OF 1934

For the quarterly period ended March 31, 2013

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the transition period from _____ to _____
Commission file number 001-34654

WASHINGTON FEDERAL, INC.
(Exact name of registrant as specified in its charter)

Washington
(State or other jurisdiction of
incorporation or organization)

91-1661606
(I.R.S. Employer
Identification No.)

425 Pike Street Seattle, Washington 98101
(Address of principal executive offices and zip code)
(206) 624-7930
(Registrant's telephone number, including area code)

(Former name, former address and former fiscal year, if changed since last report.)
Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files) Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

APPLICABLE ONLY TO CORPORATE ISSUERS

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Title of class: _____ at May 3, 2013

QUARTERS AND SIX MONTHS ENDED MARCH 31, 2013 AND 2012
(UNAUDITED)

NOTE A – Summary of Significant Accounting Policies

The consolidated unaudited interim financial statements included in this report have been prepared by Washington Federal, Inc. (“The Company”). The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (“GAAP”) requires management to make estimates and assumptions that affect amounts reported in the financial statements. Actual results could differ from these estimates. In the opinion of management, all adjustments (consisting only of normal recurring accruals) necessary for a fair presentation are reflected in the interim financial statements. The September 30, 2012 Consolidated Statement of Financial Condition was derived from audited financial statements.

The information included in this Form 10-Q should be read in conjunction with Company’s 2012 Annual Report on Form 10-K (“2012 Form 10-K”) as filed with the SEC. Interim results are not necessarily indicative of results for a full year.

The significant accounting policies used in preparation of our consolidated financial statements are disclosed in our 2012 Form 10-K. Other than as discussed below, there have not been any material changes in our significant accounting policies compared to those contained in our 2012 Form 10-K.

Off-Balance-Sheet Credit Exposures – The only material off-balance-sheet credit exposures are loans in process and unused lines of credit, which had a combined balance at March 31, 2013, excluding covered loans, of \$259,266,000.

The Company estimates losses on off-balance-sheet credit exposures by including the exposures with the related principal balance outstanding and then applying its general reserve methodology.

Certain reclassifications have been made to the financial statements to conform prior periods to current classifications.

NOTE B - Acquisitions

South Valley Bank and Trust

Effective as of the close of business October 31, 2012, Washington Federal completed the acquisition of South Valley Bank and Trust, headquartered in Klamath Falls, Oregon (“South Valley”). The acquisition provided recorded book values of \$383 million of net loans, \$107 million of net covered loans, \$735 million of deposit accounts, including \$533 million in transaction deposit accounts and 24 branch locations in Central and Southern Oregon. Total consideration paid at closing was \$44 million, including \$34 million of Washington Federal, Inc. stock and \$10 million of cash resulting from the collection of certain earn-out assets. If other earn out assets are collected over time, the total purchase price could be reduced by up to \$14 million.

The acquisition was accounted for under the acquisition method of accounting. The purchased assets and assumed liabilities were recorded at their respective acquisition date estimated fair values. The purchase accounting for acquired assets and liabilities is subject to future adjustment based on the completion of valuations. All fair value adjustment amounts currently recognized in the financial statements at March 31, 2013 were determined provisionally as the purchase accounting fair value analysis was incomplete as of March 31, 2013. The determination of whether a non-covered loan is impaired and accounted for under ASC 310 was still in process as part of the acquisition date loan valuation; therefore, all non-covered loans are categorized as acquired loans without differentiation between non-impaired and credit impaired at March 31, 2013.

Loans that were classified as non-performing loans by South Valley are no longer classified as non-performing because, at acquisition, the carrying value of the loans was adjusted to reflect fair value. Management believes that the new book value reflects an amount that will ultimately be collected.

The operating results of the Company include the operating results produced by the acquired assets and assumed liabilities for the period from November 1, 2012 to March 31, 2013.

The table below displays the adjusted fair value as of the acquisition date for each major class of assets acquired and liabilities assumed:

Most loans restructured in troubled debt restructurings ("TDRs") are accruing and performing loans where the borrower has proactively approached the Company about modification due to temporary financial difficulties. Each request is individually evaluated for merit and likelihood of success. The concession for these loans is typically a payment reduction through a rate reduction of between 100 to 200 basis points for a specific term, usually six to twelve months. Interest-only payments may also be approved during the modification period. Principal forgiveness is not an available option for restructured loans. As of March 31, 2013, single-family residential loans comprised 86.4% of TDRs.

NOTE E – Allowance for Losses on Loans

The Company has an asset quality review function that analyzes its loan portfolios and reports the results of the review to the Board of Directors on a quarterly basis. The single-family residential, HELOC and consumer portfolios are evaluated based on their performance as a pool of loans, since no single loan is individually significant or judged by its risk rating, size or potential risk of loss. The construction, land, multi-family, commercial real estate and commercial and industrial loans are risk rated on a loan by loan basis to determine the relative risk inherent in specific borrowers or loans. Based on that risk rating, the loans are assigned a grade and classified as follows:

Pass – the credit does not meet one of the definitions below.

Special mention – A special mention credit is considered to be currently protected from loss but is potentially weak. No loss of principal or interest is foreseen; however, proper supervision and Management attention is required to deter further deterioration in the credit. Assets in this category constitute some undue and unwarranted credit risk but not to the point of justifying a risk rating of substandard. The credit risk may be relatively minor yet constitutes an unwarranted risk in light of the circumstances surrounding a specific asset.

Substandard – A substandard credit is an unacceptable credit. Additionally, repayment in the normal course is in jeopardy due to the existence of one or more well defined weaknesses. In these situations, loss of principal is likely if the weakness is not corrected. A substandard asset is inadequately protected by the current sound worth and paying capacity of the borrower or of the collateral pledged, if any. Assets so classified will have a well defined weakness or weaknesses that jeopardize the liquidation of the debt. Loss potential, while existing in the aggregate amount of substandard assets, does not have to exist in individual assets risk rated substandard.

Doubtful – A credit classified doubtful has all the weaknesses inherent in one classified substandard with the added characteristic that the weakness makes collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. The probability of loss is high, but because of certain important and reasonably specific pending factors that may work to the advantage and strengthening of the asset, its

classification as an estimated loss is deferred until its more exact status may be determined. Pending factors include proposed merger, acquisition, or liquidation procedures, capital injection, perfecting liens on additional collateral, and refinancing plans.

Loss – Credits classified loss are considered uncollectible and of such little value that their continuance as a bankable asset is not warranted. This classification does not mean that the asset has absolutely no recovery or salvage value, but rather it is not practical or desirable to defer writing off this asset even though partial recovery may be affected in the

Table of Contents

 (UNAUDITED)

future. Losses should be taken in the period in which they are identified as uncollectible. Partial charge-off versus full charge-off may be taken if the collateral offers some identifiable protection.

The following table summarizes the activity in the allowance for loan losses for the quarter ended March 31, 2013 and fiscal year ended September 30, 2012:

Quarter Ended March 31, 2013	Beginning Allowance (In thousands)	Charge-offs	Recoveries	Provision & Transfers	Ending Allowance

	\$157,160	\$(84,579)) \$14,857	\$45,709	\$133,147

The Company recorded a \$0 provision for loan losses during the quarter ended March 31, 2013, while an \$18,000,000 provision was recorded for the same quarter one year ago. Non-performing assets (“NPAs”) amounted to \$246,075,000, or 1.88%, of total assets at March 31, 2013, compared to \$286,248,000, or 2.11%, of total assets one year ago. Acquired loans, including covered loans, are not classified as non-performing loans because, at acquisition, the carrying value of these loans was adjusted to reflect fair value. There was no additional provision for loan losses recorded on acquired or covered loans during the quarter ended March 31, 2013 as the associated discount is adequate to absorb potential losses. Non-accrual loans decreased from \$166,153,000 at March 31, 2012, to \$149,033,000 at March 31, 2013, a 10.3% decrease. The Company had net charge-offs of \$3,943,000 for the quarter ended March 31, 2013, compared with \$28,721,000 of net charge-offs for the same quarter one year ago. A loan is charged-off when the loss is estimable and it is confirmed that the borrower will not be able to meet its contractual obligations.

\$114,039,000 of the allowance was calculated under our general allowance methodology and the remaining \$8,845,000 was made up of specific reserves on loans that were deemed to be impaired at March 31, 2013. For the period ending March 31, 2012, \$114,039,000 of the allowance was calculated under the formulas contained in our general allowance methodology and the

Table of Contents

 QUARTERS AND SIX MONTHS ENDED MARCH 31, 2013 AND 2012
 (UNAUDITED)

remaining \$29,781,000 was made up of specific reserves on loans that were deemed to be impaired. The primary reasons for the shift in total allowance allocation from specific reserves to general reserves is due to the Company having already addressed many of the problem loans focused in the speculative construction and land A&D portfolios, combined with an increase in delinquencies and elevated charge-offs in the single family residential portfolio.

The following tables shows a summary of loans collectively and individually evaluated for impairment and the related allocation of general and specific reserves as of March 31, 2013 and September 30, 2012:

March 31, 2013	Loans Collectively Evaluated for Impairment			Loans Individually Evaluated for Impairment

NOTE F – New Accounting Pronouncements

In January 2013, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2013-01, Balance Sheet (Topic 210): Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities. The main objective of this Update is to address implementation issues about the scope of ASU No. 2011-11, Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities. The guidance in this ASU is effective for the first interim or annual period beginning on or after January 1, 2013 and should be applied retrospectively. This new guidance is not expected to have a material impact on the Company's consolidated financial statements.

In February 2013, the FASB issued ASU 2013-02, Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income. The objective of this Update is to improve the reporting of reclassifications out of accumulated other comprehensive income. The amendments do not change the current requirements for reporting net income or other comprehensive income in financial statements; rather, they require the entity to provide information about the amounts reclassified out of accumulated other comprehensive income by component. The guidance in this ASU is effective for fiscal years, and interim periods within those years, beginning after December 15, 2012, and should be applied prospectively. This new guidance is not expected to have a material impact on the Company's consolidated financial statements.

NOTE G – Fair Value Measurements

U.S. GAAP defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. U.S. GAAP also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active exchange markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active and other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a company's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

We have established and documented the Company's process for determining the fair values of our assets and liabilities, where applicable. Fair value is based on quoted market prices, when available, for identical or similar assets or liabilities. In the absence of quoted market prices, fair value is determined using valuation models or third-party appraisals. The following is a description of the valuation methodologies used to measure and report the fair value of financial assets and liabilities on a recurring or nonrecurring basis:

Measured on a Recurring Basis

Securities

Securities available for sale are recorded at fair value on a recurring basis. Securities at fair value are priced using model pricing based on the securities' relationship to other benchmark quoted prices as provided by an independent third party, and under the provisions of the Fair Value Measurements and Disclosures topic of the FASB Accounting Standards Codification are considered a Level 2 input method.

The following table presents the balance of assets measured at fair value on a recurring basis at March 31, 2013:

27

Measured on a Nonrecurring Basis

Impaired Loans & Real Estate Held for Sale

From time to time, and on a nonrecurring basis, fair value adjustments to collateral-dependent loans and real estate held for sale are recorded to reflect write-downs of principal balances based on the current appraised or estimated value of the collateral. When management determines that the fair value of the collateral or the real estate held for sale requires additional adjustments, either as a result of a non-current appraisal value or when there is no observable market price, the Company classifies the impaired loan or real estate held for sale as Level 3. Level 3 assets recorded at fair value on a nonrecurring basis at March 31, 2013 included loans for which a specific reserve allowance was established or a partial charge-off was recorded based on the fair value of collateral, as well as covered REO and real estate held for sale for which fair value of the properties was less than the cost basis.

Real estate held for sale consists principally of properties acquired through foreclosure.

The following table presents the aggregated balance of assets measured at estimated fair value on a nonrecurring basis through the six months ended March 31, 2013, and the total losses resulting from those fair value adjustments for the quarter and six months ended March 31, 2013. The following estimated fair values are shown gross of estimated selling costs:

	Through March 31, 2013				Quarter Ended March 31, 2013	Six Months Ended March 31, 2013
	Level 1	Level 2	Level 3	Total	Total Losses	
	(In thousands)					
Impaired loans (1)	\$—	\$—	\$45,966	\$45,966	\$1,225	\$11,038
Covered REO (2)	—	—	13,988	13,988	281	372
Real estate held for sale (2)	—	—	54,069	54,069	6,488	14,024
Balance at end of period	\$—	\$—	\$114,023	\$114,023	\$7,994	\$25,434

(1) The losses represents remeasurements of collateral-dependent loans.

(2) The losses represents aggregate writedowns and charge-offs on real estate held for sale.

There were no liabilities carried at fair value, measured on a recurring or nonrecurring basis, at March 31, 2013.

The following describes the process used to value Level 3 assets measured on a nonrecurring basis:

Impaired loans - The Company adjusts the carrying amount of impaired loans when there is evidence of probable loss and the expected fair value of the loan is less than its contractual amount. The amount of the impairment may be determined based on

Table of Contents

WASHINGTON FEDERAL, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
QUARTERS AND SIX MONTHS ENDED MARCH 31, 2013 AND 2012
(UNAUDITED)

the estimated present value of future cash flows or the fair value of the underlying collateral. Impaired loans with a specific reserve allowance based on cash flow analysis or the value of the underlying collateral are classified as Level 3 assets.

The evaluations for impairment are prepared by the Problem Loan Review Committee, which is chaired by the Chief Credit Officer and includes the Loan Review manager and Special Credits manager, as well as senior credit officers, division managers and group executives, as applicable. These evaluations are performed in conjunction with the quarterly allowance for loan & lease loss ("ALLL") process.

Applicable loans are evaluated for impairment on a quarterly basis. Loans included in the previous quarter's review are reevaluated and if their values are materially different from the prior quarter evaluation, the underlying information (loan balance and collateral value) are compared. Material differences are evaluated for reasonableness and discussions are held between the relationship manager and their division manager to understand the difference and determine if any adjustment is necessary. The inputs are developed and substantiated on a quarterly basis, based on current borrower developments, market conditions and collateral values. The following method is used to value impaired loans:

The fair value of the collateral, which may take the form of real estate or personal property, is based on internal estimates, field observations, assessments provided by third-party appraisers and other valuation models. The Company performs or reaffirms valuations of collateral-dependent impaired loans at least annually. Adjustments are made if management believes that more recent information is available and relevant with respect to the fair value of the collateral.

Real estate held for sale ("REO") - These assets are valued based on inputs such as appraisals and third-party price opinions, less estimated selling costs. Assets that are acquired through foreclosure are recorded initially at the lower of the loan balance or fair value at the date of foreclosure. After foreclosure, valuations are updated periodically, and current market conditions may require the assets to be written down further to a new cost basis. The following method is used to value real estate held for sale:

When a loan is reclassified from loan status to real estate held for sale due to the Company taking possession of the collateral, a Special Credits officer, along with the Special Credits manager, obtains a valuation, which may include a third-party appraisal, which is used to establish the fair value of the underlying collateral. The determined fair value, to the extent it does not exceed the carrying value of the loan, becomes the carrying value of the REO asset. In addition to the valuations from independent third-party sources, the carrying balance of REO assets are written down once a bona fide offer is contractually accepted, through execution of a Purchase and Sale Agreement, where the accepted price is lower than the current balance of the particular REO asset. The fair value of REO assets is re-evaluated quarterly and the REO asset is adjusted to reflect the lower of cost or fair value as necessary.

Fair Values of Financial Instruments

U. S. GAAP requires disclosure of fair value information about financial instruments, whether or not recognized on the statement of financial condition, for which it is practicable to estimate those values. Certain financial instruments and all non-financial instruments are excluded from the disclosure requirements. Accordingly, the aggregate fair value estimates presented do not reflect the underlying fair value of the Company. Although management is not aware of any factors that would materially affect the estimated fair value amounts presented below, such amounts have not been comprehensively revalued for purposes of these financial statements since the dates shown, and therefore, estimates of fair value subsequent to those dates may differ significantly from the amounts presented below.

FHLB advances and other borrowings	2	1,930,000	2,145,399	1,880,000	2,110,223

The following methods and assumptions were used to estimate the fair value of financial instruments:

Cash and cash equivalents – The carrying amount of these items is a reasonable estimate of their fair value.

Available-for-sale securities and held-to-maturity securities – Securities at fair value are priced using model pricing based on the securities' relationship to other benchmark quoted prices as provided by an independent third party, and under the provisions of the Fair Value Measurements and Disclosures topic of the FASB Accounting Standards Codification are considered a Level 2 input method.

Loans receivable and covered loans – For certain homogeneous categories of loans, such as fixed- and variable-rate residential mortgages, fair value is estimated for securities backed by similar loans, adjusted for differences in loan characteristics, using the same methodology described above for AFS and HTM securities. The fair value of other loan types is estimated by discounting the future cash flows and estimated prepayments using the current rates at

which similar loans would be made to borrowers with similar credit ratings and for the same remaining term. Some loan types were valued at carrying value because of their floating rate or expected maturity characteristics. Net deferred loan fees are not included in the fair value calculation but are included in the carrying amount.

 (UNAUDITED)

FDIC indemnification asset – The fair value of the indemnification asset is estimated by discounting the expected future cash flows using the current rates.

FHLB stock – The fair value is based upon the par value of the stock which equates to its carrying value.

Customer accounts – The fair value of demand deposits, savings accounts, and money market accounts is the amount payable on demand at the reporting date. The fair value of fixed-maturity certificates of deposit is estimated by discounting the estimated future cash flows using the rates currently offered for deposits with similar remaining maturities.

FHLB advances and other borrowings – The fair value of FHLB advances and other borrowings is estimated by discounting the estimated future cash flows using rates currently available to the Company for debt with similar remaining maturities.

The following is a reconciliation of amortized cost to fair value of available-for-sale and held-to-maturity securities:

	March 31, 2013					
	Amortized Cost (In thousands)	Gross Gains	Unrealized Losses	Fair Value	Yield

	1,191,487	25,736	—	1,217,223	3.10	
	\$ 2,952,155	\$ 47,897	\$(1,124) \$ 2,998,928	2.44	%

During the period ending March 31, 2013, \$43,199,000 of available-for-sale securities were sold, resulting in a gain of \$0. \$3,500,000 of available-for-sale securities were sold during the period ending March 31, 2012, resulting in a gain of \$0.

Substantially all mortgage-backed securities have contractual due dates that exceed 10 years.

The following table shows the unrealized gross losses and fair value of securities at March 31, 2013, by length of time that individual securities in each category have been in a continuous loss position. Management believes that the declines in fair value of these investments are not an other than temporary impairment.
