Item 1.01 Entry into a Material Definitive Agreement.

On December 21, 2006, Regeneron Pharmaceuticals, Inc. (the Company) entered into a new operating lease agreement with BioMed Realty Trust, Inc. for a new corporate headquarters and research and development complex to be constructed adjacent to the Company's current facility in the Town of Greenburgh in Westchester County, New York. The new facilities will consolidate Regeneron's Tarrytown-based employees, currently located in six buildings, into a three-building, interconnected campus. The new facilities will include approximately 194,000 square feet of laboratory and office space in two buildings to be constructed by BioMed Realty Trust over the next two years. The Company also will retain approximately 27,000 square feet at an existing building that it occupies for its VelociGene® research facility. The initial term of the lease is fifteen years and the Company may exercise options to extend the lease for three additional five-year periods. The lease provides for monthly payments over the term of the lease related to the retained facilities, the costs of construction and tenant improvements for the new facilities, and additional charges for utilities, taxes, operating expenses, and other fees and charges.

The foregoing description of the lease agreement is qualified in its entirety by the full text of the agreement which is filed as Exhibit 99.1 to this Current Report on Form 8-K and is incorporated herein by reference.

Item 5.03 Amendments to Articles of Incorporation or Bylaws.

On December 20, 2006, the Company amended its Restated Certificate of Incorporation to eliminate all matters set forth therein with respect to the shares of preferred stock designated as Series A Junior Participating Preferred Stock. A copy of the Certificate of Amendment of the Company's Restated Certificate of Incorporation is filed as Exhibit 99.2 to this Current Report on Form 8-K.

Item 8.01 Other Events.

On December 21, 2006, the Company issued a press release announcing the new operating lease agreement with BioMed Realty Trust. A copy of this press release is furnished as Exhibit 99.3 to this Current Report on Form 8-K.

On December 20, 2006, the Company issued a press release announcing that it had reported data from a preclinical study demonstrating that blocking a cell signaling molecule, known as Delta-like ligand 4 (Dl14) inhibited the growth of experimental tumors by interfering with their ability to produce a functional blood supply. These findings were published in the December 21st issue of the journal Nature. A copy of this press release is furnished as Exhibit 99.4 to this Current Report on Form 8-K.
