost basis is deemed to approximate fair value.

Residential mortgage investments, nearly all of which are mortgage securities classified as available-for-sale, are measured at fair value on a recurring basis. In determining fair value estimates the Company considers recent trading activity for similar investments and pricing levels indicated by lenders in connection with designating collateral for secured borrowings, provided such pricing levels are considered indicative of actual market clearing transactions. In determining fair value estimates for Secured borrowings with initial terms of greater than 120 days, the Company considers pricing levels indicated by lenders for entering into new transactions using similar pledged collateral with terms equal to the remaining terms of these borrowings. The Company currently bases fair value for Unsecured borrowings on discounted cash flows using Company estimates for market yields. Excluded from these disclosures are financial instruments for which cost basis is deemed to approximate fair value due primarily to the short duration of these instruments, which are valued using primarily Level 1 measurements, including Cash and cash equivalents, Cash collateral receivable from, or payable to, interest rate swap counterparties, receivables, payables and secured borrowings with initial terms of 120 days or less. See NOTE 6 for information relative to the valuation of interest rate swap agreements.

Fair value-related disclosures for financial instruments other than debt securities were as follows as of the indicated dates (in thousands):

		March 31, 2019		December 31, 2018	
	Fair Value Hierarchy	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial assets:

	March 31, 2019 Fair	December 31, 2018 Unrealized	December 31, 2018 Fair	December 31, 2018 Unrealized

Edgar Filing: CAPSTEAD MORTGAGE CORP - Form 10-Q

	Value	Loss	Value	Loss
Securities in an unrealized loss position:				
One year or greater	\$4,996,754	\$ 62,772	\$4,736,171	\$ 83,407
Less than one year	578,144	1,259	1,475,120	8,561
	\$5,574,898	\$ 64,031	\$6,211,291	\$ 91,968

Capstead's investment strategy involves managing a leveraged portfolio of relatively short-duration ARM Agency Securities and management expects these securities will be held until payoff absent a major shift in strategy or a severe contraction in the Company's ability to obtain financing to support its portfolio. Declines in fair value caused by increases in interest rates are typically modest for investments in short-duration ARM Agency Securities compared to investments in longer-duration ARM or fixed-rate assets. These declines are generally recoverable in a relatively short period of time as coupon interest rates on the underlying mortgage loans reset to rates more reflective of the then-current interest rate environment.

From a credit risk perspective, federal government support for Fannie Mae and Freddie Mac helps ensure that fluctuations in value due to credit risk associated with these securities will be limited. Given that (a) any existing unrealized losses on mortgage securities held by the Company are not attributable to credit risk and declines in fair value of ARM securities due to changes in interest rates are generally recoverable in a relatively short period of time, (b) the Company typically holds its investments to maturity, and (c) it is more likely than not that the Company will not be required to sell any of its investments given the resiliency of the financing market for Agency Securities, none of these investments were considered other-than-temporarily impaired at March 31, 2019.

NOTE 9 — EQUITY INCENTIVE PLAN

All equity-based awards and other long-term incentive awards are made pursuant to the Company's Amended and Restated 2014 Flexible Incentive Plan that was approved by stockholders in May 2014. At March 31, 2019, this plan had 2,919,087 shares of common stock remaining available for future issuances.

Long-term Equity-based Awards – Performance-based Restricted Stock Units (“RSUs”)

RSU activity and related information for the quarter ended March 31, 2019 is summarized below:

	Number of Shares	Weighted Average Grant Date Fair Value
Unvested RSU awards outstanding at December 31, 2018	501,858	\$ 9.02
Grants	206,914	6.87
Vestings	(34,135)	8.03
Forfeitures	(135,692)	8.03
Unvested RSU awards outstanding at March 31, 2019	538,945	8.50

During the quarters ended March 31, 2019 and 2018, the Company recognized in Compensation-related expense \$578,000 and \$3,000, respectively, related to this program. Unrecognized estimated compensation expense for these awards totaled \$2.2 million at March 31, 2019, to be expensed over a weighted average period of 1.6 years (assumes estimated attainment levels for the related performance metrics will be met).

Dividends accrue from the date of grant and will be paid in cash to the extent the units convert into shares of common stock following completion of related performance periods. If these shares do not vest, the related dividends will be forfeited. Included in Common stock dividends payable at March 31, 2019 are estimated dividends payable pertaining to these awards of \$105,000.

Long-term Equity-based Awards – Restricted Stock Awards

Restricted stock award activity for the quarter ended March 31, 2019 is summarized below:

	Number of Shares	Weighted Average Grant Date Fair Value
--	------------------------	---

Edgar Filing: CAPSTEAD MORTGAGE CORP - Form 10-Q

Unvested stock awards outstanding at December 31, 2018	461,091	\$ 9.01
Grants	284,655	6.76
Vestings	(99,917)	8.49
Unvested stock awards outstanding at March 31, 2019	645,829	8.10

During the quarters ended March 31, 2019 and 2018, the Company recognized in Compensation-related expense \$408,000 and \$307,000, respectively, related to amortization of the grant date fair value of employee stock awards. In addition, during the quarters ended March 31, 2019 and 2018, the Company recognized in Other general and administrative expense \$123,000 and \$105,000, respectively, related to amortization of the grant date fair value of director stock awards. Unrecognized compensation expense for unvested stock awards for employees and directors totaled \$3.2 million as of March 31, 2019, to be expensed over a weighted average period of 1.5 years.

Service-based stock awards issued to non-executive employees and to directors receive dividends on a current basis without risk of forfeiture if the related awards do not vest. Stock awards issued to executives defer the payment of dividends accruing between the grant dates and the end of related service periods. If these awards do not vest, the related accrued dividends will be forfeited. Included in Common stock dividend payable at March 31, 2019 and 2018 are estimated dividends payable pertaining to these awards totaling \$191,000.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FINANCIAL CONDITION

Overview

Capstead operates as a self-managed REIT earning income from investing in a leveraged portfolio of residential mortgage pass-through securities consisting almost exclusively of short-duration ARM Agency Securities, which reset to more current interest rates within a relatively short period of time and are considered to have limited, if any, credit risk. See NOTE 1 to the consolidated financial statements (included under Item 1 of this report) for defined terms used in this discussion and analysis. By investing in short-duration ARM Agency Securities, the Company is positioned to benefit from future recoveries in financing spreads that typically contract during periods of rising interest rates and experience smaller fluctuations in portfolio values compared to leveraged portfolios containing a significant amount of longer-duration ARM or fixed-rate mortgage securities. Duration is a common measure of market price sensitivity to interest rate movements. A shorter duration generally indicates less interest rate risk.

On March 1, 2019 the Company discontinued its use of hedge accounting on its interest rate swaps related to secured borrowings and introduced a core earnings metric. Consequently, GAAP net loss for the quarter of \$8 million or \$(0.15) per diluted common share included \$26 million in unrealized losses of fair value of these derivatives and amortization of the net unrealized gains of \$3 million from the date of de-designation. The Company reported core earnings of \$15 million or \$0.12 per diluted common share for the quarter ended March 31, 2019. See "Reconciliation of GAAP and non-GAAP Financial Measures" for more information on core earnings. Earnings in the first quarter of 2019 benefited from higher cash yields, lower investment premium amortization and favorable terms on new interest rate swap agreements entered into during the quarter, which together with higher portfolio balances more than offset the effects of higher borrowing costs resulting from the December 2018 federal funds rate increase.

Capstead finances its residential mortgage investments by leveraging its long-term investment capital with secured borrowings consisting primarily of borrowings under repurchase arrangements with commercial banks and other financial institutions. Long-term investment capital totaled \$1.16 billion at March 31, 2019, consisting of \$814 million of common and \$251 million of preferred stockholders' equity (recorded amounts), together with \$98 million of unsecured borrowings maturing in 2035 and 2036. Long-term investment capital increased \$6 million during the quarter ended March 31, 2019 as a result of increases in portfolio valuations that exceeded decreases in swap gains and core earnings in excess of dividends.

Book value per common share (total stockholders' equity, less liquidation preferences for outstanding shares of preferred stock, divided by outstanding shares of common stock) increased \$0.04 or 0.4% to \$9.43 per share, as increases in portfolio valuations and core earnings in excess of dividends exceeded decreases in swap valuations and stock compensation-related activity.

Capstead's residential mortgage investments portfolio increased \$263 million during the first three months of 2019 to \$12.23 billion at March 31, 2019, with acquisitions exceeding portfolio runoff by \$214 million (principal amount) with the remaining increase primarily attributable to increases in unrealized gains on the portfolio. Secured borrowings increased \$243 million to \$11.22 billion. Portfolio leverage (secured borrowings divided by long-term investment capital) increased to 9.65 to one at March 31, 2019 from 9.49 to one at December 31, 2018. Management believes current portfolio leverage levels represent an appropriate use of leverage under current market conditions for a portfolio consisting of seasoned, short-duration ARM Agency Securities.

-21-

Book Value per Common Share

All but \$2 million of Capstead's residential mortgage investments portfolio and all of its interest rate swap agreements (also referred to as "Derivatives") are recorded at fair value on the Company's balance sheet and are therefore included in the calculation of book value per common share. See NOTE 8 to the consolidated financial statements (included under Item 1 of this report) for additional disclosures regarding fair values of financial instruments held or issued by the Company.

Fair value is impacted by market conditions, including changes in interest rates, and the availability of financing at reasonable rates and leverage levels, among other factors. The Company's investment strategy attempts to mitigate these risks by focusing on investments in Agency Securities, which are considered to have little, if any, credit risk and are collateralized by ARM loans with interest rates that reset periodically to more current levels, generally within five years. Because of these characteristics, the fair value of the Company's portfolio is considerably less vulnerable to significant pricing declines caused by credit concerns or rising interest rates compared to leveraged portfolios containing a significant amount of non-agency securities or longer-duration ARM and/or fixed-rate Agency Securities.

Book value per share as of March 31, 2019 was \$9.43, an increase of \$0.04 or 0.4% over December 31, 2018 book value of \$9.39. The first quarter increase in book value was attributable to \$0.51 in higher portfolio valuations and \$0.04 of core earnings in excess of dividends, partially offset by \$0.49 in lower swap valuations and \$0.02 related to stock compensation-related activity.

Residential Mortgage Investments

Capstead's portfolio of residential mortgage investments increased \$263 million during the first quarter of 2019 to \$12.23 billion, with acquisitions exceeding portfolio runoff by \$214 million (principal amount) with the remaining increase primarily attributable to increases in unrealized gains on the portfolio.

Capstead's investment strategy focuses on managing a portfolio of residential mortgage investments consisting almost exclusively of ARM Agency Securities. Agency Securities are considered to have limited, if any, credit risk because the timely payment of principal and interest is guaranteed by Fannie Mae and Freddie Mac, which are federally chartered corporations, or Ginnie Mae, which is an agency of the federal government. Federal government support for Fannie Mae and Freddie Mac has largely alleviated market concerns regarding the ability of Fannie Mae and Freddie Mac to fulfill their guarantee obligations.

By focusing on investing in short-duration ARM Agency Securities, changes in fair value caused by changes in interest rates are typically relatively modest compared to changes in fair value of longer-duration ARM or fixed-rate assets. Declines in fair value caused by increases in interest rates are generally recoverable in a relatively short period of time as coupon interest rates on the underlying mortgage loans reset to rates more reflective of the then-current interest rate environment. This investment strategy positions the Company to benefit from potential recoveries in financing spreads that typically contract during periods of rising interest rates.

ARM securities are backed by mortgage loans that generally have coupon interest rates that adjust at least annually to more current interest rates or begin doing so after an initial fixed-rate period. These coupon adjustments are usually subject to periodic and lifetime limits, or caps, on the amount of such adjustments during any single interest rate adjustment period and over the contractual term of the underlying loans. After the initial fixed-rate period, if applicable, the coupon interest rates of mortgage loans underlying the Company's ARM securities typically adjust

either (a) annually based on specified margins over the one-year London interbank offered rate (“LIBOR”) or the one-year Constant Maturity U.S. Treasury Note Rate (“CMT”), (b) semiannually based on specified margins over six-month LIBOR, or (c) monthly based

-22-

on specified margins over indices such as one-month LIBOR, the Eleventh District Federal Reserve Bank Cost of Funds Index, or over a rolling twelve month average of the one-year CMT index.

Capstead classifies its ARM securities based on the average length of time until the loans underlying each security reset to more current rates (“months-to-roll”) (less than 18 months for “current-reset” ARM securities, and 18 months or greater for “longer-to-reset” ARM securities). The Company’s ARM holdings featured the following characteristics at March 31, 2019 (dollars in thousands):

			Fully	Average	Average	Average	Months
	Amortized	Net	Indexed	Net	Periodic	Lifetime	To
ARM Type	Cost Basis ^(a)	WAC ^(b)	WAC ^(b)	Margins ^(b)	Caps ^(b)	Caps ^(b)	Roll
Current-reset ARMs:							
Fannie Mae Agency Securities	\$3,404,328	4.12	% 4.25	% 1.66	% 2.54	% 5.06	% 6.2
Freddie Mac Agency Securities	1,503,221	4.07	4.44	1.77	2.00	4.97	7.3
Ginnie Mae Agency Securities	1,188,315	3.60	3.91	1.51	1.05	4.68	6.2
Residential mortgage loans	810	3.90	4.65	2.06	1.75	11.10	6.7
(50% of total)	6,096,674	4.01	4.23	1.66	2.12	4.97	6.5
Longer-to-reset ARMs:							
Fannie Mae Agency Securities	2,856,488	2.98	4.19	1.61	3.29	5.00	41.8
Freddie Mac Agency Securities	1,341,270	2.94	4.35	1.64	3.01	5.07	39.6
Ginnie Mae Agency Securities	1,916,419	3.33	3.90	1.50	1.00	5.00	46.7
(50% of total)	6,114,177	3.08	4.14	1.58	2.51	5.02	42.9
	\$12,210,851	3.54	4.18	1.62	2.32	4.99	24.8
Gross WAC (rate paid by							
borrowers) ^(c)							
		4.13					

(a) Amortized cost basis represents the Company’s investment (unpaid principal balance plus unamortized investment premiums) before unrealized gains and losses. At March 31, 2019, the ratio of amortized cost basis to unpaid principal balance for the Company’s ARM holdings was 102.86. This table excludes \$1 million in fixed-rate agency-guaranteed mortgage pass-through securities, residential mortgage loans and private residential mortgage pass-through securities held as collateral for structured financings.

(b) Net WAC, or weighted average coupon, is the weighted average interest rate of the mortgage loans underlying the indicated investments, net of servicing and other fees as of the indicated date. Net WAC is expressed as a percentage calculated on an annualized basis on the unpaid principal balances of the mortgage loans underlying these investments. As such, it is similar to the cash yield on the portfolio which is calculated using amortized cost basis. Fully indexed WAC represents the weighted average coupon upon one or more resets using interest rate indexes and net margins as of the indicated date. Average net margins represent the weighted average levels over the underlying indexes that the portfolio can adjust to upon reset, usually subject to initial, periodic and/or lifetime caps on the amount of such adjustments during any single interest rate adjustment period and over the contractual term of the underlying loans. ARM securities with initial fixed-rate periods of five years or longer typically have either 200 or 500 basis point initial caps with 200 basis point periodic caps. Additionally, certain ARM securities held by the Company are subject only to lifetime caps or are not subject to a cap. For presentation purposes, average periodic caps in the table above reflect initial caps until after an ARM security has reached its initial reset date and lifetime caps, less the current net WAC, for ARM securities subject only to lifetime caps. At quarter-end, 77% of current-reset ARMs were subject to periodic caps averaging 1.78%; 16% were subject to initial caps

averaging 2.19%; 6% were subject to lifetime caps averaging 6.28%; and less than 1% were uncapped. All longer-to-reset ARM securities at March 31, 2019 were subject to initial caps.

(c) Gross WAC is the weighted average interest rate of the mortgage loans underlying the indicated investments, including servicing and other fees paid by borrowers, as of the indicated balance sheet date.

Approximately 16%, or \$957 million of the Company's current-reset ARM securities with average net WACs of 2.86% and fully-indexed WACs of 4.15% will reset in rate for the first time within the next 18 months. After consideration of any applicable initial fixed-rate periods, at March 31, 2019 approximately 92%, 4% and 3% of the Company's ARM securities were backed by mortgage loans that reset annually, semi-annually and monthly, respectively, while approximately 1% reset every five years. Approximately 5% of the Company's ARM securities were backed by interest-only loans, with remaining interest-only payment periods averaging 20 months at March 31, 2019. All percentages are based on averages of the characteristics of mortgage loans underlying each security and calculated using unpaid principal balances as of the indicated date.

Secured Borrowings

Capstead has traditionally financed its residential mortgage investments by leveraging its long-term investment capital with secured borrowings consisting primarily of borrowings under repurchase arrangements with commercial banks and other financial institutions that involve the sale and a simultaneous agreement to repurchase the transferred assets at a future date and are accounted for as financings. The Company maintains the beneficial interest in the specific securities pledged during the term of each repurchase arrangement and receives the related principal and interest payments.

The terms and conditions of secured borrowings are negotiated on a transaction-by-transaction basis when each such borrowing is initiated or renewed. None of the Company's counterparties are obligated to renew or otherwise enter into new borrowings at the conclusion of existing borrowings. Collateral requirements in excess of amounts borrowed (referred to as "haircuts") averaged 4.5 percent of the fair value of pledged residential mortgage pass-through securities at March 31, 2019. After considering haircuts and related interest receivable on the collateral, as well as interest payable on these borrowings, the Company had \$613 million of capital at risk with its lending counterparties at March 31, 2019. The Company did not have capital at risk with any single counterparty exceeding 6% of total stockholders' equity at March 31, 2019.

Secured borrowing rates are generally fixed based on prevailing rates corresponding to the terms of the borrowings. Interest may be paid monthly or at the termination of a borrowing at which time the Company may enter into a new borrowing at prevailing haircuts and rates with the same counterparty or repay that counterparty and negotiate financing with a different counterparty. When the fair value of pledged securities declines due to changes in market conditions or the publishing of monthly security pay-down factors, lenders typically require the Company to post additional securities as collateral, pay down borrowings or fund cash margin accounts with the counterparties in order to re-establish the agreed-upon collateral requirements, referred to as margin calls. Conversely, if collateral fair values increase, lenders are required to release collateral back to the Company pursuant to Company-issued margin calls.

As of March 31, 2019, the Company's secured borrowings totaled \$11.22 billion with 22 counterparties at average rates of 2.72%, before the effects of currently-paying interest rate swap agreements and 2.34% including the effects of these Derivatives. The Company typically uses two- and three-year term interest rate swap agreements with variable rate receipts primarily based on three-month LIBOR to help mitigate exposure to rising short-term interest rates. At quarter-end the Company held \$8.20 billion notional amount of these Derivatives with contract expirations occurring at various dates through the first quarter of 2022 and a weighted average expiration of 19 months.

Including the effects of these Derivatives, the Company's residential mortgage investments and secured borrowings had estimated durations at March 31, 2019 of 13½ months for a net duration gap of approximately zero months – see "Interest Rate Risk" for further information about the Company's sensitivity to changes in market interest rates. The Company intends to continue to manage interest rate risk associated with holding and financing its residential mortgage investments by utilizing suitable Derivatives such as interest rate swap agreements as well as longer-maturity secured borrowings, if available at attractive rates and terms.

Utilization of Long-term Investment Capital and Potential Liquidity

Capstead's investment strategy involves managing an appropriately leveraged portfolio of ARM Agency Securities that management believes can produce attractive risk-adjusted returns over the long term, while reducing, but not eliminating, sensitivity to changes in interest rates. The potential liquidity inherent in the Company's unencumbered residential mortgage investments is as important as the actual level of cash and cash equivalents carried on the balance sheet because secured borrowings generally can be increased

-24-

or decreased on a daily basis to meet cash flow requirements and otherwise manage capital resources efficiently. Potential liquidity is affected by, among other factors:

- current portfolio leverage levels,
- changes in market value of assets pledged and Derivatives held for hedging purposes as determined by lending and swap counterparties,
- mortgage prepayment levels,
- collateral requirements of lending and swap counterparties, and
- general conditions in the commercial banking and mortgage finance industries.

Capstead's utilization of its long-term investment capital and its estimated potential liquidity were as follows as of March 31, 2019 in comparison with December 31, 2018 (in thousands):

	Investments (a)	Secured Borrowings	Capital Employed	Potential Liquidity (b)	Portfolio Leverage
Residential mortgage investments	\$ 12,228,422	\$ 11,222,451	\$ 1,005,971	\$ 454,068	
Cash collateral receivable from swap counterparties, net (c)			43,325	—	
Other assets, net of other liabilities			113,899	32,433	
Balances as of March 31, 2019:	\$ 12,228,422	\$ 11,222,451	\$ 1,163,195	\$ 486,501	9.65:1
Balances as of December 31, 2018	\$ 11,965,381	\$ 10,979,362	\$ 1,157,355	\$ 501,854	9.49:1

(a) Investments are stated at balance sheet carrying amounts, which generally reflect estimated fair value as of the indicated dates.

(b) Potential liquidity is based on maximum amounts of borrowings available under existing uncommitted financing arrangements considering management's estimate of the fair value of residential mortgage investments held as of the indicated dates adjusted for other sources of liquidity such as cash and cash equivalents.

(c) Cash collateral receivable from swap counterparties is presented net of cash collateral payable to swap counterparties, if applicable, and the fair value of interest rate swap positions as of the indicated date.

In order to efficiently manage its liquidity and capital resources, Capstead attempts to maintain sufficient liquidity reserves to fund borrowing and interest rate swap margin calls under stressed market conditions, including margin calls resulting from monthly principal payments (remitted to the Company 20 to 45 days after any given month-end), as well as reasonably possible declines in the market value of pledged assets and swap positions. Should market conditions deteriorate, management may reduce portfolio leverage and increase liquidity by raising new equity capital, selling mortgage securities and/or curtailing the replacement of portfolio runoff. Additionally, the Company routinely does business with a large number of lending counterparties, which bolsters financial flexibility to address challenging market conditions and limits exposure to any individual counterparty.

Future levels of portfolio leverage will be dependent on many factors, including the size and composition of the Company's investment portfolio (see "Liquidity and Capital Resources"). Portfolio leverage increased from year-end primarily due funding increases in the portfolio. Potential liquidity declined slightly during this period primarily as a result of the increase in leverage. Management believes current portfolio leverage levels represent an appropriate use of leverage under current market conditions for a portfolio consisting of seasoned, short-duration ARM Agency Securities.

Reconciliation of GAAP and non-GAAP Financial Measures

Management believes the presentation of core earnings and core earnings per diluted common share, non-GAAP financial measures, when analyzed in conjunction with the Company's GAAP operating results, allows investors to more effectively evaluate and compare the performance of the Company to that of its peers. Historically, the Company designated its interest rate swaps related to secured borrowings as cash flow hedges for accounting purposes, whereby changes in the swaps' fair values were recorded in Accumulated other comprehensive income (loss). The Company discontinued cash flow hedge accounting on March 1, 2019 for interest rate swaps related to secured borrowings and, for GAAP purposes, related changes in the fair value of these swaps are recorded in the Company's consolidated statement of operations beginning on that date. Also, for GAAP purposes, related net unrealized gains recorded in Accumulated other comprehensive income (loss) through February 28, 2019 are being recognized as a component of interest expense in the Company's consolidated statement of operations over the remaining life of these swaps. Core earnings excludes these GAAP adjustments. The following reconciles GAAP net (loss) income to core earnings and core earnings per common share:

	Quarter Ended March 31, 2019		Quarter Ended March 31, 2018	
	Per		Per	
	Amount	Share	Amount	Share
Net (loss) income	\$(7,746)	\$(0.15)	\$19,420	\$0.16
Unrealized loss on non-designated				
Derivatives	26,237	0.31	—	—
Amortization of unrealized gain, net				
of unrealized losses on de-designated				
Derivatives ^(a)	(3,020)	(0.04)	—	—
Core earnings	\$15,471	\$0.12	\$19,420	\$0.16

(a) Consists of unrealized gains and losses included in Accumulated other comprehensive income (loss) on two- and three-year interest rate swap agreements previously designated as cash flow hedges of secured borrowings that are being amortized over these instruments' contractual terms as a component of interest expense for GAAP purposes.

Management believes that presenting financing spreads on residential mortgage investments, a non-GAAP financial measure, provides useful information for evaluating the performance of the Company's portfolio as opposed to total financing spreads because the non-GAAP measure speaks specifically to the performance of the Company's investment portfolio. The following reconciles these measures for the indicated periods:

	Quarter Ended March 31	
	2019	2018
Total financing spreads	0.42 %	0.55 %
Impact of yields on other		
interest-earning assets ^(a)	—	0.01
Impact of borrowing rates on other	0.05	0.05

interest-paying liabilities ^(a)		
Impact of amortization of unrealized		
gain in Accumulated other		
comprehensive income	(0.11)	–
Impact of net interest cash flows on		
non-designated Derivatives	0.16	–
Financing spreads on residential		
mortgage investments	0.52	0.61

(a) Other interest-earning assets consist of overnight investments and cash collateral receivable from interest rate swap counterparties. Other interest-paying liabilities consist of unsecured borrowings and, at times, cash collateral payable to interest rate swap counterparties.

Return on average common equity capital	5.33	6.12

(a) See “Reconciliation of GAAP and non-GAAP Financing Measures” for a reconciliation of these financial measures and the Company’s rationale for using these non-GAAP financial measures.

- (b) Secured borrowing rates exclude the effects of amortization of the net unrealized gains and losses included in Accumulated other comprehensive income (loss) upon de-designation on March 1, 2019 of related swaps held for hedging purposes of (0.11)% and include net interest cash flows from that date on non-designated hedges of 0.16% to better compare the components of financing spreads on residential mortgage investments with prior periods.
- (c) Excludes the effects of first quarter 2019 adjustments to 2018 incentive compensation accruals totaling \$(949,000) due to the Company's outperformance relative to its peers.

Capstead reported a GAAP net loss of \$8 million or \$(0.15) per diluted common share for the quarter ended March 31, 2019. Capstead's core earnings, a non-GAAP financial measure, totaled \$15 million or \$0.12 per diluted common share for the quarter ended March 31, 2019, compared to net income and core earnings of \$19 million or \$0.16 per diluted common share for the same period in 2018. Earnings in the first quarter of 2019 were negatively impacted by higher borrowing costs while benefiting from higher cash yields and lower investment premium amortization.

Interest income on residential mortgage investments was higher by \$14.7 million for the quarter ended March 31, 2019 compared to the same period in 2018. This increase is attributable to \$21.0 million in increases related to higher average yields, net of \$6.3 million in decreases related to lower average portfolio balances.

Yields on residential mortgage investments for the quarter ended March 31, 2019 increased 67 basis points compared to the same period in 2018, averaging 2.75% primarily due to 50 basis points in higher cash yields. This was largely due to ARM loan coupon interest rates resetting higher to more current rates and higher coupon interest rates on acquisitions. Yields benefited from smaller adjustments for investment premium amortization of 17 basis points in the first three months of 2019 compared to the same period in 2018 as a result of a lower portfolio basis, lower premiums on acquisitions and changes in prepayment estimates.

Interest expense on secured borrowings was higher by \$18.8 million for the quarter ended March 31, 2019 compared to the same period in 2018. This increase is attributable to \$23.0 million in increases related to higher average borrowing rates, net of \$4.2 million in decreases related to lower average borrowings.

Secured borrowing rates adjusted for currently-paying interest rate swap agreements held for hedging purposes increased 76 basis points for the quarter ended March 31, 2019 compared to the same period in 2018 to average 2.23%. Market conditions, including four 25 basis point increases in the Federal Funds Rate in 2018, contributed to higher borrowing rates. Swap costs were impacted by the expiration of older, lower-rate swaps and the addition of new higher-rate swaps. Resulting higher rates were partially offset by higher variable rate swap receipts as a result of higher short-term LIBOR rates and the use of more 3-month LIBOR-receive swap agreements. Average fixed-rate swap payment rates were 201 basis points for the quarter ended March 31, 2019 compared to 134 basis points for the same period in 2018. Currently-paying swap balances were higher, averaging \$7.30 billion for the quarter ended March 31, 2019, compared to \$7.16 billion for the same period in 2018. Future secured borrowing rates will be dependent on market conditions, including overall levels of market interest rates as well as the availability of longer-maturity borrowings and interest rate swap agreements at attractive rates.

Operating costs were higher in the first quarter of 2019 compared to the same period in 2018 primarily due to higher short-term incentive compensation accruals including a post year-end adjustment to short-term incentive compensation of \$631,000 to finalize the program results for the year ended December 31, 2018. Additionally, long-term incentive compensation included accrual adjustments of \$318,000 and \$(264,000) for the quarters ended March 31, 2019 and 2018, respectively, related to changes in performance-based restricted equity award vesting expectations. The Company currently anticipates operating costs expressed as an annualized percentage of long-term investment capital will be approximately 1.3% for 2019.

liquidity and capital resources

Capstead's primary sources of funds are secured borrowings and monthly principal and interest payments on its investments. Other sources of funds may include proceeds from debt and equity offerings and asset sales. The Company generally uses its liquidity to pay down secured borrowings to reduce borrowing costs and otherwise efficiently manage its long-term investment capital. Because the level of these borrowings can generally be adjusted on a daily basis, the Company's potential liquidity inherent in its unencumbered residential mortgage investments is as important as the level of cash and cash equivalents carried on the balance sheet. The table included under "Utilization of Long-term Investment Capital and Potential Liquidity" illustrates management's estimate of additional funds potentially available to the Company at March 31, 2019 and the accompanying discussion provides insight into the Company's perspective on what level of portfolio leverage to employ under current market conditions. The Company currently believes that it has sufficient liquidity and capital resources available for the acquisition of additional investments, repayments on borrowings and the payment of cash dividends as required for the Company's continued qualification as a REIT.

Capstead finances its residential mortgage investments primarily by borrowing under repurchase arrangements, the terms and conditions of which are negotiated on a transaction-by-transaction basis, when each such borrowing is initiated or renewed.

Future borrowings are dependent upon the willingness of lenders to participate in the financing of Agency Securities, lender collateral requirements and the lenders' determination of the fair value of the securities pledged as collateral, which fluctuates with changes in interest rates and liquidity conditions within the commercial banking and mortgage finance industries. None of the Company's borrowing counterparties are obligated to renew or otherwise enter into new borrowings at the conclusion of existing borrowings. Secured borrowings totaled \$11.22 billion at March 31, 2019, all maturing within 90 days. Secured borrowings began the year at \$10.98 billion and averaged \$11.16 billion during the quarter ended March 31, 2019. Average secured borrowings can differ from period-end balances for a number of reasons including portfolio growth or contraction, as well as differences in the timing of portfolio acquisitions relative to portfolio runoff.

To help mitigate exposure to rising short-term interest rates, the Company uses Derivatives supplemented with longer-maturity secured borrowings when available at attractive rates and terms. At quarter-end the Company held \$8.20 billion notional amount of portfolio financing-related interest rate swap agreements with contract expirations occurring at various dates through the first quarter of 2022 and a weighted average expiration of 19 months. Additionally, the Company entered into swap agreements effectively locking in lower fixed rates of interest during the 20-year floating rate terms of the Company's \$100 million face amount of unsecured borrowings that mature in 2035 and 2036. The Company intends to continue to utilize suitable Derivatives such as interest rate swap agreements or other derivatives and longer-maturity secured borrowings to manage interest rate risk when available at attractive rates and terms.

The Company has \$37 million remaining on its \$125 million stock repurchase program that was reactivated in November 2017. The Company did not repurchase shares during the first quarter of 2019 as capital was deployed into growing the portfolio at attractive levels. The timing, manner, price and amount of any future common and preferred issuances and any common stock repurchases will be made in the open market at the Company's discretion, subject to economic and market conditions, stock price, compliance with federal securities laws and tax regulations as well as blackout periods associated with the dissemination of important Company-specific news.

Interest Rate Risk

Because Capstead's residential mortgage investments consist almost entirely of Agency Securities, which are considered to have limited, if any, credit risk, interest rate risk is the primary market risk faced by the Company. Interest rate risk is highly sensitive to a number of factors, including economic conditions, government fiscal policy, central bank monetary policy and banking regulation. By focusing on investing in relatively short-duration ARM Agency Securities, declines in fair value caused by increases in interest rates are typically relatively modest compared to investments in longer-duration ARM or fixed-rate assets. These declines can be recovered in a relatively short period of time as coupon interest rates on the underlying mortgage loans reset to rates more reflective of the then-current interest rate environment. This strategy also positions the Company to benefit from future recoveries in financing spreads that typically contract during periods of rising interest rates.

To further reduce exposure to higher short-term interest rates, the Company uses Derivatives (currently consisting of a portfolio of interest rate swap agreements) that typically require interest payments for two- or three-year terms, as well as longer-maturity secured borrowings, if available at attractive rates and terms. These transactions lengthen the effective duration of the Company's secured borrowings to more closely match the duration of its portfolio of residential mortgage investments. Including the effects of Derivatives held to hedge changes in secured borrowing rates, at March 31, 2019 the Company's residential mortgage investments and secured borrowings had estimated durations of 13½ months for a net duration gap of approximately zero months. The Company intends to continue to manage interest rate risk associated with holding and financing its residential mortgage investments by utilizing suitable interest rate swap agreements or other derivatives and longer-maturity secured borrowings, if available at attractive rates and terms.

Capstead performs sensitivity analyses using a model to estimate the effects that specific interest rate changes can reasonably be expected to have on net interest margins and portfolio values. All investments, secured borrowings and related Derivatives held are included in these analyses. For net interest margin modeling purposes, the model incorporates management's assumptions for mortgage prepayment levels for a given interest rate change using market-based estimates of prepayment speeds for the purpose of amortizing investment premiums and reinvesting portfolio runoff. These assumptions are developed through a combination of historical analysis and expectations for future pricing behavior under normal market conditions unaffected by changes in market liquidity. For portfolio valuation modeling purposes, a static portfolio is assumed.

This model is the primary tool used by management to assess the direction and magnitude of changes in net interest margins and portfolio values resulting solely from changes in interest rates. Key modeling assumptions include mortgage prepayment speeds, adequate levels of market liquidity, current market conditions, and portfolio leverage levels. These assumptions are inherently uncertain and, as a result, modeling cannot precisely estimate the impact of higher or lower interest rates. Actual results will differ from simulated results due to the timing, magnitude and frequency of interest rate changes, other changes in market conditions, changes in management strategies and other factors.

The table below reflects the estimated impact of instantaneous parallel shifts in the yield curve on net interest margins and the fair value of Capstead's portfolio of residential mortgage investments and related Derivatives at March 31, 2019 and December 31, 2018, subject to the modeling parameters described above.

	Federal	10-year U.S.				
	Funds	Treasury	Down	Down	Up	Up
	Rate	Rate	1.00%	0.50%	0.50%	1.00%
Projected 12-month percentage						
change in net interest margins: ^(a)						
March 31, 2019	2.25-2.50 %	2.41 %	24.2 %	12.5 %	(13.8)%	(29.6)%
December 31, 2018	2.25-2.50	2.69	20.9	11.4	(12.7)	(34.4)
Projected percentage change in						
portfolio and related Derivative						
values: ^(a)						
March 31, 2019	2.25-2.50	2.41	(0.2)	(0.1)	(0.2)	(0.4)
December 31, 2018	2.25-2.50	2.69	0.1	0.1	(0.3)	(0.7)

(a) Sensitivity of net interest margins as well as portfolio and related derivative values to changes in interest rates is determined relative to the actual rates at the applicable date. Note that the projected 12-month net interest margin change is predicated on acquisitions of similar assets sufficient to replace runoff. There can be no assurance that suitable investments will be available for purchase at attractive prices, if investments made will behave in the same fashion as assets currently held or if management will choose to replace runoff with such assets.

CRITICAL ACCOUNTING POLICIES

Management's discussion and analysis of financial condition and results of operations is based upon Capstead's consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires the use of estimates and judgments that can affect the reported amounts of assets, liabilities (including contingencies), revenues and expenses, as well as related disclosures. These estimates are based on available internal and market information and appropriate valuation methodologies believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the expected useful lives and carrying values of assets and liabilities which can materially affect the determination of net income and book value per common share. Actual results may differ from these estimates under different assumptions or conditions.

Management believes the following are critical accounting policies in the preparation of Capstead's consolidated financial statements that involve the use of estimates requiring considerable judgment:

Amortization of investment premiums on residential mortgage investments – Investment premiums on residential mortgage investments are recognized in earnings as adjustments to interest income by the interest method over the estimated lives of the related assets. Amortization is affected by actual portfolio runoff (scheduled and unscheduled principal paydowns) and by estimates and judgments related to future levels of mortgage prepayments that may be necessary to achieve the required effective yield over the estimated life of the related investment.

Mortgage prepayment expectations can change based on how current and projected changes in interest rates impact the economic attractiveness of mortgage refinance opportunities, if available, and other factors such as lending industry underwriting practices and capacity constraints, regulatory changes, borrower credit profiles and the health of the economy and housing markets. Management estimates future mortgage prepayments based on these factors and past experiences with specific

investments within the portfolio. Should actual prepayment rates differ materially from these estimates, investment premiums would be expensed at a different pace.

Fair value and impairment accounting for residential mortgage investments – Nearly all of Capstead’s residential mortgage investments are held in the form of mortgage securities that are classified as available-for-sale and recorded at fair value on the balance sheet with unrealized gains and losses recorded in Stockholders’ equity as a component of Accumulated other comprehensive income (loss). Fair values fluctuate with current and projected changes in interest rates, prepayment expectations and other factors such as market liquidity conditions and the perceived credit quality of Agency Securities. Judgment is required to interpret market data and develop estimated fair values, particularly in circumstances of deteriorating credit quality and market liquidity. See NOTE 8 to the consolidated financial statements (included under Item 1 of this report) for discussion of how Capstead values its residential mortgage investments.

Generally, gains or losses are recognized in earnings only if securities are sold; however, if a decline in fair value of a mortgage security below its amortized cost occurs that is determined to be other-than-temporary, the difference between amortized cost and fair value would be recognized in earnings as a component of Other revenue (expense) if the decline was credit-related or it was determined to be more likely than not that the Company will incur a loss via an asset sale. Other-than-temporary impairment of a mortgage security due to other factors would be recognized in Accumulated other comprehensive income (loss).

Accounting for derivative instruments – Derivatives are recorded as assets or liabilities and carried at fair value. Fair values fluctuate with current and projected changes in interest rates and other factors such as the Company’s and its counterparties’ nonperformance risk. Judgment is required to develop estimated fair values.

The accounting for changes in fair value of each Derivative held depends on whether it has been designated as an accounting hedge, as well as the type of hedging relationship identified. To qualify as a cash flow hedge for accounting purposes, at the inception of the hedge relationship the Company must anticipate and document that the hedge relationship will be highly effective and must monitor ongoing effectiveness on at least a quarterly basis. As long as the hedge relationship remains highly effective, changes in fair value of the Derivative are recorded in Accumulated other comprehensive income (loss). Changes in fair value of Derivatives not held as accounting hedges, or for which the hedge relationship is deemed to no longer be highly effective and as a result hedge accounting is terminated, are recorded in earnings as a component of Other (expense) income.

The Company uses Derivatives in the form of interest rate swap agreements to hedge the variability in borrowing rates on its secured and unsecured borrowings. For Derivatives designated as accounting hedges, fixed interest payments and variable interest receipts are recorded as an adjustment to interest expense on the related designated borrowings. For Derivatives not designated as accounting hedges, fixed interest payments and variable interest receipts are recorded as a component of Other (expense) income. For Derivatives initially designated as an accounting hedge and subsequently de-designated, any unrealized gain or loss included in Accumulated other comprehensive income (loss) at the time of de-designation is amortized as an adjustment to interest expense on the related borrowings over the remaining term of the Derivatives. See NOTE 6 to the consolidated financial statements (included under Item 1 of this report) and “Financial Condition – Secured Borrowings” for additional information regarding the Company’s current use of Derivatives and its related risk management policies.

STATEMENT CONCERNING FORWARD-LOOKING STATEMENTS

This document contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include, without limitation, any statement that may predict, forecast, indicate or imply future results, performance or achievements, and may contain the words “believe,” “anticipate,” “expect,” “estimate,” “intend,” “will be,” “will likely continue,” “will likely result,” or words or phrases of similar meaning. Forward-looking statements are based largely on the expectations of management and are subject to a number of risks and uncertainties including, but not limited to, the following:

- fluctuations in interest rates and levels of mortgage prepayments;
- changes in market conditions as a result of federal corporate and individual income tax reform, federal government fiscal challenges and Federal Reserve monetary policy, including policy regarding its holdings of Agency and U.S. Treasury Securities;
- liquidity of secondary markets and credit markets, including the availability of financing at reasonable levels and terms to support investing on a leveraged basis;
- the impact of differing levels of leverage employed;
- changes in legislation or regulation affecting Agency Securities and similar federal government agencies and related guarantees;
- deterioration in credit quality and ratings of existing or future issuances of Agency Securities;
- the effectiveness of risk management strategies;
- the availability of suitable qualifying investments from both an investment return and regulatory perspective;
- the availability of new investment capital;
- the ability to maintain real estate investment trust (“REIT”) status;
- changes in legislation or regulation affecting exemptions for mortgage REITs from regulation under the Investment Company Act of 1940;
- other changes in legislation or regulation affecting the mortgage and banking industries; and
- changes in general economic conditions, increases in costs and other general competitive factors.

In addition to the above considerations, actual results and liquidity are affected by other risks and uncertainties which could cause actual results to be significantly different from those expressed or implied by any forward-looking statements included herein. It is not possible to identify all of the risks, uncertainties and other factors that may affect future results. In light of these risks and uncertainties, the forward-looking events and circumstances discussed herein may not occur and actual results could differ materially from those anticipated or implied in the forward-looking statements. Forward-looking statements speak only as of the date the statement is made and the Company undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Accordingly, readers of this document are cautioned not to place undue reliance on any forward-looking statements included herein.

For a further discussion of these and other factors that could impact our future results and performance, see “Risk Factors” under Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2018, filed with the U.S. Securities and Exchange Commission on February 22, 2019.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE OF MARKET RISKS

The information required by this Item is incorporated by reference to the information included in Item 2. “Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

Item 4. Controls and Procedures

As of March 31, 2019, an evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer (“CEO”) and Chief Financial Officer (“CFO”), of the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based on that evaluation, the Company's management, including the CEO and CFO, concluded that the Company's disclosure controls and procedures were effective as of March 31, 2019. There have been no significant changes in the Company's internal controls or in other factors that could significantly affect internal controls subsequent to March 31, 2019.

PART II. — OTHER INFORMATION

ITEM 1A. RISK FACTORS

There have been no material changes in our risk factors during the quarter ended March 31, 2019 from those previously disclosed in “Risk Factors” under Part I, Item 1A of our 2018 Form 10-K.

ITEM 6. EXHIBITS

Exhibit

Number DESCRIPTION

- 3.1 Charter, including Articles of Incorporation, Articles Supplementary for each series of preferred shares no longer outstanding and all other amendments to such Articles of Incorporation.⁽¹⁾
- 3.2 Articles Supplementary classifying and designating the Registrant’s 7.50% Series E Cumulative Redeemable Preferred Stock, liquidation preference \$25.00 per share, par value \$0.10 per share.⁽²⁾
- 3.3 Amended and Restated Bylaws.⁽³⁾
- 4.1 Specimen of Common Stock Certificate.⁽⁴⁾
- 4.2 Specimen of stock certificate evidencing the 7.50% Series E Cumulative Redeemable Preferred Stock of the Registrant, liquidation preference \$25.00 per share, par value \$0.10 per share.⁽²⁾
- 4.3 Junior Subordinated Indenture dated September 26, 2005.⁽⁵⁾
- 4.4 Indenture dated December 15, 2005.⁽⁵⁾
- 4.5 Indenture dated September 11, 2006.⁽⁵⁾
- 10.01 Amended and Restated Deferred Compensation Plan.⁽⁵⁾
- 10.02 Amended and Restated 2014 Flexible Incentive Plan.⁽⁶⁾
- 10.03 Amendment No. 1 to the Amended and Restated 2014 Flexible Incentive Plan.⁽⁷⁾
- 10.04 Second Amended and Restated Incentive Bonus Plan.⁽⁸⁾
- 10.05 Form of nonqualified stock option and stock award agreements for non-employee directors.⁽⁵⁾
- 10.06 2017 Annual Incentive Compensation Program.⁽⁹⁾
